UNIFIED FACILITIES GUIDE SPECIFICATIONS

References are in agreement with UMRL dated October 2009

SECTION 09 68 00

CARPET
01/07

NOTE: This guide specification covers the requirements for broadloom carpet, modular tile carpet, and entrance carpet.

Edit this guide specification for project specific requirements by adding, deleting, or revising text. For bracketed items, choose applicable items(s) or insert appropriate information.

Remove information and requirements not required in respective project, whether or not brackets are present.

Comments and suggestions on this guide specification are welcome and should be directed to the technical proponent of the specification. A listing of technical proponents, including their organization designation and telephone number, is on the Internet.

Recommended changes to a UFGS should be submitted as a Criteria Change Request (CCR).

This guide specification includes tailoring options for NAVY, broadloom carpet, modular tile carpet, and entrance carpet. Selection or deselection of a tailoring option will include or exclude that option in the section, but editing the resulting section to fit the project is still required.

PART 1 GENERAL

NOTE: Carpet containing recovered material is designated in 40 CFR 247.12 and subsequent Recovered Materials Advisory Notices (RMAN) as an affirmative procurement item. Designers should give preference to products containing recovered material when price, performance, and availability meet project requirements.

Options to consider include:

- a. Use of polyester carpet fiber face, polyethylene terephthalate resin. (A justification is required when polyester fiber is specified in lieu of polyethylene terephthalate (PET) fiber).
- b. Use of carpet cushion containing recovered materials.
- c. Use of nylon fiber with recycled content.
- d. Use of nylon carpet with backing containing recovered carpet.
- e. Use of a program that reconditions and restores old carpet for re-use.
- f. Use of programs to send old carpet and existing carpet waste back to mills for recycling, rather than to landfills.

Edit paragraphs SUBMITTALS and Physical Characteristics within this section and Section 02 41 00 {DEMOLITION} {AND} {DECONSTRUCTION} as necessary.

1.1 REFERENCES

NOTE: This paragraph is used to list the publications cited in the text of the guide specification. The publications are referred to in the text by basic designation only and listed in this paragraph by organization, designation, date, and title.

Use the Reference Wizard's Check Reference feature when you add a RID outside of the Section's Reference Article to automatically place the reference in the Reference Article. Also use the Reference Wizard's Check Reference feature to update the issue dates.

References not used in the text will automatically be deleted from this section of the project specification when you choose to reconcile references in the publish print process.

The publications listed below form a part of this specification to the extent referenced. The publications are referred to within the text by the basic designation only.

1.2 SYSTEM DESCRIPTION

1.2.1 Local/Regional Materials

NOTE: Using local materials can help minimize
transportation impacts, including fossil fuel
consumption, air pollution, and labor. Using
materials harvested and manufactured within a 800 km
(500 mile) radius from the project site contributes
to the following LEED credit: MR5. Coordinate with
Section 01 33 29 LEED(tm) DOCUMENTATION. Use second
option if Contractor is choosing local materials in
accordance with Section 01 33 29 LEED(tm)
DOCUMENTATION. First option will not be used for
USACE projects. Army projects will include second
option only if pursuing this LEED credit.

[Use materials or products extracted, harvested, or recovered, as well as
manufactured, within a [800] [_____] km [500] [_____] mile radius from the
project site, if available from a minimum of three sources.] [See Section
01 33 29 LEED(tm) DOCUMENTATION for cumulative total local material
requirements. Carpet materials may be locally available.]

1.2.2 Environmental Data

NOTE: ASTM E 2129 provides for detailed documentation of the sustainability aspects of products used in the project. This level of detail may be useful to the Contractor, Government, building occupants, or the public in assessing the sustainability of these products.

[Submit Table 1 of ASTM E 2129 for the following products: [____].]

1.3 SUBMITTALS

NOTE: Review submittal description (SD) definitions in Section 01 33 00 SUBMITTAL PROCEDURES and edit the following list to reflect only the submittals required for the project. Submittals should be kept to the minimum required for adequate quality control.

A "G" following a submittal item indicates that the submittal requires Government approval. Some submittals are already marked with a "G". Only delete an existing "G" if the submittal item is not complex and can be reviewed through the Contractor's Quality Control system. Only add a "G" if the submittal is sufficiently important or complex in context of the project.

For submittals requiring Government approval on Army projects, a code of up to three characters within the submittal tags may be used following the "G" designation to indicate the approving authority. Codes for Army projects using the Resident Management System (RMS) are: "AE" for Architect-Engineer; "DO" for District Office (Engineering Division or other organization in the District Office); "AO" for Area Office; "RO" for Resident Office; and "PO" for Project Office. Codes following the "G" typically are not used for Navy, Air Force, and NASA projects.

Choose the first bracketed item for Navy, Air Force and NASA projects, or choose the second bracketed item for Army projects.

Government approval is required for submittals with a "G" designation; submittals not having a "G" designation are for [Contractor Quality Control approval.] [information only. When used, a designation following the "G" designation identifies the office that will review the submittal for the Government.] Submit the following in accordance with Section 01 33 00 SUBMITTAL PROCEDURES:

SD-02 Shop Drawings

Installation[; G][; G, [____]]

Molding[; G][; G, [_____]]

[Three] [_____] copies of drawings indicating areas receiving carpet, carpet types, textures and patterns, direction of pile, location of seams, and locations of edge molding. Installation drawings for the following items diagramming the location of seams, edge moldings, and carpet direction for approval prior to installation.

- 1) Carpet Pads
- 2) Carpet Moldings
- 3) Base

SD-03 Product Data

Carpet[; G][; G, [_____]]
Carpet Pads[; G][; G, [_____]]
Carpet Moldings[; G][; G, [_____]]
Base[; G][; G, [_____]]

Manufacturer's catalog data and printed documentation stating physical characteristics, durability, resistance to fading, and flame resistance characteristics for each type of carpet material and installation accessory. Submit manufacturer's catalog data for the following items:

- 1) Carpet Pads
- 2) Carpet Moldings
- 3) Base

Surface Preparation[; G][; G, [_____]]
Installation[; G][; G, [_____]]

[Three] [_____] copies of the manufacturer's printed installation instructions for the carpet, including preparation of substrate, seaming techniques, and recommended adhesives and tapes.

Regulatory Requirements[; G][; G, [_____]]

[Three] [_____] copies of report stating that carpet and carpet components contain recycled materials and/or involvement in a recycling or reuse program. Include in the report percentage of post-industrial and post-consumer recycled material and relative dollar value of recycled content products to total dollar value of products included in project. Include [manufacturer's] [independent, third party] certification of compliance with Carpet and Rug Institute's Green Label Indoor Air Quality program

[Physical Characteristics; (LEED)

Documentation indicating type of biobased material in product and biobased content. Indicate relative dollar value of biobased content products to total dollar value of products included in project. Documentation indicating relative dollar value of rapidly renewable materials to total dollar value of products included in project.]

