

## GENERAL

This renewal parts list provides replacement part numbers which can be ordered from the York Parts Warehouse (Tel. 800-932-1701). Refer to the data tag on your equipment for the unit size; fan size and accessories that comprise your unit. Compare this data tag information with the Nomenclature below to completely identify all components in your system. Furnish this model number and the York order number on which the unit was originally furnished when ordering replacement parts.

# ACCESSORIES

## GENERAL

Parts for accessories can be ordered from the York Parts Warehouse (Tel. 800-932-1701). Refer to the data tag on your equipment for the unit size, fan size and accessories that comprise your unit. Compare this data tag information with the Nomenclature on page 2 to completely identify all components in your system. Furnish this model number and the York order number on which the unit was originally furnished when ordering replacement parts.

## ISOLATORS

Order isolators by the manufacturer's type and size.

## FILTERS

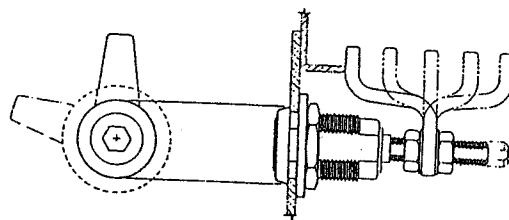

Order replacement filters from the York Parts Warehouse providing the sales order number and filter information found on the filter identification tag located in the filter section.

## BELTS

Identify belts from the manufacturer's label on existing belts and procure the belts locally. Belts supplied with units are static-conducting belts.

## Submittal Summary Sheet

January, 1999

### Standard Features

- Ratings from 1-400 HP at 460 Volt and 1-100 HP at 208 volt Flux Vector Quiet Control for HVAC.
- Digital AC Variable Speed Drive with advanced electronics reliably control your HVAC fan or pump from Reliance Electric, a leader in Motor and Drive technology.
- Pre-Engineered commonly specified kits for the HVAC market. Complete U.L.<sup>TM</sup> 508 listing as a package with these drives and all factory engineered for easy contractor mounting and wiring.
- IGBT transistor technology for reliable quiet motor operation. 1 to 75 HP 8 kHz carrier frequency without derating the drive. Option for 100-150 HP 8 kHz carrier frequency rating.
- Selectable PWM carrier frequency for system acoustical tuning characteristics.
- Power matched premium efficient motors that meet the National Energy Law. Guaranteed motor performance to withstand any high drive generated voltage.
- All drive packages are Y2K compliant.
- PI Loop option in version 6.03 software.
- Designed to comply with IEEE 519-1992 Harmonic Distortion Standard.
- Compact size for maximum mounting density.
- Simple LED keypad for drive set up, control, fault indication, and metering.
- RS232 port for host computer configuration and monitoring. Optional cards for EMS network connection capabilities.
- Configurable I/O for maximum system connection capacities.
- U.L. and NEC approved electronic motor overload protection.
- NEMA 1 enclosure. 1-60 HP optional NEMA 12 plenum rated enclosure to meet "UL95" standard.
- Motor Current Limit and Regenerative voltage limits.
- Standard Digital Keypad Function:
  - Start/Stop
  - Remote/Local
  - Digital Speed Selection in Local Mode
  - Password Protection
  - LED display of Motor Speed, Volts, Amps, Hz, kW, DC Bus volts and Input Speed Reference
- Elapsed Time Meter
- Start into rotating (windmilling) motor without decelerating or tripping.
- Simple connection to fire and life safety systems. Smoke and Fire purge as well as freezestat and other selectable interlocks.
- ISO 9001 Drive Manufacturer.
- Vector control for accurate speed control and "trip free" operation.
- 0-20 mA or 0-10 VDC speed reference inputs and selectable 0-20 mA or 0-10 VDC output proportional to speed or load.
- Adjustable Auto Restart (number of restarts and time delay between attempts are selectable). Display indicates when controller is attempting a restart.
- Frequency avoidance bands widths enables the drive to lock out mechanical resonance points.
- "S" curve acceleration and deceleration for smooth speed transitions and high inertia fan wheels.
