SECTION 23 11 23
FACILITY NATURAL-GAS PIPING

SPEC WRITER NOTE: Delete between //----// if not applicable to project. Also delete any other item or paragraph not applicable in the section and renumber the paragraphs.

Where the scope of work includes installation of a gas meter, ensure tie-in with the building metering system, if any, at the VA facility. Use section 25 25 10 for guidance.

PART 1 - GENERAL

1.1 DESCRIPTION
Fuel gas systems, including piping, equipment and all necessary accessories as designated in this section. Fuel gas piping for central boiler plants is not included.

1.2 RELATED WORK
A. Section 07 84 00, FIRESTOPPING: Penetrations in rated enclosures.
B. Section 09 91 00, PAINTING: Preparation and finish painting and identification of piping systems.
C. Section 22 05 11, COMMON WORK RESULTS FOR PLUMBING.
D. Section 22 05 23, GENERAL DUTY VALVES FOR PLUMBING PIPING
E. Section 23 07 11, HVAC and BOILER PLANT INSULATION: Pipe Insulation.
F. Section 23 21 11, BOILER PLANT PIPING SYSTEMS: Fuel Gas Piping For Boiler Plants.
G. Section 23 08 00, COMMISSIONING OF HVAC SYSTEMS: Requirements for commissioning, systems readiness checklists, and training.
H. Section 23 51 00 – BREECHINGS, CHIMNEYS, and STACKS
I. Section 25 10 10 – ADVANCED UTILITY METERING SYSTEM
J. Section 01 91 00 – GENERAL COMMISSIONING REQUIREMENTS

1.3 SUBMITTALS
A. Submit in accordance with Section 01 33 23, SHOP DRAWINGS, PRODUCT DATA, and SAMPLES.
B. Manufacturer's Literature and Data:
   1. Pipe & Fittings.
   2. Valves.
   3. Strainers.
   4. All items listed in Part 2 - Products.
C. Detailed shop drawing of clamping device and extensions when required in connection with the waterproofing membrane.

1.4 APPLICABLE PUBLICATIONS

A. The publications listed below form a part of this specification to the extent referenced. The publications are referenced in the text by the basic designation only.

B. Federal Specifications (Fed. Spec.):
   A-A-59617 .............. Unions, Brass or Bronze Threaded, Pipe Connections and Solder-Joint Tube Connections

C. American National Standards Institute (ANSI):
   American Society of Mechanical Engineers (ASME): (Copyrighted Society)
   A13.1-(2007) .......... Scheme for Identification of Piping Systems
   B16.11-2009 .......... Forged Steel Fittings, Socket-Welding and Threaded ANSI/ASME
   B16.15-2006 .......... Cast Copper Alloy Threaded Fittings: Classes 125 and 250 ANSI/ASME
   B31.8-2010 .......... Gas Transmission and Distribution Piping Systems ANSI/ASME

D. American Society for Testing and Materials (ASTM):
   A53-10 ................. Standard Specification for Pipe, Steel, Black And Hot-Dipped, Zinc-coated Welded and Seamless
   A183-09 ................. Standard Specification for Carbon Steel Track Bolts and Nuts
   A536-09 ................. Standard Specification for Ductile Iron Castings

E. National Fire Protection Association (NFPA):
   54-2009 ................. National Fuel Gas Code
F. International Code Council
   IPC 2009 ............... International Plumbing Code
   IFGC 2009 ............. International Fuel Gas Code
G. International Association of Plumbing and Mechanical Officials (IAPMO):
   Uniform Plumbing Code – 2009
   IS6-06 ................. Installation Standard
H. Manufacturers Standardization Society of the Valve and Fittings
   Industry, Inc. (MSS):
   SP-72-2010 ............ Ball Valves with Flanged or Butt-Welding For
                         General Service
   SP-110-2010 .......... Ball Valve Threaded, Socket-Welding, Solder
                         Joint, Grooved and Flared Ends

1.5 SYSTEM PRESSURE

   Natural gas systems // unless otherwise noted // are designed and
   materials and equipment selected to prevent failure under gas pressure
   of _________ kPa (____ psi) // entering government property // kPa
   ___ (___ psi) at downstream side of pressure regulator //.

   SPEC WRITER NOTE: Make material
   requirements agree with applicable
   requirements specified in the referenced
   Applicable Publications. Update and
   specify only that which applies to the
   project.

