1.2. Acknowledgments

CONSULTANTS - SMITHGROUPJJR

Alexis Denton, AIA	Senior Living Planner
Laura Babinski, RA, LEED AP BD+C	Technical Architect
Hyewon Sun	Technical Architect

SUB-CONSULTANTS - THE INNOVA GROUP

Chris Phillips	Project Manager
Gail Cisneros, RN	Equipment Planner
Lee Pettit, AIA, LEED GA	Consultant

1.0 INTRODUCTION

1.2. Executive Summary

1.2.1. Introduction

The goal of this document is to establish a baseline for new construction of Houses within Community Living Centers (CLCs), based on the Small House Model. The proposed plan was developed simultaneously and in concert with the Small House Model Design Guide, and embraces the Principles of Small House Design as outlined in that guide. The layouts proposed here strike a balance between overall cost and operational efficiency, while maintaining focus on the resident-centered model of care and a residential environment.

This project uses, as an example scenario, new construction of a single House within a horizontal (single-story) CLC. The project does not specifically address vertical CLCs which may have homes stacked within a single building, nor does it address renovations to an existing VA facility. However, understanding the principles presented here and in the Small House Model Design Guide will inform the selection and build-out of suitable sites.

1.2.2. Process

To accomplish this task, the project team included VHA subject matter experts, VHA program officials, Office of Construction & Facilities Management (CFM) staff, representatives from the State Veterans Home Program, and the design consultant team. The process was a collaborative effort intended to elicit participation of a diverse group representing the typical cross-section of project stakeholders. The group came together in a number of collaborative working sessions over several months. With the concurrence and support of the VHA leadership the process will continue with implementation of these prototypes in upcoming CLC projects and through a feedback loop of lessons-learned to further refine and improve them.

1.2.3. Project Components

The two plan options presented in this document are defined with standard room floor plans and equipment plans. The floor plans utilize the direction and guidance stipulated by the Room Templates in the Small House Model Design Guide, where applicable. This includes templates for the resident bedroom and bathroom, the living room, dining room, den and kitchen, as well as the house office, laundry room and bathing suite. The building shell, though implied for clarity, is not a part of this scope of work. The structural, mechanical, plumbing, and electrical systems are not designed but shown for conceptual location purposes only for this project.

2.0 FUNCTIONAL CONCEPTS

2.1. Program Summary

SPACE NAME	NSF (NSM)
Resident Areas	
Bedroom, Resident (12 in home)	230 (21.4)
Bathroom, Resident (12 in home)	80 (7.5)
Living Room	450 (41.9)
Dining Room	530 (49.2)
Kitchen	360 (33.4)
Den	180 (16.8)
Laundry	135 (12.5)
Bathing Suite	140 (13)
Foyer	80 (7.5)
Alcove, Sitting (4 in home)	125 (11.7)
Vestibule	150 (14)
Support Areas	
Pantry	80 (7.5)
Closet, Kitchen Housekeeping	15 (1.4)
Housekeeping Aides Closet	60 (5.6)
Utility, Clean	60 (5.6)
Utility, Soiled	80 (7.5)
Storage, Clean Linen	40 (3.8)
Medication Room	80 (7.5)
Toilet, Visitor (locate adjacent to and connect to Bathing Suite)	60 (5.6)
Storage, Home	80 (7.5)

2.0 FUNCTIONAL CONCEPTS

2.1. Program Summary

SPACE NAME	NSF (NSM)
Storage, Recreation	40 (3.8)
Storage, Equipment	120 (11.2)
Garage (Option 1) / Receiving (Option 2)	240 (22.3)
Gas Manifold Room (may be located in Garage but in a separate room)	40 (3.8)
Alcove, Crash Cart	20 (1.9)
Staff and Administrative Areas	
Home Office	100 (9.3)
Lounge, Staff	180 (16.8)
Toilet, Staff	60 (5.6)

3.0 PROPOSED LAYOUT

3.1. Proposed Layout Option 1

The diagram of the Option 1 plan has the resident rooms grouped in two “L’s” around the core social spaces of the House: the Kitchen and Dining Room. The L’s create a looping corridor which completely encircles the Kitchen and Dining room in order to minimize dead-end corridors. Residents can be confused when they’re faced with a dead-end, creating a one-way migration. The solution to this is looped corridors which gives mental and emotional freedom to residents. The corridor includes four Sitting Alcoves which act both as a resting point along the loop and also as a transitional social space between each resident room and the common areas. The Sitting Alcoves are sized proportionately based on the number of resident rooms that open to the alcove, thus a sitting alcove situated in front of a group of two resident rooms is half as large as an alcove situated in front of four resident rooms.

