

## **Impact Area Non-Dudded. FAC: 1743**

CATCODE: 174321

OPR:

OCR:

1.1. **Description.** An area having designated boundaries within which ordnance that does not produce duds will impact. This area is composed mostly of the safety fans for small arms ranges. The primary function of the impact area is to contain weapons effects as much as possible using earthen berms or natural terrain features. Account for each area-typically managed and scheduled by either a numeric, lettered, or alphanumeric code through the garrison training or range control manager (for example, DPTM or DPTM-equivalent)-with a separate facility number and individual real property record. These impact areas may be used for maneuver when the weapons ranges are not in use.

1.2. A defined facility standard is not currently available for this CATCODE. By default, all requirements are user justified until a standard is established or adopted.
