

## **Category Group 88, Fire and Other Alarm Systems.**

### **Overview**

**1.1. Installed Fire Protection Systems.** Fire protection systems are designed to detect the presence of fire and to activate both facility/area and fire alarm/communication center alarms. Systems may also be designed to suppress, contain, or control the fire once detected. These systems provide protection to physical facilities, their occupants, contents, structures, mobile and stationary equipment, water-front facilities, outside storage, shore protection for ships and craft, and external protection for aircraft. The following systems are installed in compliance with design/application criteria in UFC 3-600-01 and other applicable ETLs and publications