[Local/Regional Materials; (LEED)

Submit documentation indicating distance between manufacturing facility and the project site. Indicate distance of raw material origin from the project site. Indicate relative dollar value of local/regional materials to total dollar value of products included in project.]

[Environmental Data

Documentation indicating type of biobased material in product and biobased content. Indicate relative dollar value of biobased content products to total dollar value of products included in project.]

SD-04 Samples

Carpet[; G][; G, [____]]
Molding[; G][; G, [____]]

- a. Carpet: [Two] [____] "Production Quality" samples 450 by 450 mm 18 by 18 inches of each carpet proposed for use, showing quality, pattern, and color specified.
- b. Vinyl or Aluminum Moldings: [Two] [____] pieces of each type at least 300 mm 12 inches long.
- c. Special Treatment Materials: [Two] [____] samples showing system and installation method.

SD-06 Test Reports

Moisture and Alkalinity Tests[; G][; G, [____]]

[Three] [____] copies of test reports of moisture and alkalinity content of concrete slab stating date of test, person conducting the test, and the area tested.

SD-07 Certificates

Carpet[; G][; G, [____]]

Certificates of compliance from a laboratory accredited by the National Laboratory Accreditation Program of the National Institute of Standards and Technology attesting that each type of carpet and carpet with cushion material conforms to the standards specified.

Regulatory Requirements[; G][; G, [____]]

Report stating that the carpet contains recycled materials and indicating the actual percentage of recycled material. Certificates, showing conformance with the referenced standards contained in this section, for the following:

- 1) Carpet Pads
- 2) Carpet Moldings
- 3) Base

SD-10 Operation and Maintenance Data

Carpet[; G][; G, [____]]
Cleaning and Protection[; G][; G, [____]]

[Three] [____] copies of carpet manufacturer's maintenance instructions describing recommended type of cleaning equipment and material, spotting and cleaning methods, and cleaning cycles.

Maintenance Service

Documentation of manufacturer's [maintenance agreement] [take-back program] [green lease] for carpet. Include contact information, summary of procedures, and the limitations and conditions applicable to the project. Indicate manufacturer's commitment to reclaim materials for recycling and/or reuse.

SD-11 Closeout Submittals

[Local/Regional Materials; (LEED)

LEED documentation relative to local/regional materials credit in accordance with LEED Reference Guide. Include in LEED Documentation Notebook.]

Carpet; (LEED)

LEED documentation relative to recycled content credit in accordance with LEED Reference Guide. Include in LEED Documentation Notebook.

Carpet; (LEED)
Adhesives and Concrete Primer; (LEED)

LEED documentation relative to low-emitting materials credit in accordance with LEED Reference Guide. Include in LEED Documentation Notebook.

Carpet; (LEED)

LEED documentation relative to rapidly renewable credit in accordance with LEED Reference Guide. Include in LEED Documentation Notebook.

1.4 QUALITY ASSURANCE

NOTE: Synthetic carpet fiber, backing, pad, adhesive, seam sealants, floor preparation chemicals, and treatment for natural and synthetic carpet fibers (mothproofing, anti-microbial, etc.) are all potential sources of VOCs in indoor air. Using low-VOC products contributes to the following LEED credit: EQ4. Include VOC submittal if pursuing this LEED credit, and coordinate with Section 01 33 29 LEED(tm) DOCUMENTATION.

Provide the Carpet and Rug Institute (CRI) Indoor Air Quality (IAQ) label for carpet, carpet cushion, and adhesives or demonstrate compliance with testing criteria and frequencies through independent laboratory test

results. Carpet, carpet cushion, and adhesives bearing the label will indicate that the carpet has been tested and meets the [Regulatory Requirements](#) and criteria of the CRI IAQ Carpet Testing Program, and minimizes the impact on indoor air quality. [Procure carpet in accordance with 40 CFR 247](#), and where possible, purchased locally to reduce emissions of fossil fuels from transporting. Conform to EPA requirements in accordance with [Section 01 62 35 RECYCLED / RECOVERED MATERIALS](#) for carpet.

1.5 DELIVERY, STORAGE, AND HANDLING

NOTE: Carpeting provides a sink for adsorbing VOCs emitted from other sources and home for a variety of bacteria, microbes, dust mites, etc. Materials with high short-term emissions include, but are not limited to: adhesives, sealants and glazing compounds (specifically those with petrochemical vehicles or carriers); paint, wood preservatives, and finishes; control and/or expansion joint fillers; hard finishes requiring adhesive installation; gypsum board (with associated finish processes and products); and composite or engineered wood products with formaldehyde binders.

Deliver materials to the site in the manufacturer's original wrappings and packages clearly labeled with the manufacturer's name, brand name, size, dye lot number, and related information. Remove materials from packaging and store them in a clean, dry, well ventilated area ([100 percent outside air supply, minimum of 1.5 air changes per hour, and no recirculation](#)), protected from damage, soiling, and moisture, and [strong contaminant sources and residues](#), and maintain at a temperature above [16 degrees C 60 degrees F](#) for 2 days prior to installation. [Carpet or carpet tiles shall not be stored with materials which have high emissions of volatile organic compounds \(VOCs\) or other contaminants, including \[_____\]](#). Do not store carpet near materials that may offgas or emit harmful fumes, such as kerosene heaters, fresh paint, or adhesives.

1.6 ENVIRONMENTAL REQUIREMENTS

Maintain areas in which carpeting is to be installed at a temperature above [16 degrees C 60 degrees F](#) and below [32 degrees C 90 degrees F](#) for 2 days before installation, during installation, and for 2 days after installation. Provide temporary ventilation during work of this section. Maintain a minimum temperature of [13 degrees C 55 degrees F](#) thereafter for the duration of the contract. Do not permit traffic or movement of furniture or equipment in carpeted area for 24 hours after installation. Complete other work which would damage the carpet prior to installation of carpet.

1.7 SCHEDULING

Install carpet systems after the installation and ventilation period of materials or finishes which have high short-term emissions of VOCs, formaldehyde, particulates, or other air-borne compounds which may be adsorbed by or settle on the carpet tiles, including [\[_____\]](#).

1.8 WARRANTY

Provide manufacturer's standard performance guarantees or warranties including minimum ten (10) year wear warranty, two (2) year material and workmanship and ten (10) year tuft bind and delamination.

