DATE OF THIS VERSION (new)
October 1, 2012

TITLE OF DOCUMENT (new title if applicable):
Section 08 14 00, Interior Wood Doors

DATE OF VERSION BEING SUPERSEDED (old):
January 1, 2010

DESCRIPTION OF DOCUMENT (previous title, number, other identifying data):
Section 08 14 00, Interior Wood Doors

SUMMARY OF CHANGES IN THIS VERSION:
Updated publication dates for standards listed in Article 1.6 Applicable Publications:
WDMA I.S. 1A-11, I.S. 4-09, I.S. 6A-11, T.M. 6-08,
NFPA 80-10 & ASTM E90-09
The updated standards have only editorial changes that do not impact the technical specifications content
Publications Deleted: WDMA T.M.5-90
This section was updated to comply with latest changes to publications WDMA I.S.1A-11 & WDMA I.S.6A-11
SECTION 08 14 00
INTERIOR WOOD DOORS

SPEC WRITER NOTE:
1. Delete between // ______// if not applicable to project. Also delete any other item or paragraph not applicable in the section and renumber the paragraphs. See VA Standard Details for types of doors and designations.
2. See VA Physical Security Design Guide for security requirements

PART 1 - GENERAL

1.1 DESCRIPTION
A. This section specifies interior flush doors // and stile and rail doors with prefinish, prefit option.
B. Section includes // fire rated doors, // sound retardant doors, // smoke, // and // dutch doors //.

1.2 RELATED WORK
A. Metal door frames: Section 08 11 13, HOLLOW METAL DOORS AND FRAMES.
B. Doors and frames of a forced entry/ballistic resistant rated: Section 08 34 53, SECURITY DOORS AND FRAMES.
C. Overhead doors including loading docks: Section 08 33 00, COILING DOORS AND GRILLES.
D. Windows and frames of a forced entry/ballistic resistant rated: Section 08 56 53, SECURITY WINDOWS
E. Door hardware including hardware location (height): Section 08 71 00, DOOR HARDWARE.
F. Installation of doors and hardware: Section 08 11 13, HOLLOW METAL DOORS AND FRAMES, Section 08 14 00, WOOD DOORS, or Section 08 71 00, DOOR HARDWARE.
G. Glazing and ballistic rated glazing: Section 08 80 00, GLAZING.
H. Finish: Section 09 06 00, SCHEDULE FOR FINISHES.
I. Metal louvers: Section 08 90 00, LOUVERS AND VENTS.
J. Lead lined wood door: Section 13 49 00, RADIATION PROTECTION.
K. Card readers and biometric devices: Section 28 13 00, ACCESS CONTROL
L. Intrusion alarm: Section 28 16 11, INTRUSION DETECTION SYSTEM
M. Security monitors: Section 28 51 00, SECURITY CONTROL CENTER

1.3 SUBMITTALS
A. Submit in accordance with Section 01 33 23, SHOP DRAWINGS, PRODUCT DATA, AND SAMPLES.
SPEC WRITER NOTE: Paragraph B, delete subparagraph No. 1 on projects not involving large numbers of wood doors. Delete sub-paragraph No. 2 on projects where no transparent door finishes are required. Samples are not required for projects involving 10 wood doors or less.

B. Samples:

//1. Corner section of flush veneered door 300 mm (12 inches) square, showing details of construction, labeled to show grade and type number and conformance to specified standard. //

//2. Veneer sample 200 mm (8 inch) by 275 mm (11 inch) by 6 mm (1/4 inch) showing specified wood species sanded to receive a transparent finish. Factory finish veneer sample where the prefinished option is accepted. //

C. Shop Drawings:

1. Show every door in project and schedule location in building.
2. Indicate type, grade, finish and size; include detail of // glazing // louver // sound gasketing // and pertinent details.
3. Provide information concerning specific requirements not included in the manufacturer's literature and data submittal.