PART 2 - PRODUCTS

2.1 FUEL GAS SERVICE CONNECTIONS TO BUILDING

   A. From inside face of exterior wall to a distance of approximately 1500
      mm (5 feet) outside of building, use coated piping.
   B. Pipe: Black steel, ASTM A53, Schedule 40. Shop-applied pipe coating
      shall be one of the following types:
      1. Coal Tar Enamel Coating: Exterior of pipe and fittings shall be
         cleaned, primed with Type B primer and coated with hot-applied coal
         tar enamel with bonded layer of felt wrap in accordance with AWWA
         C203. Asbestos felt shall not be used; felt material shall be
         fibrous glass mat as specified in Appendix Section A2.1 of AWWA
         C203.
      3. Thermosetting Epoxy Coating: Fed. Spec. L-C-530, Type II
      4. Field-applied plastic tape material used on pipe joints and for
         repairing damaged areas of shop-applied coatings, Fed. Spec. L-T-
1512, Type I, 10 mils nominal thickness for pipe joints, and Type II, 20 mils nominal thickness for coating repairs.

C. Holiday Inspections: Procedure for holiday inspection: Holiday inspection shall be conducted on all coatings to determine the presence and number of discontinuities in those coatings referenced in 2.6/B - 1, 2, 3, and 4 using a Tinker & Rasor model AP/W Holiday Detector. Holiday inspection shall be performed in a manner spelled out in the Tinker & Rasor operating instructions and at a voltage level recommended by the coating manufacturer or applicable NACE International Standard such as RPO 274-93 or RPO 490-90 in the case thermosetting epoxy coating. Holiday Detectors shall be calibrated and supplied with a certificate of calibration from the factory. A calibration of the Holiday Detector shall be performed once every 6 months to verify output voltages are true and correct.

D. Fittings:
2. Socket weld and threaded fittings forged steel, ANSI B16.11.
3. Grooved End: Ductile iron (ASTM A536, Grade 65-45-12), malleable iron (ASTM A47, Grade 32510), or steel (ASTM A53, Type F or Type E or S, Grade B).

SPEC WRITER NOTE: Use the following paragraph only in Seismic Area A.

F. Earthquake Valve:
2. Valve actuator: Actuated by one stainless steel ball, incorporated with a bubble level, vertically mounted and have a single step manual reset level.
3. Operating ambient temperature range: minus 40°C (minus 40°F) to 65.5°C (150°F)

2.2 FUEL GAS PIPING
B. Nipples: Steel, ASTM A733, Schedule 40.
C. Fittings:
1. Sizes 50 mm (2 inch) under ANSI B 16.3 threaded malleable iron.
2. Over 50 mm (2 inch) and up to 100 mm (4 inch) ANSI B16.11 socket welded.
3. Over 100 mm (4 inch) ANSI 16.9 butt welded.
D. Joints: Provide welded or threaded joints.

2.3 EXPOSED FUEL GAS PIPING

A. Finished Room: Use full iron pipe size chrome plated brass piping for exposed fuel gas piping connecting fixtures, casework, cabinets, equipment and reagent racks when not concealed by apron including those furnished by the Government or specified in other sections.
1. Pipe: Fed. Spec. WW-P-351, standard weight
2. Fittings: ANSI B16.15 cast bronze threaded fittings with chrome finish, (125 and 250).
4. Unions: 50 mm (2 inches and smaller) Mss SP-72, SP-110, Brass or Bronze threaded with chrome finish. Unions 65 mm (2-1/2 inches) and larger shall be flange type with approved gaskets.
5. Valves: Mss SP-72, SP-110, Brass or bronze with chrome finish.

B. Unfinished Rooms, Mechanical Rooms and Kitchens: Chrome-plated brass piping is not required. Paint piping systems as specified in Section 09 91 00, PAINTING

2.4 VALVES

A. Ball Valve: Bronze body, rated for 1025 kPa at 185°C (150 psi at 365°F), 1725 kPa at 121°C (250 psi at 250°F), reinforced TFE seat, stem seal and thrust washer; end entry, threaded ends, UL-listed for natural or LP gas shut off service when used on those services.
B. Gas Vent Cocks: Type 701: Bronze body, tee handle, rated for 205 kPa at 38°C (30 psi at 100°F), ground plug, rated for tight shut-off on fuel gas service.

2.5 WATERPROOFING

A. Provide at points where pipes pass through membrane waterproofed floors or walls in contact with earth.
B. Floors: Provide cast iron stack sleeve with flashing device and a underdeck clamp. After stack is passed through sleeve, provide a waterproofed caulked joint at top hub.
C. Walls: See detail shown on drawings.