1.9 MAINTENANCE

1.9.1 Extra Materials

Provide extra material from same dye lot consisting of [full width continuous broadloom] [and] [uncut carpet tiles] for future maintenance. Provide a minimum of [_____] percent of total square meters square yards of each carpet type, pattern, and color.

1.9.2 Maintenance Service

NOTE: Maintenance agreements are standard practice in the building industry. Under a green lease, when the customer no longer requires the use of the particular product or requires an updated model, the manufacturer is obligated to reclaim it and refurbish it or disassemble it for recycling as appropriate.

Collect information from the manufacturer about [maintenance agreement] [green lease] options, and submit to Contracting Officer. Service shall reclaim materials for recycling and/or reuse. Service shall not landfill or burn reclaimed materials. When such a service is not available, local recyclers shall be sought after to reclaim the materials.

PART 2 PRODUCTS

2.1 CARPET

NOTE: Color, texture, and pattern must be in accordance with Section 09 06 90 COLOR SCHEDULE or must be indicated on the drawings.

If more than one carpet type is required for a project, a separate paragraph will be used for each carpet type. Each carpet type will be designated with a letter or number symbol. Use the same designations to key carpets to locations on the drawings and in Section 09 06 90 COLOR SCHEDULE.

ADA Requirements: If carpet is used as a floor, then it shall be securely attached; have a firm cushion, pad, or backing, or no cushion or pad; and have a level loop, textured loop, level cut pile, or level cut/uncut pile texture. The maximum thickness shall be 13 mm (1/2 in). Exposed edges of carpet shall be fastened to floor surfaces and have trim along the entire length of the exposed edge.

Consider the prospective use of the carpet, texture

retention, soil hiding, cleanability, abrasion resistance, desired appearance, cost and other factors applicable to the project when choosing pile fiber.

Nylon fiber is typically abrasion resistant and durable in all pile configurations using filament fiber, has good stain removal characteristics, and is recommended for commercial installations.

Polyethylene terephthalate (PET) recycled polyester fiber has permanent fade resistance, is permanently colorfast, has a permanent stain resistance which is higher than other type fibers, is impervious to harsh chemicals, and has the lowest static buildup. PET type polyester carpet, once crushed under continued high pressure, is less likely than nylon carpet to rebound. PET carpet is not recommended for severe and moderate wear level areas and should be limited to light wear areas.

Wool is a natural fiber, which is inherently flame resistant, forming a char that will neither melt nor drip. Wool is also rapidly renewable and resilient, and due to the scaly character of its fiber it scatters optical light, thus reducing soiling visibility. Consider wool for commercial installations; it is highly recommended for shipboard use due to it being inherently flame resistant.

Wool, cotton, jute, hemp and sisal carpets may not meet accepted performance requirements of commercial carpet. Designer must verify suitability, availability and adequate competition before specifying these products.

Flexible and modular components, like carpet tile, reduce the labor and materials costs related to operations and maintenance, churn, and future renovations.

PET carpet is an EPA designated product for recycled content. Nylon carpet is a proposed EPA designated product for recycled content. Polyurethane, jute, rubber, and synthetic fiber carpet cushions are EPA designated products for recycled content. See Section 01 62 35 RECYCLED/RECOVERED MATERIALS and include minimum recycled content unless designer determines that justification for non-use exists. EPA recycled content requirements must be addressed in all projects regardless of optional LEED/other recycled content goals. Designer must verify suitability, availability and adequate competition (including verification of bracketed percentages included in this guide specification) before specifying products meeting EPA minimum recycled content.

Use of materials with recycled content, calculated on the basis of post-industrial and post-consumer percentage content, contributes to the following LEED credit: MR4. Coordinate with Section 01 33 29 LEED(tm) DOCUMENTATION. Designer must verify suitability, availability and adequate competition (including verification of bracketed percentages included in this guide specification) before specifying product recycled content requirements. Use second option if Contractor is choosing recycled content products in accordance with Section 01 33 29 LEED(tm) DOCUMENTATION. Army projects will specify recycled content exceeding EPA requirements only if pursuing this LEED credit.

The 2002 Farm Bill - Section 9002, Federal Procurement of Biobased Products, requires each Federal Agency to develop a procurement program which will ensure that items composed of biobased products will be purchased to the maximum extent practical and which is consistent with applicable provisions of Federal procurement law. Use of biobased materials that are rapidly renewable (including wool and cotton) contributes to the following LEED credit: MR6. Coordinate with Section 01 33 29 LEED(tm) DOCUMENTATION.

Continuous dye process uses two to three times less water than batch dyeing during manufacture.

Furnish first quality carpet; free of visual blemishes, streaks, poorly dyed areas, fuzzing of pile yarn, spots or stains, and other physical and manufacturing defects. Provide carpet materials and treatments as reasonably nonallergenic and free of other recognized health hazards. Provide a static control construction on all grade carpets which gives adequate durability and performance. Provide the Carpet and Rug Institute (CRI) Indoor Air Quality (IAQ) Label. Carpet type bearing the label will indicate that carpet has been tested and meets the criteria of the CRI Green Label Requirements for Indoor Air Quality Test Criteria. [Carpet tiles shall have Carpet Component Identification Codes as established by the CRI for future recycling. The labels shall be permanently printed or attached to the carpet backing. The codes shall identify, at minimum, the carpet's face fiber, primary backing, and secondary backing.]

2.1.1.1 Polyester Carpet Face Fibers

For informational purposes, a list of sources known to recycle polyester carpet face fibers is provided below. Note that the Contractor is not limited to these sources. An approved product from other sources may be submitted for the Government's approval during construction. Acceptable manufacturer's include, but are not limited to:

Bretlin, Inc.
LaFayette, Georgia

Central Vermont Carpet
Barre, Vermont

Environmental Building Supplies
Portland, Oregon

Image Industries
Armuchee, Georgia

Martin Color-FI
Edgefield, South Carolina

Talisman Mills, Inc.
Mequon, Wisconsin

2.1.2 Physical Characteristics

2.1.2.1 [Broadloom][Modular Tile][Entrance] Carpet [A]

**NOTE: Delete subparagraphs not required or
applicable**

Carpet shall comply with the following:

a. Carpet Construction: [Tufted] [Woven] [Bonded] [Needlebond]
[Needle Felt] [_____].

b. Type: [Broadloom [3.6] [1.8] m [12] [6] feet minimum usable carpet
width [with exception of corridors] [and] [stairs] [_____].][Modular
tile [450 by 450] [500 by 500] [600 by 600] mm square [18 by 18] [20 by
20] [24 by 24] inch square with 0.15 percent growth/shrink rate in
accordance with ISO 2551.] [Entrance [450 by 450] [_____] mm [18 by
18] [_____] inch square [3.6] [1.8] m [12] [6] feet width [_____] mat
size.]