D. Manufacturer's Literature and Data:

//1. Sound rated doors, including test report indicating STC rating per ASTM E90 from test laboratory. //

//2. Labeled fire rated doors showing conformance with NFPA 80. //

E. Laboratory Test Reports:

1. Screw holding capacity test report in accordance with WDMA T.M.10.
2. Split resistance test report in accordance with WDMA T.M.5.

1.4 WARRANTY

A. Doors are subject to terms of Article titled “Warranty of Construction”, FAR clause 52.246-21, except that warranty shall be as follows:

1. For interior doors, manufacturer’s warranty for lifetime of original installation.

//2. Specified STC RATING for sound retardant rated door assembly in place. //
1.5 DELIVERY AND STORAGE

SPEC WRITER NOTE: These bags or packages will be required to be reinstalled on doors after installation, see Paragraph, DOOR PROTECTION.

A. Factory seal doors and accessories in minimum of 6 mill polyethylene bags or cardboard packages which shall remain unbroken during delivery and storage.
B. Store in accordance with WDMA I.S.1-A, Job Site Information.
C. Label package for door opening where used.

1.6 APPLICABLE PUBLICATIONS

Publications listed below form a part of this specification to extent referenced. Publications are referenced in text by basic designation only.

B. Window and Door Manufacturers Association (WDMA):
- I.S.1A-11 .............. Architectural Wood Flush Doors
- I.S.4-09 ................. Water-Repellent Preservative Non-Pressure Treatment for Millwork
- I.S.6A-11 .............. Architectural Wood Stile and Rail Doors
- T.M.6-08 ................. Adhesive (Glue Bond) Durability Test Method
- T.M.7-08 ................. Cycle-Slam Test Method
- T.M.8-08 ................. Hinge Loading Test Method
- T.M.10-08 ............... Screwholding Test Method

C. National Fire Protection Association (NFPA):
- 80-10 .................. Protection of Buildings from Exterior Fire
- 252-08 ................. Fire Tests of Door Assemblies

D. ASTM International (ASTM):
- E90-09 .................. Laboratory Measurements of Airborne Sound Transmission Loss

SPEC WRITER NOTES:
1. Make material requirements agree with applicable requirements specified in the referenced Applicable Publications.
2. Update and specify only that which applies to the project.
3. Use 45 mm (1-3/4 inch) thick doors for medical facilities, nursing homes and domiciliary buildings.
4. Use 35 mm (1-3/8 inch) thick doors for office buildings and cemetery type buildings, unless facility requests 45
PART 2 – PRODUCTS

2.1 FLUSH DOORS

A. General:

2. Adhesive: Type II
3. Thickness: 45 mm (1-3/4 inches) unless otherwise shown or specified.
4. Give exposed wood parts of exterior doors a water-repellent preservative treatment in accordance with WDMA I.S.4. //

SPEC WRITER NOTE: For face veneer other than those specified below see WDMA I.S.1-A, Section A-8, Face Veneer Characteristics, regarding AA and A grade door faces. See section A-3, Appearance of Individual Pieces of Face Veneer; A-4, Matching Between Individual Veneer Pieces; A-5, Assembly of Spliced Veneer on Door Face; and A-6, Appearance of Doors in pairs or sets. For highest quality paint finish, specify medium density overlay faces only.

B. Face Veneer:

1. In accordance with WDMA I.S.1-A.
2. One species throughout the project unless scheduled or otherwise shown.
3. For transparent finishes: // Premium Grade. rotary cut, // white maple // white Birch // red oak // white oak // ____//.
   a. A grade face veneer standard optional.
   b. AA grade face veneer
   c. Match face veneers for doors for uniform effect of color and grain at joints.
   d. Door edges shall be same species as door face veneer except maple may be used for stile face veneer on birch doors.
   //e. On doors required to have transparent finish on one side and paint finish on other side; use veneers as required for transparent finish on both sides. //
   //f. In existing buildings, where doors are required to have transparent finish, use wood species and grade of face veneers to match adjacent existing doors.//
4. For painted finishes: Custom Grade, mill option close grained hardwood, premium or medium density overlay. Do not use Lauan.
5. Factory sand doors for finishing.

