1.1. **Description.** The Power Check Pad with suppresser is the prime facility on which operational checks of jet engines are performed. Unsuppressed pads are used as back-up or interim facilities. The metal building (often referred to as the “Hush House”) is equipment; the pad is the concrete that the building protects.

1.2. **Requirements Determination.** The suppressor and associated devices are supplied as items of Government Furnished Equipment (GFE). Warner Robins Air Logistics Center (WR-ALC) is designated as inventory manager responsible for equipment programming, procurement, and criteria used in programming and constructing support items. For additional information see *Hush House Site Planning Bulletin*; available digitally at: www.AFCEC.af.mil.

1.3. **Scope Determination.** See *Hush House Site Planning Bulletin* and paragraph 6-9 of UFC 3-260-01.

1.4. **Dimensions.** See *Hush House Site Planning Bulletin* and paragraphs 6-9 in UFC 3-260-01.

1.5. **Design Considerations.** See *Hush House Site Planning Bulletin* and paragraphs 6-9 in UFC 3-260-01.