c. Pile Type: [Level-loop] [Multilevel loop] [Cut and loop] [Frieze]
[Cut pile] [Random sheared] [Level tip shear].

d. Pile Fiber: Commercial 100 percent branded (federally registered
trademark) [[nylon continuous filament] [nylon staple, minimum [5] [10]
[_____] percent post-consumer or [20] [40] [_____] percent
post-industrial recycled content with 25 percent minimum total combined
recycled content] [wool with Woolmark certification] [wool blend with
Wool Bureau certification] [cotton] [jute] [sisal] [hemp] [polylactic
acid (PLA)], minimum [85] [95] [_____] percent biobased materials.
Chemical treatments, including moth treatment, are [permitted with
written approval from the Contracting Officer] [not permitted]]
[polyethylene terephthalate (PET) 100 percent post-consumer recycled
fiber] [polypropylene] [_____]. [See Section 01 33 29 LEED(tm)
DOCUMENTATION for cumulative total recycled content requirements.
Carpet pile fiber may contain post-consumer or post-industrial recycled
content.]

e. Yarn Ply: Minimum [2] [_____].

f. Gauge or Pitch: Minimum [_____] mm inch in accordance with
ASTM D 5793.

g. Stitches or Rows/Wires: Minimum [_____] per square meter square
inch.

NOTE: Yarn weight must meet project criteria and requirements.

h. Finished Pile Yarn Weight: Minimum [_____] kg/square meter ounces per square yard. This does not include weight of backings. Determine weight in accordance with ASTM D 5848.

i. Pile Density: Minimum [_____].

j. Dye Method: [Solution dyed] [Stock dyed] [Yarn (or Skein) dyed] [Piece dyed] [Space dye] [Continuous dye].

k. Backing Materials: Provide primary backing materials like [those customarily used and accepted by the trade for each type of carpet] [polypropylene] [synthetic material] [synthetic material] [rubber] [jute] [cotton] [_____]. Provide secondary backing to suit project requirements of [those customarily used and accepted by the trade for each type of carpet, except when a special unitary back designed for gluedown is needed] [fabric or polymer backing attached with thin layer of styrene butadiene] [vinyl (PVC) backing available with dry adhesive, minimal offgassing] [natural latex] [styrene butadiene with the thinnest layer of styrene butadiene backing available] [non-chlorinated polyvinyl butyral (PVB)]. Backing system shall [contain an overall minimum of [85] [95] [_____] percent natural latex, jute, or cotton] [, and] [contain a minimum of [5] [10] [_____] percent post-consumer recycled content, or minimum [20] [40] [_____] percent post-industrial recycled content]. [See Section 01 33 29 LEED(tm) DOCUMENTATION for cumulative total recycled content requirements. Carpet backing may contain post-consumer or post-industrial recycled content.].

l. Attached Cushion: Provide an attached cushion [[chemically frothed polyurethane with minimum weight of 0.610 kg/sq. m 18 oz/sq. yard, minimum density of 176 kg/cubic m 11 lb/cubic foot] [mechanically frothed polyurethane with minimum weight of 0.745 kg/sq. m 22 oz/sq. yard, minimum density of 224 kg/cubic m 14 lb/cubic foot, minimum thickness of 2.5 mm 0.100 inch, and maximum compression resistance of 34.5 kPa 5 psi, and compression set of 15 percent in accordance with ASTM D 3676], minimum [15] [50] percent post-consumer recycled content] [[ethylene vinyl acetate (EVA)] [polyvinyl chloride (PVC)] with minimum weight of 0.95 kg/sq. m 28 oz/sq. yard, minimum thickness of 3.8 mm 0.150 inch, and minimum density of 240.3 kg/cubic m 15 lb/cubic foot and a maximum compression set of 15 percent in accordance with ASTM D 1667, minimum [100] [_____] percent recycled content] [100 percent recycled urethane foam] [jute with minimum [40] [_____] percent post-consumer burlap] [wool or cattle hair needled to jute backing containing a minimum of [40] [_____] percent post-consumer burlap] [felt backing made from cattle hair and jute containing a minimum of [40] [_____] percent post-consumer burlap] [rubber with minimum [60] [90] [_____] percent post-consumer recycled content bonded with styrene butadiene]. Do not exceed the maximum ash content of 50 percent when tested in accordance with ASTM D 297. Pass the accelerated aging test in accordance with [ASTM D 3676] [ASTM D 1667] for the cushion. [See Section 01 33 29 LEED(tm) DOCUMENTATION for cumulative total recycled content requirements. Carpet cushion may contain post-consumer or post-industrial recycled content.]

NOTE: Consider selecting multiple recycle effort options to prevent the specification from being proprietary as appropriate on a project per project basis.

m. Recycle Efforts: [Use of polyester carpet fiber face, polyethylene terephthalate resin] [Use of carpet cushion containing recovered materials] [Use of nylon carpet with backing containing recovered carpet] [Use of nylon fiber with 25 per cent minimum recycled content] [Use of reconditioned nylon carpet].

2.1.2.2 [Broadloom][Modular Tile][Entrance] Carpet [B][_____]

Comply with the following carpet requirements:

a. Carpet Construction: [Tufted] [Woven] [Bonded] [Needlebond] [Needle Felt] [_____].

b. Type: [Broadloom [3.6] [1.8] m [12] [6] feet minimum usable carpet width [with exception of corridors] [and] [stairs] [_____].][Modular tile [450 by 450] [500 by 500] [600 by 600] mm square [18 by 18] [20 by 20] [24 by 24] inches square with 0.15 percent growth/shrink rate in accordance with ISO 2551.] [Entrance [450 by 450] [_____] mm [18 by 18] [_____] inch square [3.6] [1.8] m [12] [6] feet width [_____] mat size.]

c. Pile Type: [Level-loop] [Multilevel loop] [Cut and loop] [Frieze] [Cut pile] [Random sheared] [Level tip shear].

d. Pile Fiber: Commercial 100 percent branded (federally registered trademark) [[nylon continuous filament] [nylon staple], minimum [5] [10] [_____] percent post-consumer or [20] [40] [_____] percent post-industrial recycled content with 25 percent minimum total combined recycled content] [[wool with Woolmark certification] [wool blend with Wool Bureau certification] [cotton] [jute] [sisal] [hemp] [polylactic acid (PLA)], minimum [85] [95] [_____] percent biobased materials. Chemical treatments, including moth treatment, are [permitted with written approval from the Government] [not permitted]] [polyethylene terephthalate (PET) 100 percent post-consumer recycled fiber] [polypropylene] [_____]. [See Section 01 33 29 LEED(tm) DOCUMENTATION for cumulative total recycled content requirements. Carpet pile fiber may contain post-consumer or post-industrial recycled content.]

