### SECTION 01 14 00

#### WORK RESTRICTIONS

07/06

\*\*\*\*\*

NOTE: This guide specification covers the requirements for work and site restrictions.

Edit this guide specification for project specific requirements by adding, deleting, or revising text. For bracketed items, choose applicable items(s) or insert appropriate information.

Remove information and requirements not required in respective project, whether or not brackets are present.

Comments and suggestions on this guide specification are welcome and should be directed to the technical proponent of the specification. A listing of technical proponents, including their organization designation and telephone number, is on the Internet.

Recommended changes to a UFGS should be submitted as a Criteria Change Request (CCR).

This guide specification includes tailoring options for EFD and EFA regional requirements. Selection or deselection of a tailoring option will include or exclude that option in the section, but editing the resulting section to fit the project is still required.

\*\*\*\*\*

## PART 1   GENERAL

### [1.1   DEFINITIONS

#### 1.1.1   State

"State" when used in reference to states of the United States shall also include the Territory of Guam.

] [1.2 SUBMITTALS

\*\*\*\*\*  
NOTE: Use for PACNAVFACENGCOM projects only.  
\*\*\*\*\*

\*\*\*\*\*  
NOTE: Review submittal description (SD) definitions  
in Section 01 33 00 SUBMITTAL PROCEDURES and edit  
the following list to reflect only the submittals  
required for the project. Submittals should be kept  
to the minimum required for adequate quality control.

A "G" following a submittal item indicates that the  
submittal requires Government approval. Some  
submittals are already marked with a "G". Only  
delete an existing "G" if the submittal item is not  
complex and can be reviewed through the Contractor's  
Quality Control system. Only add a "G" if the  
submittal is sufficiently important or complex in  
context of the project.

For submittals requiring Government approval on Army  
projects, a code of up to three characters within  
the submittal tags may be used following the "G"  
designation to indicate the approving authority.  
Codes for Army projects using the Resident  
Management System (RMS) are: "AE" for  
Architect-Engineer; "DO" for District Office  
(Engineering Division or other organization in the  
District Office); "AO" for Area Office; "RO" for  
Resident Office; and "PO" for Project Office. Codes  
following the "G" typically are not used for Navy,  
Air Force, and NASA projects.

Choose the first bracketed item for Navy, Air Force  
and NASA projects, or choose the second bracketed  
item for Army projects.

\*\*\*\*\*

Government approval is required for submittals with a "G" designation;  
submittals not having a "G" designation are [for Contractor Quality Control  
approval.] [for information only. When used, a designation following the  
"G" designation identifies the office that will review the submittal for  
the Government.] The following shall be submitted in accordance with  
Section 01 33 00 SUBMITTAL PROCEDURES:

\*\*\*\*\*

The Norfolk Naval Shipyard has instituted a requirement for all personnel to take shelter for personal safety in the event of certain emergencies. This policy includes Contractors, Subcontractors, and any person who is employed by the Contractor.

The most appropriate protective action for certain emergencies is to take shelter. Personnel shall immediately seek shelter while an assessment is made of the threat and determinations are being made regarding subsequent actions such as "all clear" or selected building evacuations. The following procedures have been put in place in the event of an emergent condition.

1. NOTIFICATION: The primary means of alerting personnel shall be emergency alert signals. The alerting signal to seek shelter shall be three steady tones that last for thirty seconds separated by ten seconds of silence. The notification for "all clear" shall be three short tones repeated three times.

2. SHELTERING: When personnel hear the alert signal, the area of work must be secured in a manner that will leave the site in safe condition. Personnel shall seek shelter in the nearest occupied building in calm and orderly manner. If possible, secure all windows and doors and shut off ventilation. If working aboard ship, proceed into the interior of the ship and wait for further directions from official personnel. If in a vehicle, park the vehicle so that it does not block the normally traveled portion of the road and proceed into the nearest occupied building.

3. EVACUATION: In the event of an evacuation, personnel shall receive directions from team members of the Crowd Control Center (CCC) or the building custodian acting on the directions from the CCC. Contract personnel shall comply with instructions given at all times.

] [1.4.3 Shipyard Regulations

marked for identification. Comply with the following conditions:

- a. Restrict employees/representatives to the work site and control travel directly to and from the work site.
- b. Restore all traffic/parking/security signs and markings, including space numbers, designations, and lines, to their original form if such signs/markings are defaced or deleted during construction/repair.
- c. Be responsible for control and security of Contractor-owned equipment and materials at the work site. Report immediately missing/lost/stolen property to the Shipyard Police Department (phone 396-7266) as each case occurs.
- d. Ensure that no material is stacked within 10 feet of the Controlled Industrial Area (CIA) perimeter. Remove from the work site, or secure ladders or other such equipment which could be used to climb the CIA perimeter fence. Ensure that no vehicles are parked within 10 feet of the CIA perimeter.
- e. Ensure that no opening in the roof/walls/windows/fence of the building exist at the end of the work day and do not exist where penetration is possible during non-working hours. If the building cannot be secured at the end of the workday, coordinate action with the Contracting Office to notify the cognizant code to arrange for a security watch by their personnel.
- f. Seventy-two hours prior to making any penetrations (such as tunneling under, cutting through a fence or building) in a restricted area, contact the Shipyard Security Office to make arrangements for a security guard or other measures required to meet all security requirements. Cost of security guard will be charged to the Contractor.

