## UNIFIED FACILITIES GUIDE SPECIFICATIONS

References are in Agreement with UMRL dated January 2020

\*\*\*\*\*

### SECTION 06 73 01

#### FIBERGLASS REINFORCED PLASTIC (FRP) GRATING 05/18

\*\*\*\*\*

NOTE: This guide specification covers requirements  
for fiberglass reinforced plastic (FRP) gratings.

Adhere to [UFC 1-300-02](#) Unified Facilities Guide  
Specifications (UFGS) Format Standard when editing  
this guide specification or preparing new project  
specification sections. Edit this guide  
specification for project specific requirements by  
adding, deleting, or revising text. For bracketed  
items, choose applicable item(s) or insert  
appropriate information.

Remove information and requirements not required in  
respective project, whether or not brackets are  
present.

Comments, suggestions and recommended changes for  
this guide specification are welcome and should be  
submitted as a [Criteria Change Request \(CCR\)](#).

\*\*\*\*\*

\*\*\*\*\*

NOTE: Units of work normally included in this  
section should be FRP items that require specific  
fabrication to meet the desired project requirements.

\*\*\*\*\*

\*\*\*\*\*

NOTE: Show the following information on the  
drawings:

1. Location and configuration of all FRP grates.
2. All sizes and dimensions.
3. Special fastenings, attachments, or anchoring.
4. Location and special details of expansion joint covers.
5. Connection details, other than manufacturer's

standard details for grating.

## 8. Locations and details of removable sections of handrails.

\*\*\*\*\*

### PART 1 GENERAL

This Section includes, but is not limited to, new fiberglass reinforced plastic (FRP) grating for elevated platforms and walkways.

#### 1.1 REFERENCES

\*\*\*\*\*

NOTE: This paragraph is used to list the publications cited in the text of the guide specification. The publications are referred to in the text by basic designation only and listed in this paragraph by organization, designation, date, and title.

Use the Reference Wizard's Check Reference feature when you add a Reference Identifier (RID) outside of the Section's Reference Article to automatically place the reference in the Reference Article. Also use the Reference Wizard's Check Reference feature to update the issue dates.

References not used in the text will automatically be deleted from this section of the project specification when you choose to reconcile references in the publish print process.

\*\*\*\*\*

The publications listed below form a part of this specification to the extent referenced. The publications are referred to within the text by the basic designation only.

## 1.2 SUBMITTALS

\*\*\*\*\*

**NOTE: Review Submittal Description (SD) definitions  
in Section 01 33 00 SUBMITTAL PROCEDURES and edit  
the following list to reflect only the submittals  
required for the project.**

**The Guide Specification technical editors have  
designated those items that require Government**

approval, due to their complexity or criticality, with a "G." Generally, other submittal items can be reviewed by the Contractor's Quality Control System. Only add a "G" to an item, if the submittal is sufficiently important or complex in context of the project.

For submittals requiring Government approval on Army projects, a code of up to three characters within the submittal tags may be used following the "G" designation to indicate the approving authority. Codes for Army projects using the Resident Management System (RMS) are: "AE" for Architect-Engineer; "DO" for District Office (Engineering Division or other organization in the District Office); "AO" for Area Office; "RO" for Resident Office; and "PO" for Project Office. Codes following the "G" typically are not used for Navy, Air Force, and NASA projects.

An "S" following a submittal item indicates that the submittal is required for the Sustainability eNotebook to fulfill federally mandated sustainable requirements in accordance with Section 01 33 29 SUSTAINABILITY REPORTING. Locate the "S" submittal under the SD number that best describes the submittal item.

Choose the first bracketed item for Navy, Air Force and NASA projects, or choose the second bracketed item for Army projects.