e. Yarn Ply: Minimum [2] [_____] in accordance with ASTM D 1423.

f. Gauge or Pitch: Minimum [_____] mm inch in accordance with ASTM D 5793.

g. Stitches or Rows/Wires: Minimum [_____] per square meter per square inch.

h. Finished Pile Yarn Weight: Minimum [_____] kg/square meter ounces per square yard. This does not include weight of backings. Determine weight in accordance with ASTM D 5848.

i. Pile Density: Minimum [_____].

j. Dye Method: [Solution dyed] [Stock dyed] [Yarn (or Skein) dyed]
[Piece dyed] [Space dye] [Continuous dye].

k. Backing Materials: Provide primary backing materials like [those customarily used and accepted by the trade for each type of carpet] [polypropylene] [synthetic material] [synthetic material] [rubber] [jute] [cotton] [_____]. Provide secondary backing to suit project requirements of [those customarily used and accepted by the trade for each type of carpet, except when a special unitary back designed for gluedown is needed][fabric or polymer backing attached with thin layer of styrene butadiene] [vinyl (PVC) backing available with dry adhesive, minimal offgassing] [natural latex] [styrene butadiene with the thinnest layer of styrene butadiene backing available] [non-chlorinated polyvinyl butyral (PVB)]. Backing system shall [contain an overall minimum of [85] [95] [_____] percent natural latex, jute, or cotton] [, and] [contain a minimum of [5] [10] [_____] percent post-consumer recycled content, or minimum [20] [40] [_____] percent post-industrial recycled content].[See Section 01 33 29 LEED(tm) DOCUMENTATION for cumulative total recycled content requirements. Carpet backing may contain post-consumer or post-industrial recycled content].

l. Attached Cushion: Provide an attached cushion [[chemically frothed polyurethane with minimum weight of 0.610 kg/sq. m 18 oz/sq. yard, minimum density of 176 kg/cubic m 11 lb/cubic foot] [mechanically frothed polyurethane with minimum weight of 0.745 kg/sq. m 22 oz/sq. yard, minimum density of 224 kg/cubic m 14 lb/cubic foot, minimum thickness of 2.5 mm 0.100 inch, and maximum compression resistance of 34.5 kPa 5 psi, and compression set of 15 percent in accordance with ASTM D 3676], minimum [15] [50] percent post-consumer recycled content] [[ethylene vinyl acetate (EVA)] [polyvinyl chloride (PVC)] with minimum weight of 0.95 kg/sq. m 28 oz/sq. yard, minimum thickness of 3.8 mm 0.150 inch, and minimum density of 240.3 kg/cubic m 15 lb/cubic foot and a maximum compression set of 15 percent in accordance with ASTM D 1667, minimum [100] [_____] percent recycled content] [100 percent recycled urethane foam] [jute with minimum [40] [_____] percent post-consumer burlap] [wool or cattle hair needled to jute backing containing a minimum of [40] [_____] percent post-consumer burlap] [felt backing made from cattle hair and jute containing a minimum of [40] [_____] percent post-consumer burlap] [rubber with minimum [60] [90] [_____] percent post-consumer recycled content bonded with styrene butadiene]. Do not exceed the maximum ash content of 50 percent when tested in accordance with ASTM D 297. Pass accelerated aging test in accordance with [ASTM D 3676] [ASTM D 1667] for the cushion. [See Section 01 33 29 LEED(tm) DOCUMENTATION for cumulative total recycled content requirements. Carpet cushion may contain post-consumer or post-industrial recycled content.]

m. Recycle Efforts: [Use of polyester carpet fiber face, polyethylene terephthalate resin] [Use of carpet cushion containing recovered materials] [Use of nylon carpet with backing containing recovered carpet] [Use of nylon fiber with 25 per cent minimum recycled content] [Use of reconditioned nylon carpet].

2.1.2.3 [Broadloom][Modular Tile][Entrance] Carpet [C] [_____]

Comply with the following carpet requirements:

a. Carpet Construction: [Tufted] [Woven] [Bonded] [Needlebond]
[Needle Felt] [_____].

b. Type: [Broadloom [3.6] [1.8] m [12] [6] feet minimum usable carpet width [with exception of corridors] [and] [stairs] [____].][Modular tile [450 by 450] [500 by 500] [600 by 600] mm square [18 by 18] [20 by 20] [24 by 24] inch square with 0.15 percent growth/shrink rate in accordance with ISO 2551.] [Entrance [450 by 450] [____] mm [18 by 18] [____] inch square [3.6] [1.8] m [12] [6] feet width [____] mat size.]

c. Pile Type: [Level-loop] [Multilevel loop] [Cut and loop] [Frieze] [Cut pile] [Random sheared] [Level tip shear].

d. Pile Fiber: Commercial 100 percent branded (federally registered trademark) [[nylon continuous filament] [nylon staple], minimum [5] [10] [____] percent post-consumer or [20] [40] [____] percent post-industrial recycled content with 25 percent minimum total combined recycled content] [[wool with Woolmark certification] [wool blend with Wool Bureau certification] [cotton] [jute] [sisal] [hemp] [polylactic acid (PLA)], minimum [85] [95] [____] percent biobased materials. Chemical treatments, including moth treatment, are [permitted with written approval from the Government] [not permitted]] [polyethylene terephthalate (PET) 100 percent post-consumer recycled fiber] [polypropylene] [____]. [See Section 01 33 29 LEED(tm) DOCUMENTATION for cumulative total recycled content requirements. Carpet pile fiber may contain post-consumer or post-industrial recycled content.]

e. Yarn Ply: Minimum [2] [____] in accordance with ASTM D 1423.

f. Gauge or Pitch: Minimum [____] mm inch in accordance with ASTM D 5793.

g. Stitches or Rows/Wires: Minimum [____] per square meter square inch.

h. Finished Pile Yarn Weight: Minimum [____] kg per square meter ounces per square yard. This does not include weight of backings. Determine weight in accordance with ASTM D 5848.

i. Pile Density: Minimum [____].

j. Dye Method: [Solution dyed] [Stock dyed] [Yarn (or Skein) dyed] [Piece dyed] [Space dye] [Continuous dye].