C. Wood for stops, louvers, muntins and moldings of flush doors required to have transparent finish:
1. Solid Wood of same species as face veneer, except maple may be used on birch doors.
2. Glazing:
   a. On non-labeled doors use applied wood stops nailed tight on room side and attached on opposite side with flathead, countersunk wood screws, spaced approximately 125 mm (5 inches) on centers.
   b. Use stainless steel or dull chrome plated brass screws for exterior doors.
3. Wood Louvers:
   a. Door manufacturer's standard product, fabricated of solid wood sections.
   b. Wood Slats: Not less than 5 mm (3/16 inch) thick.
   c. Stiles routed out to receive slats.
   d. Secure louvers in prepared cutouts with wood stops.

D. Stiles and Rails:
1. Option for wood stiles and rails:
   a. Composite material having screw withdrawal force greater than minimum performance level value when tested in accordance with WDMA T.M.10.
2. Provide adequate blocking for bottom of doors having mechanically operated door bottom seal meeting or exceeding the performance duty level per T.M.10 for horizontal door edge screw holding.
//3. Rabbeted transom meeting rail edges match face veneers of doors. // Bottom rail of transom panel match face veneer on non rabbeted meeting rail edge.//

SPEC WRITER NOTE: Do not use 60 minute B label doors or 20 minute doors. Solid core door, 45 mm (1-3/4 inches) give 20 minutes performance.

E. Fire rated wood doors:
1. Fire Performance Rating:
   a. “B” label, 1-1/2 hours.
2. Labels:
a. Doors shall conform to the requirements of ASTM E2074, or NFPA 252, and, carry an identifying label from a qualified testing and inspection agency for class of door or opening shown designating fire performance rating.
b. Metal labels with raised or incised markings.

3. Performance Criteria for Stiles of doors utilizing standard mortise leaf hinges:
b. Direct screw withdrawal: WDMA T.M.10 for Extra Heavy Duty doors. Average of 10 test samples using a steel, fully threaded #12 wood screw.
c. Cycle Slam: 1,000,000 cycles with no loose hinge screws or other visible signs of failure when tested in accordance with WDMA T.M.7.

4. Additional Hardware Reinforcement:
a. Provide fire rated doors with hardware reinforcement blocking.
b. Size of lock blocks as required to secure hardware specified.
c. Top, bottom and intermediate rail blocks shall measure not less than 125 mm (five inches) minimum by full core width.
d. Reinforcement blocking in compliance with manufacturer's labeling requirements.
e. Mineral material similar to core is not acceptable.

5. Other Core Components: Manufacturer's standard as allowed by the labeling requirements.

6. Provide steel frame approved for use in labeled doors for vision panels.

7. Provide steel astragal on pair of doors.

F. Smoke Barrier Doors:
1. For glazed openings use steel frames approved for use in labeled doors.
2. Provide a steel astragal on one leaf of pairs of doors, including double egress doors.

G. Sound Rated Doors:
1. Fabricated as specified for flush wood doors with additional construction requirements to meet specified sound transmission class (STC).
2. STC Rating of the door assembly in place when tested in accordance with ASTM E90 by an independent nationally recognized acoustical testing laboratory not less than 36 //__________ //.

3. Accessories:
   a. Frame Gaskets: Continuous closed cell sponge neoprene with stop adjusters.
   b. Automatic Door Bottom Seal:
      1) Steel spring operated, closed cell sponge neoprene metal mounted removable in extruded aluminum housing with a medium matte 0.1 mm (4.0 mil) thick clear Anodized finish.
      2) Concealed or Surface Mounted.

H. Dutch Doors:
   1. Consist of two sections, each fabricated as specified for flush doors.
   2. Construct shelf as detailed, from clear hardwood stock, or laminated plastic door shelf, same species as face veneer of door.
   3. Place shelf on top of lower section of door and support as shown with a pair of wood or wrought steel brackets.
   4. Prime steel brackets for finish painting.