\*\*\*\*\*

Government approval is required for submittals with a "G" designation; submittals not having a "G" designation are [for Contractor Quality Control approval.][for information only. When used, a designation following the "G" designation identifies the office that will review the submittal for the Government.] Submittals with an "S" are for inclusion in the Sustainability eNotebook, in conformance to Section 01 33 29 SUSTAINABILITY REPORTING. Submit the following in accordance with Section 01 33 00 SUBMITTAL PROCEDURES:

#### SD-02 Shop Drawings

Installation Drawings, Templates, and Directions; G[, [\_\_\_\_]]

#### SD-03 Product Data

FRP Grating; G[, [\_\_\_\_]]

Clips and Anchorage; G[, [\_\_\_\_]]

1.3 QUALITY CONTROL

\*\*\*\*\*  
NOTE: For jobs in Iceland, in lieu of AWS welders  
and inspectors, use "Technological Institute of  
Iceland"-certified welders and inspectors.  
\*\*\*\*\*

Provide items by manufacturers having a minimum of [10][\_\_\_\_\_] years of experience in the design and manufacture of similar products and systems. In addition, if requested, provide a record of at least [five][\_\_\_\_\_] separate, similar, successful installations in the last [5][\_\_\_\_\_] years. Submit manufacturer's catalog data, to include two copies of the manufacturer's specifications, load tables, dimension diagrams, and anchor details for the following items:

a. FRP Grating

b. Clips and Anchorage

Provide [3][\_\_\_\_\_] -year manufacturer's limited warranty on all FRP products against defects in materials and workmanship. Submit the Manufacturer's Sample Warranty before work starts.

Submit installation drawings, templates, and directions for installing anchorages, including sleeves, concrete inserts, anchor bolts, and items with integral anchors, that are embedded in concrete or masonry.

Submit Certification of Anchorage System compliance with ASCE 7. Deliver such items to the Contracting Officer and the project site before installation starts.

[ Ensure that the manufacturer is certified to ISO 9001-2008.[ Submit the Manufacturer's Certification of State Product Approval.][ Submit the Proof of Certification from a minimum of two quality assurance programs for its facilities or products (UL, DNV, ABS, USCG, AARR).

#### ]1.4 DELIVERY, HANDLING, AND STORAGE

Submit the manufacturer's recommendations for shipping, handling, and erection procedures, and care and maintenance instructions. Deliver manufactured materials in original, unbroken pallets, packages, containers, or bundles bearing the label of the manufacturer. Ensure that all adhesives, resins, and their catalysts and hardeners are crated or boxed separately, and noted as such.

Handle all materials to prevent abrasion, cracking, chipping, twisting, other deformations, and other types of damage. Store adhesives, resins and their catalysts in dry indoor facilities between 21 and 30 degrees C 70 and 85 degrees F until they are required.

### PART 2 PRODUCTS

\*\*\*\*\*  
**NOTE: Select products based on esthetic values, reliability, and cost. Delete alternate requirements where they occur.**  
\*\*\*\*\*

#### 2.1 SYSTEM DESCRIPTION

Provide gratings composed of continuous roving fiberglass reinforcement and resin in qualities, quantities, properties, arrangements, and dimensions as necessary to meet the design requirements and dimensions as specified.

Provide resin of isophthalic polyester with chemical formulations as necessary to provide the corrosion resistance, strength, and other physical properties conforming to the specified requirements.

Ensure that all surfaces of FRP items and fabrications are [smooth] [nonslip grit], resin-rich, and free of voids, dry spots, cracks, and unreinforced areas. Completely cover all glass fibers with resin to protect against their exposure to ultraviolet light, wear, or weathering.

##### 2.1.1 Design Requirements

Submit documentation for the following product tests before work starts:

| Test                                    | Standard                         | Structural Performance Requirements   | Minimum Flexural Strength | Minimum Flexural Modulus     |
|---|----------------------------------|---------------------------------------|---------------------------|------------------------------|
| Bearing Strength Testing                | ASTM D953                        |                                       |                           |                              |
| Flexural Properties                     | ASTM D790                        |                                       | 30,000 psi                | (1.8 x 10 to power of 6) psi |
| Ultraviolet Testing                     | ASTM G155<br>ASTM G154           |                                       |                           |                              |
| Shear Strength                          | ASTM D2344/D2344M                | 4,500 psi                             |                           |                              |
| Tensile Properties                      | ASTM D638                        | 30,000 psi                            |                           |                              |
| Toxicity Testing                        | SAE CMH-17-36                    |                                       |                           |                              |
| Coefficient of Lineal Thermal Expansion | ASTM D696                        | 8.0 x 10 power minus 6 in/in/degree F |                           |                              |
| Flame Spread Testing                    | ASTM D2863<br>ASTM E662<br>UL 94 |                                       |                           |                              |