The Living Room is a core social space and it has been positioned at an outside corner of the plan as a node between the two groupings of resident rooms. This accomplishes several objectives: first and foremost, the move allows natural light with views to enter the Living Room on two sides; it allows the room to open onto a corresponding outdoor patio; and finally, the corner being an open space allows light to permeate the center of the Home into the Kitchen and Dining Room.

On the other side of the Kitchen and Dining Room is the Main Entry to the House. This includes a Foyer and a Vestibule, which are inset from the overall perimeter of the House to create a covered entry on the exterior with a roof overhang. The Foyer is another opportunity to bring natural light into the Kitchen and Dining Room, so they receive natural light from two sides creating a general sense of openness across the entire House. The Den is also situated near the entry, which allows it to be close to the center of activity within the Home, and therefore readily accessible, while still affording it natural light and a view to the exterior. This not only makes the Den a more comfortable and welcoming room for socializing in small groups or visiting with family, but also allows it to double as an overnight room for family members that stay more than one day.

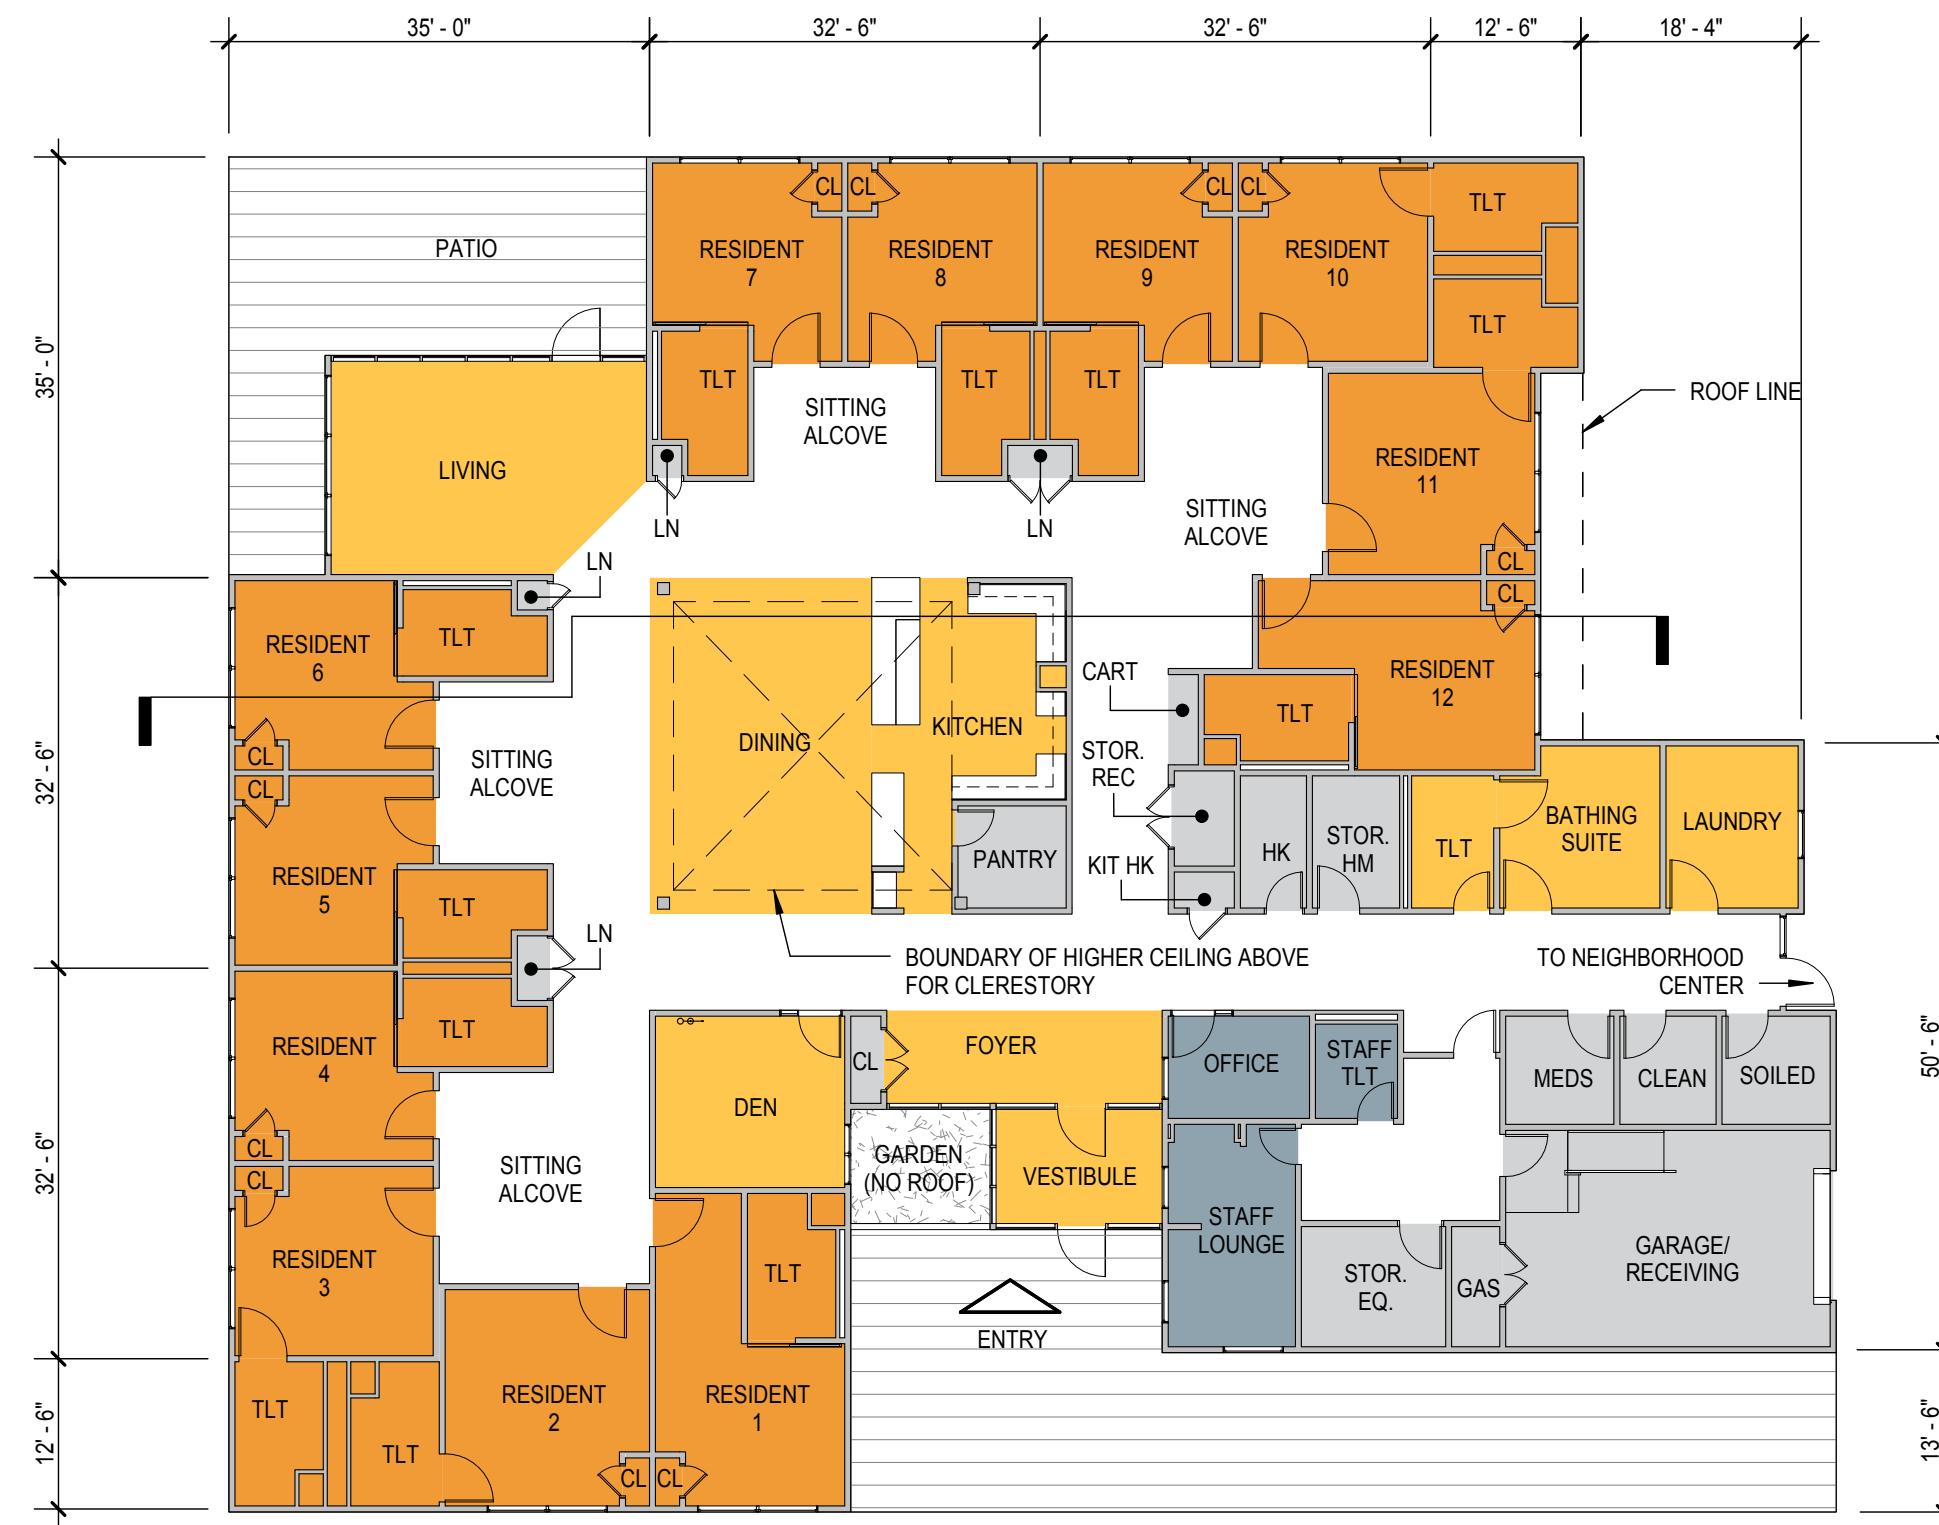

At the opposite end of the plan from the Living Room and at the connection to the Neighborhood Center is the support area. This includes the Garage, which also serves as the support entry to the House, covered parking, and the receiving space. Adjacent to the Garage are other support spaces such as the Clean and Soiled Utility rooms that will be frequently accessed from the service entry, and will not be used by residents. Included in the support area are staff spaces. The House Office is located between the support zone and the Foyer to provide staff with easy access to both public and service areas. This allows the Office to act as a security point for the Entry and Foyer, with a window looking from the room into the Foyer and front door. The Bathing Suite and Laundry are also located near the support spaces, though they open on to the corridor which connects the House to a Neighborhood Center, which thus is a corridor that will be frequented by residents. The plan takes advantage of the location of the Bathing Suite Toilet Room allowing it to double as the Visitor Toilet to reduce the number of toilet rooms overall within the House.

The plan also takes advantage of the typical resident bathroom, as shown on the Resident Room Template in the Small House Model Design Guide, which has a small niche carved out of it to be used as a linen closet outside of the room. When two resident rooms back up against each other, the two niches can create a larger closet. These closets, located throughout the House, become decentralized linen storage. This allows linens to be distributed on carts less frequently, and provides easy access to staff as they change linens within the resident rooms.

Scale: 1/16" = 1'-0"

3.0 PROPOSED LAYOUT

3.2. Proposed Layout Option 2

The diagram of the Option 2 plan is the same as Option 1. The differences between the two plans center around the support area of the House. The major difference is the absence of a Garage in Option 2. As some facilities may not choose to include a Garage, it was a goal that the plan function successfully both with and without a garage. In Option 2, the Garage is replaced with a smaller, exterior Receiving area. The adjoining rooms are arranged to accommodate this difference and to allow for the Medications Room, Clean Utility, and Soiled Utility to be situated with the most convenient access from Receiving.

Option 1 Support Area
