Updated: 09 NOV 2022

1.1. **General Criteria.** The Air Force Fitness Centers and sports complexes are designed to obtain maximum voluntary participation in the most commonly recognized fitness and sports programs. In the interest of good play, ensure the fields and courts are regulation size and design.

1.2. The criteria given in this chapter are established by the DoD and apply to both appropriated and non-appropriated fund projects. They are considered ample to satisfy the requirements of typical fitness and sports programs. Where there is an evident need for greater allowances or for facilities that are not listed in this chapter, guidance given in AFI 32-1022 (NAF projects), AFI 32-1032 Planning and Programming Appropriated Fund Maintenance, Repair, and Construction Projects, and AFI 32-1021 (MILCON/P-341 projects), or waivers and exceptions to criteria should be followed. Consult this chapter's previous sections for criteria on dining halls, kitchen facilities, visiting officer quarters, and temporary lodging facilities. MAJCOM/A1S reviews actions of these facilities.

1.3. Guidance given in **Category Group 74, Overview, paragraph 1.1.**, relative to population basis also applies to the criteria given in this section.

1.4. Night lighting may be provided as required for the athletic fields and recreation courts described in this section.