## 2.1.2 Performance Requirements

### 2.1.2.1 Structural Performance of Gratings

Provide gratings capable of withstanding the effects of gravity loads in accordance with [ASCE 7](#), [ICC IBC](#), and the following loads and stresses within the limits and under the conditions indicated:

- [ Walkways and Elevated Platforms Other Than Exits: Uniform load of [2.873 kilopascal](#) [60 lb/square foot](#).
- ][ Walkways and Elevated Platforms Used as Exits: Uniform load of [4.788 kilopascal](#) [100 lb/square foot](#).
- ][ High Load Capacity (HLC) Grating for AASHTO - H-20 LOADING: [14.515 kg](#) [32,000 lb](#) Axle Dual Wheels; minimum [3.8 to 5.1 cm](#) [1.5 to 2 inch](#) thickness.
- ][ Automobile Traffic: [2268 kg](#) [5000 lb](#) vehicle
- ][ Forklift: [[4.54](#)] [[2.72](#)] [[.907](#)] tonne [[5](#)] [[3](#)] [[1](#)] ton capacity
- ]

Provide grating products with a flame spread rating of 25 or less per [ASTM E84](#) Tunnel Test. Test gratings for burn time of less than 30 seconds and an extent of burn rate of less than or equal to 10 millimeters per [ASTM D635](#).

## 2.2 FABRICATION

### 2.2.1 Molded FRP Grating

Ensure that all field-fabricated and shop-fabricated grating cuts are coated with vinyl ester resin to provide maximum corrosion resistance in accordance with the manufacturer's instructions.

Provide grating made as one-piece molded construction with tops and bottoms of bearing bars and cross bars in the same plane with a rectangular mesh pattern providing unidirectional strength and reinforced with continuous roving of an equal number of layers in each direction. Ensure that the top layer of reinforcement is no more than **3 mm 1/8 inch** below the top surface of the grating to provide maximum stiffness and prevent resin chipping of unreinforced surfaces having percentage of glass (by weight) not exceeding 35 percent.

Ensure that no dry glass fibers are visible on any surface of bearing bars or cross bars after molding, and that all bars are smooth and uniform, with no evidence of fiber orientation irregularities, interlaminar voids, porosity, resin-rich areas or resin-starved areas.

- [ Provide nonslip surfacing manufactured with a concave, meniscus profile on the top of each bar providing maximum slip resistance.
- ] Fillet grating bar intersections to a minimum radius of **1.6 mm 1/16 inch** to eliminate local stress concentrations and the possibility of resin cracking at these locations.

Provide fire-retardant grating with a tested flame spread rating of 25 or less when tested in accordance with **ASTM E84**.

### 2.2.2 Fasteners

Provide Type 316 stainless-steel fasteners, clips, and anchorage for exterior use. Select fasteners for type, grade, and class required.

## PART 3 EXECUTION

### 3.1 INSTALLATION

Install items at locations indicated, according to the manufacturer's instructions. [ Submit [\_\_\_\_\_] copies of **manufacturer's Certification of Installation** to the Contracting Officer.] Verify all measurements and take all field measurements necessary before fabrication. Include all materials and parts necessary to complete each item, even though such work is not definitely shown or specified. Perform cutting, drilling, and fitting required for installing gratings. Set units accurately in location, alignment, and elevation; measured from established lines; and levels and free of rack. Comply with recommendations of cited bar grating standards, including installation clearances and standard anchoring details.

- a. Attach removable units to supporting members with the type and size of clips and fasteners indicated or, if not indicated, as recommended by the grating manufacturer for the type of installation conditions shown.
- b. Attach nonremovable units to supporting members by welding where both materials are same; otherwise, fasten by bolting as indicated above.

### 3.1.1 Anchorage, Fastenings, and Connections

Provide anchorage where necessary for fastening miscellaneous FRP items securely in place.

## 3.2 CLOSEOUT ACTIVITIES

### 3.2.1 Manufacturer's Warranty

Submit original and [\_\_\_\_\_] copies of manufacturer's signed Warranty.

-- End of Section --