k. Backing Materials: Provide primary backing materials of [those customarily used and accepted by the trade for each type of carpet] [polypropylene] [synthetic material] [synthetic material] [rubber] [jute] [cotton] [____]. Provide secondary backing to suit project requirements of [those customarily used and accepted by the trade for each type of carpet, except when a special unitary back designed for gluedown is needed] [fabric or polymer backing attached with thin layer of styrene butadiene] [vinyl (PVC) backing available with dry adhesive, minimal offgassing] [natural latex] [styrene butadiene with the thinnest layer of styrene butadiene backing available] [non-chlorinated polyvinyl butyral (PVB)]. Backing system shall [contain an overall minimum of [85] [95] [____] percent natural latex, jute, or cotton] [, and] [contain a minimum of [5] [10] [____] percent post-consumer recycled content, or minimum [20] [40] [____] percent post-industrial recycled content].[See Section 01 33 29 LEED(tm) DOCUMENTATION for cumulative total recycled content requirements. Carpet backing may

contain post-consumer or post-industrial recycled content].

l. Attached Cushion: Provide an attached cushion [[chemically frothed polyurethane with minimum weight of 0.610 kg/sq. m 18 oz/sq. yard, minimum density of 176 kg/cubic m 11 lb/cubic foot] [mechanically frothed polyurethane with minimum weight of 0.745 kg/sq. m 22 oz/sq. yard, minimum density of 224 kg/cubic m 14 lb/cubic foot, minimum thickness of 2.5 mm 0.100 inch, and maximum compression resistance of 34.5 kPa 5 psi, and compression set of 15 percent in accordance with ASTM D 3676], minimum [15] [50] percent post-consumer recycled content] [[ethylene vinyl acetate (EVA)] [polyvinyl chloride (PVC)] with minimum weight of 0.95 kg/sq. m 28 oz/sq. yard, minimum thickness of 3.8 mm 0.150 inch, and minimum density of 240.3 kg/cubic m 15 lb/cubic foot and a maximum compression set of 15 percent in accordance with ASTM D 1667, minimum [100] [_____] percent recycled content] [100 percent recycled urethane foam] [jute with minimum [40] [_____] percent post-consumer burlap] [wool or cattle hair needled to jute backing containing a minimum of [40] [_____] percent post-consumer burlap] [felt backing made from cattle hair and jute containing a minimum of [40] [_____] percent post-consumer burlap] [rubber with minimum [60] [90] [_____] percent post-consumer recycled content bonded with styrene butadiene]. Do not exceed the maximum ash content of 50 percent when tested in accordance with ASTM D 297. Pass the cushion accelerated aging test in accordance with [ASTM D 3676] [ASTM D 1667] for the cushion. [See Section 01 33 29 LEED(tm) DOCUMENTATION for cumulative total recycled content requirements. Carpet cushion may contain post-consumer or post-industrial recycled content.]

m. Recycle Efforts: [Use of polyester carpet fiber face, polyethylene terephthalate resin] [Use of carpet cushion containing recovered materials] [Use of nylon carpet with backing containing recovered carpet] [Use of nylon fiber with 25 per cent minimum recycled content] [Use of reconditioned nylon carpet].

2.2 PERFORMANCE REQUIREMENTS

NOTE: Use the chart below to identify the recommended minimum use classification that corresponds to the end-use application. Record the minimum Appearance Retention Rating, or ARR, in subparagraph a.

END-USE CLASSIFICATION CHART

<i>End-Use Application</i>	<i>Minimum Use Classification</i>
BANKS/CREDIT UNIONS	
Entrances and customer banking space	Severe
Open office space, private offices	Heavy
BOWLING ALLEYS	
Concourses (excluding food service, working and storage areas)	Severe
CHAPELS AND OTHER RELIGIOUS FACILITIES	
Educational wing, worship areas	Heavy
CHILD CARE CENTERS	
All areas	Severe

CLUBS		
All areas		Severe
HOUSING		
<i>Single Family</i>		
Family rooms,living rooms,dining rooms		Heavy
Sleeping rooms		Moderate
Combination living/sleeping rooms		Heavy
<i>Multi-Family</i>		
Common areas (lobbies,lounges)		Severe
Corridors		Severe
Family rooms,living rooms,dining rooms		Heavy
Multi-purpose areas		Severe
Sleeping rooms		Moderate
Combination living/sleeping rooms		Heavy
LABORATORY/RESEARCH FACILITIES		
Computer work areas		Severe
Closed private office		Heavy
Open work areas, dry labs		Severe
LIBRARIES		
Conference rooms, corridors		Severe
LODGING FACILITIES/DORMITORIES		
Conference rooms		Severe
Combination living/sleeping rooms		Severe
Dining facilities		Severe
Offices		Heavy
Public areas(lobbies,lounges,TV rooms, day rooms)		Severe
Sleeping rooms		Heavy
MEDICAL FACILITIES		
(excluding patient treatment areas)		
Assisted living areas,classrooms		Heavy
Chapels, consultation rooms		Moderate
Clinical waiting areas (outpatient, pharmacy,ancillary zone only)		Severe
Corridors,dining areas,elevators		Severe
Entrance areas (entry mats should be used)		Severe
Libraries		Moderate
Lobbies		Severe
Lounges		Heavy
Offices (private,semi-private)		Severe
Patient rooms		Heavy
Playrooms (OB/GYN,Pediatric clinics)		Severe
Staff sleeping and watch areas		Moderate
MILITARY HOUSING		
<i>Family Housing</i>		
Flag		Moderate
Single unit		Heavy
Multi-unit (corridors,sleeping/living rooms)		Heavy
Multi-unit (public areas,lobbies,lounges)		Severe

<i>Bachelor Officer Quarters</i>		
Sleeping/living rooms		Moderate
Public areas (lobbies,lounges)		Severe
Dining Facilities		Severe
Offices		Moderate
<i>Bachelor Enlisted Quarters</i>		
Sleeping/living rooms		Severe
Public areas (lobbies,lounges)		Severe
Dining Facilities		Severe
Offices		Heavy
MUSIC OR DRAMA CENTERS		
All areas		Severe
OFFICES (including administrative areas)		
Closed private offices		Heavy
Corridors		Severe
Conference rooms		Heavy
Open plan office (circulation areas)		Severe
Open plan office (work areas)		Heavy
RESTAURANTS (excluding work spaces)		
Dining areas		Severe
Cafeteria-type dining areas,enlisted canteens		Severe
Office areas		Heavy
RETAIL STORES		
Offices		Heavy
Restaurant and cafeteria dining areas		Severe
Sales areas		Severe
THEATERS		
All areas		Severe
TRAINING BUILDINGS/EDUCATIONAL FACILITIES (including dependents' schools)		
Classrooms,corridors		Severe
Staff/administration offices		Heavy
YOUTH CENTERS		
All areas		Severe

These classifications are based on typical usage.
Use a higher classification if traffic exposure is
expected to be greater than usual.

a. ARR (Appearance Retention Rating): Test carpet with the minimum
[2.5-3.0 (Moderate)] [3.0-3.5 (Heavy)] [3.5-4.0 (Severe)] ARR in
accordance with either the [ASTM D 5252](#)(Hexapod) or [ASTM D 5417](#)
(Vettermann) test methods using the number of cycles for short and long
term tests as specified.

