

Bathroom Partition Materials

Baked Enamel Steel—Quality, economical material features a thermosetting hybrid powder finish on galvanized steel. Resists corrosion, grease, acids, caustics, marring, and stains.

Solid Plastic Polymer—The ideal choice for busy public facilities; highly resistant to denting, chipping, stains, common acids and cleaning agents, as well as to moisture.

Stainless Steel—Corrosion-resistant material is easily maintained; scratches can be buffed out. Satin finish.

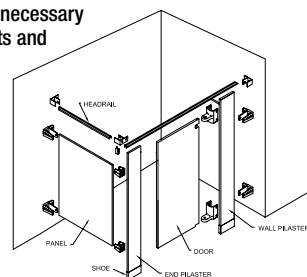

Plastic Laminate—Economical, high-pressure laminates are highly

resistant to scratches, grease, and marring. For additional materials, colors, or technical support, contact your local branch.