2.2 STILE AND RAIL DOORS
   A. Meeting requirements of WDMA I.S.6A
   B. Ponderosa pine doors of size and design shown.
   C. Grade: //Premium// Custom//.
   D. Door Panels:
      1. Grain of face of panels parallel with longest dimensions of panel.
      2. Flat panels: Veneered composite core, not less than 6 mm (5/8 inch) thick.
      3. Raised panels: Unless otherwise shown, thickness of raised panels not less than the following:
         a. For 35 mm (1-3/8 inch) and 45 mm (1-3/4 inch) thick doors: 28 mm (1-1/8 inch) thick
         b. For 57 mm (2-1/4 inch) thick doors: 41 mm (1-5/8 inch) thick
      4. Where armor plate is required in connection with paneled doors, provide panels with plywood fillers, glued in place, and finished.
   E. Stops and Molds:
      1. Solid sticking both sides, of same material as stiles and rails, coped at intersections.
      2. Glazed openings applied wood stops nailed on interior side of door.
F. Louvers: Size as shown.  

Spec Writer Note: If there are more than 10 doors at any project, doors to receive transparent finish shall be factory finished.

2.3 PREFINISH, PREFIT OPTION

A. Flush doors may be factory machined to receive hardware, bevels, undercuts, cutouts, accessories and fitting for frame.
B. Factory fitting to conform to specification for shop and field fitting, including factory application of sealer to edge and routings.
C. Flush doors to receive transparent finish (in addition to being prefit) shall be factory finished as follows:
   1. WDMA I.S.1-A Section F-3 specification for System TR-4, Conversion Varnish or System TR-5, Catalyzed Vinyl.
   2. Use stain when required to produce the finish specified in Section 09 06 00 SCHEDULE FOR FINISHES.

2.4 IDENTIFICATION MARK:

A. On top edge of door.
B. Either a stamp, brand or other indelible mark, giving manufacturer’s name, door’s trade name, construction of door, code date of manufacture and quality.
C. Accompanied by either of the following additional requirements:
   1. An identification mark or a separate certification including name of inspection organization.
   2. Identification of standards for door, including glue type.
   3. Identification of veneer and quality certification.
   4. Identification of preservative treatment for stile and rail doors.

2.5 SEALING:

Give top and bottom edge of doors two coats of catalyzed polyurethane or water resistant sealer before sealing in shipping containers.

PART 3 - EXECUTION

3.1 DOOR PREPARATION

A. Field, shop or factory preparation: Do not violate the qualified testing and inspection agency label requirements for fire rated doors.
B. Clearances between Doors and Frames and Floors:
   1. Maximum 3 mm (1/8 inch) clearance at the jambs, heads, and meeting stiles, and a 19 mm (3/4 inch) clearance at bottom, except as otherwise specified.
2. Maximum clearance at bottom of sound rated doors, light-proofed doors, doors to operating rooms, and doors designated to be fitted with mechanical seal: 10 mm (3/8 inch).

C. Provide cutouts for special details required and specified.

D. Rout doors for hardware using templates and location heights specified in Section, 08 71 00 DOOR HARDWARE.

E. Fit doors to frame, bevel lock edge of doors 3 mm (1/8 inch) for each 50 mm (two inches) of door thickness // undercut where shown. //

F. Immediately after fitting and cutting of doors for hardware, seal cut edges of doors with two coats of water resistant sealer.

G. Finish surfaces, including both faces, top and bottom and edges of the doors smooth to touch.

H. Apply a steel astragal on the opposite side of active door on pairs of fire rated doors.

I. Apply a steel astragal to meeting style of active leaf of pair of doors or double egress smoke doors.

3.2 INSTALLATION OF DOORS APPLICATION OF HARDWARE

Install doors and hardware as specified in this Section.

3.3 DOOR PROTECTION

A. As door installation is completed, place polyethylene bag or cardboard shipping container over door and tape in place.

B. Provide protective covering over knobs and handles in addition to covering door.

C. Maintain covering in good condition until removal is approved by Resident Engineer.
