Attachments: (1) Cost Account Codes Associated with Program B

1. Purpose

The Design Management Cost Recovery Program (DMCRP) was established to recoup non-direct costs of design related services by charging all supported Commands a prorata share. The funds designated for DMCRP are referred to as Program B.

2. Background

Program B funds are credits which are generated by applying an accelerated rate on all basic labor charges for Capital Improvements design efforts. Program B funds can only be earned on E-line (Design) products and services. The financial means of accruing Program B funds is through the Facilities Information System (FIS) and only applies to three specific fund sources; O&M,N (including USMC M2), MCON D, and REIMB.

3. Accounting Structure

Reference (a) will be updated to reflect the changes in this policy document. The Cost Account Structure is enclosed as Attachment (1).

   a. Program B Credits are earned by: Directly charging to project job order numbers (JONs) by Engineers, Architects, Interior Designers, Engineering Techs, Project Managers, and Design Managers. Credits are earned on charges to the following FIS Cost Accounts: *3AC, *3AD, *3AF and *3AG and are displayed as a negative number.

   b. Expensing Program B Credits: Program B can be spent only in design related support and only by the following positions: CI BLMs/BLCs, CI3 Staff, CI4 Staff, CI TDLs/TDMs/TDCs, CI Core Supervisory Team Leads, CADD Support, CI Program Analysts, CI Management Analysts, CI BLTLs, IPT Supervisory Team Leads, E-line Pre-award Acquisition support, PWD PMEB Branch Heads, and PWD PMEB Design Supervisory Team Leads. Program B is expensed through the Cost Accounts as listed below.

      i. 41AB: Contract Services (Design)
1. Direct labor associated with award of an AE Contract/TO within negotiated JON controls
2. Travel directly related to projects

**ii. 44AB: Indirect Project Management (Design)**
1. Program and Business Management Support
2. Metrics, ieFACMAN support
3. IDIQ AE Services
4. Travel in support of above

**iii. 43AE: Management of Design Process**
1. CI Design Training (PMEB only as needed)
2. Project related clerical work
3. CADD Management
4. Cost Engineering Program Management
5. Program Analysis
6. Programmatic support of the delivery of designs (DB RFPs & Plans and Specs)
7. Travel in support of above

c. Program B Credits are tracked via FIS, by cost account 43XX.

d. The chart below depicts how billable rates containing Program B are developed.

### Hourly Billable Rates ($/Hr)

<table>
<thead>
<tr>
<th>Basic Labor Rate</th>
<th>Program A – Fringe Acceleration</th>
<th>Program B – Design Acceleration</th>
</tr>
</thead>
<tbody>
<tr>
<td>Based on Grade/Step of the employee that is billing</td>
<td>= xx% of basic labor rate (rate variable by ECH III)</td>
<td>= xx% of basic labor rate (rate variable by ECH IV)</td>
</tr>
</tbody>
</table>

4. **Business Rules**

a. ECH III CI BLM will oversee the ECH IV management of DMCRP.

b. Program B rate is maintained in FIS via the service N10/2, “Manage Acceleration Rates.” One acceleration rate will be utilized for both In-House and Architect and Engineering Services and for all acquisition strategies. Program B percentage will be determined by the FECs and will not exceed 100%.

c. Each FEC CI BLC is responsible to determine the appropriate rate and, if necessary, communicate with ECH III CI BLM to adjust the rate. The intent is to establish a rate that will generate adequate funds to match non-direct design requirements with a zero sum.

d. Post Construction Award Service (PCAS) Cost Accounts will no longer earn Program B funding.
e. General supplies shall not be funded using Program B funds.

f. Capital Improvements, through negotiations with Acquisition, will determine resource requirements.

g. Expenditures of Program B funds must comply with the guidelines of ECB 2007-01 Proper Use of MILCON Funds.

5. **Effective Date**

This ECB has been coordinated with HQ FM, and is effective 1 October 2010.

6. **Points of Contact**