2.6 STRAINERS

A. Provide on high pressure side of pressure reducing valves, on inlet side of indicating and control instruments and equipment subject to sediment damage and where shown on drawings. Strainer element shall be removable without disconnection of piping.
B. Gas Lines: "Y" type with removable mesh lined brass strainer sleeve.
C. Body: Smaller than 80 mm (3 inches), brass or bronze; 80 mm (3 inches) and larger, cast iron or semi-steel.

2.7 DIELECTRIC FITTINGS

Provide dielectric couplings or unions between ferrous and non-ferrous pipe.

2.8 GAS EQUIPMENT CONNECTORS

Flexible connectors with teflon core, interlocked galvanized steel protective casing, AGA certified design.

PART 3 - EXECUTION

3.1 INSTALLATION

A. General: Comply with the International Fuel Gas Code and the following:
1. Install branch piping for fuel gas and connect to all fixtures, valves, cocks, outlets, casework, cabinets and equipment, including those furnished by the Government or specified in other sections.
2. Pipe shall be round and straight. Cutting shall be done with proper tools. Pipe, shall be reamed to full size after cutting.
3. All pipe runs shall be laid out to avoid interference with other work.
4. Install valves with stem in horizontal position whenever possible. All valves shall be easily accessible.
5. Install union and shut-off valve on pressure piping at connections to equipment.
6. Pipe Hangers, Supports and Accessories:
   a. All piping shall be supported per the International Fuel Gas Code, Chapter No. 4.
   b. Shop Painting and Plating: Hangers, supports, rods, inserts and accessories used for Pipe supports shall be shop coated with red lead or zinc Chromate primer paint. Electroplated copper hanger rods, hangers and accessories may be used with copper tubing.
   c. Floor, Wall and Ceiling Plates, Supports, Hangers:
      1) Solid or split unplated cast iron, chrome plated in finished areas.
      2) All plates shall be provided with set screws.
      3) Pipe Hangers: Height adjustable clevis type.
      4) Adjustable Floor Rests and Base Flanges: Steel.
      5) Concrete Inserts: "Universal" or continuous slotted type.
6) Hanger Rods: Mild, low carbon steel, fully threaded or Threaded at each end with two removable nuts at each end for positioning rod and hanger and locking each in place.
7) Riser Clamps: Malleable iron or steel.
8) Rollers: Cast iron.
9) Self-drilling type expansion shields shall be "Phillips" type, with case hardened steel expander plugs.
10) Miscellaneous Materials: As specified, required, directed or as noted on the drawings for proper installation of hangers, supports and accessories.

7. Install cast chrome plated escutcheon with set screw at each wall, floor and ceiling penetration in exposed finished locations and within cabinets and millwork.

8. Penetrations:
   a. Fire Stopping: Where pipes pass through fire partitions, fire walls, smoke partitions, or floors, install a fire stop that provides an effective barrier against the spread of fire, smoke and gases as specified in Section 07 84 00, FIRESTOPPING. Completely fill and seal clearances between piping and openings with the fire stopping materials.
   b. Waterproofing: At floor penetrations, completely seal clearances around the pipe and make watertight with sealant as specified in Section 07 92 00, JOINT SEALANTS.

B. Piping shall conform to the following:
1. Fuel Gas:
   a. Entire fuel gas piping installation shall be in accordance with requirements of NFPA 54.
   b. Provide fuel gas piping with plugged drip pockets at low points.

   SPEC WRITER NOTE: Use the following paragraph only in Seismic Area A.

   c. Install automatic shutoff valve (earthquake valve) on discharge side of meter. Valve shall positively shut off supply of gas in case of pressure failure, remain shut off until manually reopened, and be provided with outside adjustment for reset.

3.2 CLEANING OF SYSTEM AFTER INSTALLATION

Clean all piping systems to remove all dirt, coatings and debris. // Remove all valves, controls etc., and reinstall after piping system has been cleaned.//
3.3 TESTS
A. General: Test system either in its entirety or in sections after system is installed or cleaned.
B. Test shall be made in accordance with Section 406 of the International Fuel Gas Code. The system shall be tested at a minimum of 1.5 times maximum working pressure, but not less than 3 psig (20 kPa) gage // 100 psig (690 kPa). //</p111>

3.4 COMMISSIONING
A. Provide commissioning documentation in accordance with the requirements of Section 23 08 00 - COMMISSIONING OF HVAC SYSTEMS for all inspection, start up, and contractor testing required above and required by the System Readiness Checklist provided by the Commissioning Agent.

--- END ---