NOTE: Specify static control only when required to
meet project requirements. Installations for

critical areas such as computer rooms will use the 2.0 kV requirements. Static protected carpets for most commercial installations are normally rated at 3.5 kV.

b. Static Control: Provide static control to permanently regulate static buildup to less than [3.5] [2.0] [_____] kV when tested at 20 percent relative humidity and 21 degrees C 70 degrees F in accordance with AATCC 134.

NOTE: Choice of critical radiant flux level as it applies to building type and area of application will be made in accordance with the latest edition of MIL-HDBK 1008B or NFPA 101. Wherever the use of Class II (0.22) watts finish is required, Class I (0.45) watts will be permitted.

Critical radiant flux will be a minimum average of 0.45 watts when used in corridors in bachelor enlisted quarters, bachelor officer quarters, hospital, child care centers, temporary lodging facilities, and new construction detention and correctional facilities. Generally the critical radiant flux will be a minimum of 0.22 for corridors of other type facilities. Where an approved automatic sprinkler system is installed, Class II interior floor finish may be used where Class I floor finish is required, and where Class II is required, no critical radiant flux rating is required. Omit paragraph if not applicable.

c. Flammability and Critical Radiant Flux Requirements: Comply carpet with 16 CFR 1630. Provide carpet in corridors and exits with a minimum average critical radiant flux of [0.22] [0.45] watts per square centimeter when tested in accordance with ASTM E 648.

NOTE: For most facilities, the 45 N (10 pound) tuft bind for loop pile and 13 N (3 pound) for cut pile are adequate. For child care centers, youth centers, and dependents' schools, specify 53 N (12 pound) tuft bind for loop pile because of the increased potential for loop pull in the course of children's activities. Although increased wear by itself is not the primary factor in damage due to lack of tuft bind, consider 53 N (12 pound) tuft bind for any severe wear application where loop pile might be vulnerable to snagging.

d. Tuft Bind: Provide tuft bind force required to pull a tuft or loop free from carpet backing with a minimum [40 N 10 pound average force for loop pile] [18 N 3 pound average force for cut pile].

e. Colorfastness to Crocking: Comply dry and wet crocking with AATCC 165 and with a Class 4 minimum rating on the AATCC Color

Transference Chart for all colors.

f. Colorfastness to Light: Comply colorfastness to light with **AATCC 16**, Test Option E "Water-Cooled Xenon-Arc Lamp, Continuous Light" and with a minimum 4 gray scale rating after 40 hours.

**NOTE: Include the following test when specifying
carpet constructed of yarn dyed fibers.**

g. Colorfastness to Water: Comply colorfastness to water with **AATCC 107** and with a minimum 4.0 gray scale rating and a minimum 4.0 transfer scale rating.

h. Delamination Strength: Provide delamination strength for tufted carpet with a secondary back of minimum **440 N/m 2.5 lbs/inch**.

**NOTE: The following will be included when required
for a specific use such as child care, dining
facilities or hospitals.**

i. Antimicrobial: Nontoxic antimicrobial treatment in accordance with **AATCC 174** Part I (qualitative), guaranteed by the carpet manufacturer to last the life of the carpet.

2.3 **CARPET PADS**

**NOTE: Carpet cushions is one of the materials
listed in the EPA's Comprehensive Procurement
Guidelines (CPG)**
**(<http://www.epa.gov/cpg/>). If the
Architect/Engineer determines that use of certain
materials meeting the CPG content standards and
guidelines would result in inadequate competition,
do not meet quality/ performance specifications, are
available at an unreasonable price or are not
available within a reasonable time frame, the
Architect/Engineer may submit written justification
and supporting documentation for not procuring
designated items containing recovered material.
Written justification may be submitted on a Request
for Waiver Form to the NASA Environmental Program
Manager for approval. The Request for Waiver Form
is located in the NASA Procedures and Guidelines
(NPG 8830.1) (<http://nodis3.gsfc.nasa.gov>).**

Provide a sponge rubber pad, **1800-gram 64-ounce** flame spread in accordance with **NFPA 253**.

2.3.1 **Carpet Cushion**

For informational purposes, a list of sources known to recycle carpet cushions is provided below. Note that the Contractor is not limited to these sources. An approved product from other sources may be submitted for

the Government's approval during construction. Acceptable manufacturer's include, but are not limited to:

Collins & Aikman Floor Coverings
Dalton, Georgia

Chris Craft International Products
Waterford, New York

Carpenter Company
Richmond, Virginia

Dixie Manufacturing Corporation
Norfolk, Virginia

2.3.2 Recycling Requirements

Provide [bonded polyurethane carpet cushions be made from 15-50 percent of postconsumer content and 15-50 percent] [rubber carpet cushions with recycled tire rubber and be made from 60-90 percent of postconsumer content and 60-90 percent] [synthetic carpet cushions with recycled carpet fabrication scrap and be made from 100 percent] of total recovered materials content.

2.4 CARPET MOLDINGS

Install carpet moldings, either vinyl or aluminum, where floor covering material changes or carpet edge does not abut a vertical surface.

2.5 BASE

Conform to **FS SS-W-40** for vinyl base. Provide minimum overall thickness of base not less than **3 mm 0.125 inch**, color as selected from manufacturer's full line. [Straight] [Cove] style, **[100] [150] mm [4] [6] inch** high. Furnish base in rolls not less than **30 meter 96 feet** long. Premold corners with wings not less than **50 mm 2 inch** long.

2.6 ADHESIVES AND CONCRETE PRIMER

NOTE: Using low-VOC products contributes to the following LEED credit: EQ4. Coordinate with Section 01 33 29 LEED(tm) DOCUMENTATION. Designer must verify availability and adequate competition (including verification of bracketed VOCs included in this guide specification) before specifying product VOC requirements. Army projects will specify bracketed LEED VOC option only if pursuing this LEED credit.

Adhesives and concrete primers shall comply with applicable regulations regarding toxic and hazardous materials.[Use [peel and stick dry adhesive] [wet adhesive] with a maximum VOC content of 50 grams/liter.] Provide waterproof, nonflammable, and nonstaining adhesives and concrete primers for carpet installation to meet local air-quality standards, and as required by the carpet manufacturer. Provide release adhesive for modular tile carpet as recommended by the carpet manufacturer. Provide adhesives flashpoint of minimum **60 degrees C 140 degrees F** in accordance with

ASTM D 3278.