\*\*\*\*\*  
**NOTE: Add the following paragraphs for projects at  
Norfolk Naval Shipyard (NNSY)**  
\*\*\*\*\*

Contractor personnel shall not, under any circumstances, enter a radiologically controlled area or cross any posted radiological boundary. This paragraph applies to all phases of contract work. Radiation areas are posted with signs consistent with OSHA requirements. Ensure that employees are familiar with the radiation signs and symbols. All personnel entering the shipyard for the first time are required to receive radiological indoctrination training.

Should contract workers encounter radiological postings and/or boundaries which appear to limit their ability to access or carry out their intended work, they shall notify their contract administrator for resolution of the problem.

##### 1.4.4.1 Radioactive Materials and Equipment

All testing equipment, containing a radioactive source, shall be operated in accordance with an approved radioactive equipment plan. This plan shall

be submitted to the Contracting Officer and approved by the Radiation Officer (Code 105.5), prior to bringing the equipment into the shipyard. This plan shall include:

- a. The name and type of equipment.
- b. The type and size of radiation source.
- c. The dates and locations of the equipment's usage.
- d. The radiological controls that the Contractor will use while operating the equipment.

A different radioactive equipment plan will be required for each different type of equipment, type of radioactive source, or size of radioactive source. A data sheet of for each piece of new radioactive equipment shall be submitted to the Contracting Officer to forward to the shipyard's Radiation Safety Officer. The data sheet shall contain the following information:

#### 1.4.6 Work Outside Regular Hours

\*\*\*\*\*  
NOTE: For PACNAVFACENGCOM projects, discuss with the Contracting Officer when work outside regular hours is anticipated since it generally requires overtime pay for Government employees. When there is a need for special work periods, such as at occupied family housing, modify this paragraph accordingly. For MCBH Kaneohe Bay, change to 30 calendar days.  
\*\*\*\*\*

Work outside regular working hours requires Contracting Officer approval. Make application 15 [\_\_\_\_\_] calendar days prior to such work to allow

arrangements to be made by the Government for inspecting the work in progress, giving the specific dates, hours, location, type of work to be performed, contract number and project title. Based on the justification provided, the Contracting Officer may approve work outside regular hours. During periods of darkness, the different parts of the work shall be lighted in a manner approved by the Contracting Officer. [Make utility cutovers after normal working hours or on Saturdays, Sundays, and Government holidays unless directed otherwise.]

#### [1.4.7 Exclusionary Period

No work shall be performed during the period [\_\_\_\_\_] to [\_\_\_\_\_] inclusive, without prior written approval of the Contracting Officer. This period has not been considered in computing the time allowed for the performance of this contract.

#### ] [1.4.8 Occupied and Existing Building[s]

\*\*\*\*\*

NOTE: Edit for all projects as appropriate. Delete this paragraph and its subparagraphs unless the work is in or around existing occupied buildings or unless Activity operations will materially affect the Contractor's operations. Examples of the latter include:

1. Restrictions regarding the time of day (or other period) or the duration of work in an area
2. Interruptions of work in an area for operations, one time or periodic
3. Interruption of work for a specific time for operations
4. Location or restrictions on location of construction equipment
5. Maintaining access.

Contact the Government to determine the complete details of scheduling restraints which may impact on the successful bidder's time or cost of performance of the work, and incorporate such details in this paragraph. Note that this paragraph defines the impact of Activity operations upon the Contractor. If the Contractor affects Activity operations, include that information in paragraph entitled "SPECIAL SCHEDULING REQUIREMENTS" and not in this paragraph.

\*\*\*\*\*

The Contractor shall be working [in an existing building] [around existing buildings] which [is] [are] occupied. [Do not enter the building[s] without prior approval of the Contracting Officer.]

[The existing buildings and their contents shall be kept secure at all times. Provide temporary closures as required to maintain security as directed by the Contracting Officer.]

[Provide dust covers or protective enclosures to protect existing work that remains and Government material located in the [\_\_\_\_\_] during the construction period.]

[Relocate movable furniture [approximately [1.8 m] [6 feet] [\_\_\_\_\_] away from the Contractor's working area] [as required to perform the work], protect the furniture, and replace the furniture in [its] [their] original location[s] upon completion of the work.] [Leave attached equipment in place, and protect [it] [them] against damage, or temporarily disconnect, relocate, protect, and reinstall [it] [them] at the completion of the work.]

[The Government will remove [and relocate] other Government property in the areas of the building[s] scheduled to receive work.]

#### ]1.4.9 Utility Cutovers and Interruptions

- a. Make utility cutovers and interruptions after normal working hours or on Saturdays, Sundays, and Government holidays. Conform to procedures required in the paragraph "Work Outside Regular Hours."

\*\*\*\*\*  
**NOTE: Use the next two paragraphs on all projects involving potential conflicts with existing utility systems. Clearly detail the permissible extent, the sequencing, or the duration of outages. Contact the Government to determine the complete details of outage or scheduling restraints which may impact on the successful bidder's time or cost of performance of the work, and incorporate such details in this paragraph.**  
\*\*\*\*\*

- b. Ensure that new utility lines are complete, except for the connection, before interrupting existing service.
- c. Interruption to water, sanitary sewer, storm sewer, telephone service, electric service, air conditioning, heating, fire alarm, compressed air, and [\_\_\_\_\_] shall be considered utility cutovers pursuant to the paragraph entitled "Work Outside Regular Hours." [Such interruption shall be further limited to [\_\_\_\_\_] hours. This time limit includes time for deactivation and reactivation.]
- [ d. Operation of Station Utilities: The Contractor shall not operate nor disturb the setting of control devices in the station utilities system, including water, sewer, electrical, and steam services. The Government will operate the control devices as required for normal conduct of the work. The Contractor shall notify the Contracting Officer giving reasonable advance notice when such operation is required.]
