## Variable swirl air diffuser

1. Eight specifications available: 200,250,315, 350,400,500, 630 and 800mm.
2. Uniform air diffusing and adjustable air patterns.
3. Easy installation, can also be connected or hanged by hooks
4. In white color, other colors are also available.
5. Widely used in the floor with height of over 3.8m
6. Blade is designed on the principle of fluid dynamics to provide the swirling airflow with speed, so that the air convection is increased due to long air supply throw and big coverage of jet.
7. The angle of the blade can be adjusted in accordance with the working conditions to provide rotating air in horizontal, vertical and diagonal directions.
8. The blades can be adjusted by manual or electrical.