2.7 MOLDING

Provide a [hammered surface aluminum molding, pinless clamp-down type, designed for the type of carpet being installed. Provide [natural color anodized] [prefinished color [____]] finish. Provide a floor flange of a minimum 38 mm 1-1/2 inch wide and face a minimum 16 mm 5/8 inch wide.] [heavy-duty vinyl molding designed for the type of carpet being installed. Provide floor flange of a minimum 50 mm 2 inches wide. Provide [____] color].

2.8 TAPE

Provide tape for seams as recommended by the carpet manufacturer for the type of seam used in installation. Any seam sealant shall have a maximum VOC content of 50 grams/liter. Do not use sealants that contain 1,1,1-trichloroethane or toluene.

2.9 COLOR, TEXTURE, AND PATTERN

Provide color, texture, and pattern [in accordance with Section 09 06 90 COLOR SCHEDULE] [____].

PART 3 EXECUTION

3.1 SURFACE PREPARATION

Do not install carpet on surfaces that are unsuitable and will prevent a proper installation. Repair holes, cracks, depressions, or rough areas using material recommended by the carpet or adhesive manufacturer. Free floor of any foreign materials and sweep clean. Before beginning work, test subfloor with glue and carpet to determine "open time" and bond.

3.2 MOISTURE AND ALKALINITY TESTS

Test concrete slab for moisture content and excessive alkalinity in accordance with CRI 104.

3.3 PREPARATION OF CONCRETE SUBFLOOR

NOTE: Designer must coordinate need for sealing of concrete slab with project requirements such as wet conditions which might occur in hospital care.

Do not commence installation of the carpeting until concrete substrate is at least 90 days old. Prepare the concrete surfaces in accordance with instructions of the carpet manufacturer. Match carpet, when required, and adhesives to prevent off-gassing to a type of curing compounds, leveling agents, and concrete sealer.

3.4 INSTALLATION

Isolate area of installation from rest of building. Perform all work by installers who are CFI certified (International Certified Floorcovering Installer Association), or manufacturer's approved installers. Conduct installation in accordance with the manufacturer's printed instructions and

CRI 104. Protect edges of carpet meeting hard surface flooring with molding and install in accordance with the molding manufacturer's printed instructions. **Mothproofing for wool carpets shall use autofoam mothproofing system.** Follow ventilation, personal protection, and other safety precautions recommended by the adhesive manufacturer. Continue ventilation during installation and for at least 72 hours following installation.

3.4.1 Broadloom Installation

Install broadloom carpet [direct glue down] [pre-applied adhesive glue down] and smooth, uniform, and secure, with a minimum of seams. Apply regular, unnoticeable, and treated seams with a seam adhesive. Run side seams toward the light, where practical, and where such layout does not increase the number of seams. Install breadths parallel, with carpet pile in the same direction. Match patterns accurately. Neatly cut and fit cutouts, at door jambs, columns and ducts securely. Locate seams at doorways parallel to and centered directly under doors. Do not make seams perpendicular to doors or at pivot points. Provide seams at changes in directions of corridors to follow the wall line parallel to the carpet direction. Lay the carpet lengthwise down the corridors with widths less than 1.8 m 6 feet.

3.4.2 Modular Tile Installation

Install modular tiles with [permanent vinyl-compatible] [release] [_____] adhesive and snugly jointed together. Lay tiles in [the same direction] [an alternating pattern] with accessibility to the subfloor where required.

3.4.3 Entrance Carpet Installation

Install [tiles with [[permanent vinyl-compatible]] [[release]] adhesive and shall be snugly jointed together. Lay tiles in [[the same direction]] [[an alternating pattern]]. [Install roll goods [[direct glue down]] [pre-applied adhesive glue down]] and smooth, uniform, and secure, with a minimum of seams. Prepare regular, unnoticeable, and treated seams with a seam adhesive. Install breadths parallel, with carpet pile in the same direction. Match patterns accurately. Neatly cut and fit, securely, cutouts at door jambs, columns, and ducts. Locate seams at doorways parallel to and centered directly under doors. Do not make seams perpendicular to doors or at pivot points.] [Cut mats to specified size and finish them with a tapered vinyl edge that is glued and sewn on.]

[3.4.4 Stretch-in Installation

NOTE: Installation with tack strips (stretch in method) over pads can avoid potential adhesive interaction with carpet backing. It is appropriate for residential and hospitality settings, in which rooms are relatively small and separate cushion is used; but not feasible in large, open spaces. If including this paragraph, provide appropriate product requirement paragraphs for strip and nails.

Provide carpet anchors wherever carpeting abuts vertical surfaces. Install tackless carpet stripping by nailing. Place carpet cushion face-up, as recommended by cushion manufacturer, over entire floor area to be carpeted

with joints butted. Do not use adhesives to attach carpet, pad, or substrate. Comply with carpet manufacturer's instructions for installation. Attach rubber or metal edge strip to substrate with adhesive.

]3.5 CLEANING AND PROTECTION

3.5.1 Cleaning

As specified in Section 01 78 00 CLOSEOUT SUBMITTALS. After installation of the carpet, remove debris, scraps, and other foreign matter. Remove soiled spots and adhesive from the face of the carpet with appropriate spot remover. Cut off and remove protruding face yarn. Vacuum carpet clean with a high-efficiency particulate air (HEPA) filtration vacuum.

3.5.2 Protection

Protect the installed carpet from soiling and damage with heavy, reinforced, nonstaining kraft paper, plywood, or hardboard sheets. Lap and secure edges of kraft paper protection to provide a continuous cover. Restrict traffic for at least 48 hours. Remove protective covering when directed by the Contracting Officer.

3.6 REMNANTS

NOTE: Take-back programs refer to programs in which the product manufacturer "takes-back" scrap material and/or packaging associated with its product. Diverting waste from the landfill contributes to the following LEED credit: MR2. Coordinate with Section 01 33 29 LEED(tm) DOCUMENTATION. Designer will verify that items are able to be disposed of as specified.

[Collect information from manufacturer about [maintenance agreement] [take-back program] options, and provide to Contracting Officer.] Manage waste as specified in the Waste Management Plan. [Provide remnants remaining from the installation, consisting of scrap pieces more than 600 mm 2 feet in dimension with more than 0.6 square meters 6 square feet total [to the Government] [to local non-profit such as Habitat for Humanity as directed by the Government]]. [Non-retained scraps shall be set aside and returned to manufacturer for recycling into new product] [Remove non-retained scraps from site and recycle appropriately].

-- End of Section --
