1-2 bed, general, prefabricated headwall. Unit consists of a patient service module for general care, single or double bed type. It contains lighting, medical gases, electrical outlets, nurse call and bed bumper. Specify number and type of medical gas and electrical outlets. Size of module will vary by type and configuration of outlets.

An overhead rail system specifically designed for patient lifting and movement for a single bed patient room including the bathroom. The system will consist of recessed or ceiling mounted primary and secondary rails, lift motor with rolling carriage, patient harness or seat, and a hand controller or control box with charger. System will facilitate lifting and movement of patient to and from bed to gurney, chair, bath, commode, or other requirement. Minimum lift capability is 550 pounds. Custom design of track layout by manufacturer is essential to meet individual facility requirements.

Disposable soap dispenser. One-handed dispensing operation. Designed to accommodate disposable soap cartridge and valve.

A surface mounted, satin finish stainless steel, single-fold, paper towel dispenser. Dispenser features: tumbler lock; front hinged at bottom; and refill indicator slot. Minimum capacity 400 single-fold paper towels. For general purpose use throughout the facility.

A container for collecting and transporting syringes and other sharps for decontamination and disposal. Available in 2 gallon and 8 gallon with locking rotor. Complies with OSHA regulations for handling sharps.

A surface mounted, satin finish stainless steel, double garment hook. Equipped with a concealed mounting bracket that is secured to a concealed wall plate. For general purpose use throughout the facility to hang various items of apparel.

Surface mounted cubicle track, with curtain. Track constructed of thick extruded aluminum. Equipped with self lubricating carriers, beaded drop chain hooks, and flame resistant curtain. To include removable end caps. Designed to be suspended around patient areas where privacy is needed. Price listed is per foot of the track, curtains to be priced per quote.

A wall mounted, tilt/angled TV bracket for 37” to 80” TVs. Mount will be a universal and VESA compliant unit with a load capacity of up to 130 lbs.

Wall mounted television bracket backing which provides additional support and strength for the installation of the television bracket. Option available for interior or exterior plate and sized for 12” 16” or 24” stud spacing.

A solid, nonporous countertop approximately 36”W x 22”D with a undercounter sink combination. The countertop is an acrylic-based solid surface product with a standard thickness of 1”, and a 4” butt backsplash/curb. Surfaces will be easy to clean and maintain. Also referred to as a work surface or work top with sink. Available in a choice of colors, depths and sink shapes. Used for various applications in patient rooms, restrooms and throughout the facility. Usually a part of a casework interior design program. Unit does not include the drain and faucet.

Vestment wardrobe. This unit must be custom designed to conform to built-in requirements. Surfaced inside and out with high-pressure plastic laminates.

</table>

**Chair, Side With Arms**
Upholstered side chair, 32” high X 21” wide X 23” deep with arms, padded seats and padded backs. Seat height is a minimum of 17”. Available with or without sled base.

**Footstool, Straight**
Step stool. Used to assist patients getting on and off exam or surgical tables. Fitted with electrically conductive rubber tips.

**Sofa, Sleeper, Upholstered**
A sleeper sofa with a highly durable, stain resistant and long lasting fabric upholstery. The sleeper sofa will be designed to limit its footprint when in the sleep configuration to approximately that in the sofa configuration. The unit is used in hospital patient rooms and hospital staff lounges. Unit will also include drawer storage for linens.

**Cabinet, Bedside, Door, Drawer**
Bedside cabinet for storage of both the patient’s personal items and small patient support items. Approximately 31” high X 21” wide X 19” deep with one (1) drawer and one (1) closed storage closet. Drawer is removable so interior can be sanitized. May come in a 3 drawer version.

**Table, Computer, Small**
Small sized computer table/workstation, approximately 35” high X 36” wide X 30” deep with enough surface for a CPU, monitor and keyboard.

**Waste Receptacle, 24 GAL**
Rectangular steel waste receptacle with step-on lid and 24 gallon capacity. The receptacle is used to collect and temporarily store small quantities of paper refuse. Can be used in restrooms, patient areas, laboratories, pharmacies, etc.

**Clock, Battery, 12” Diameter**
Clock, 12” diameter. Round surface, easy to read numbers with sweep second hand. Wall mounted unit for use when impractical to install a fully synchronized clock system. Battery operated, (batteries not included).

**Television, HD, 40” Class**
High definition (HDTV) multimedia flat panel LED 40” class display television. The TV will have a 16:9 wide screen aspect ratio, minimum of 1920 x 1080 display resolution, digital tuner, minimum refresh rate of 60Hz, minimum of two HDMI ports and 1 USB port ENERGY STAR certified.

**Flowmeter, Air, Connect w/50 PSI Supply**
Air flowmeter. Unit has a stainless steel needle valve with clear flowtube for connection to 50 PSI air outlet from central pipeline system. Requires the appropriate adapter for connection to the wall outlet and fitting to connect to tubing. Database prices reflect fittings with an attached DISS power outlet. Other outlet and adapter configurations are available.

**Flowmeter, Oxygen, Low Flow**
Oxygen flowmeter. Consists of a clear crystal flowtube calibrated to 3.5 or 8 LPM depending on manufacturer. For oxygen regulation in hospital settings. Database pricing includes DISS fitting and DISS power outlet and wall adapter. Other fitting and adapter configurations are available.

**Regulator, Vacuum**
Vacuum pressure regulator for connection to central piped vacuum system. Standard display scale is graduated at least from 0 to 200 mm Hg of vacuum. Displays on specialized regulators may cover other vacuum ranges. Regulator type (continuous, intermittent, continuous/intermittent, surgical, pediatric, thoracic, etc.) as required. To be used in delivery, neonatal, pediatrics or any area where suction is required. Database pricing reflects continuous regulators graduated to 200 mm Hg with a full line vacuum selection switch and DISS configured inlets and outlets.

- **A5110**
  A 1-1/4” diameter, satin finish stainless steel, peened gripping surface, 2 wall shower, grab bar with concealed mounting flanges. Snap over flanges are provided to conceal mounting screws. A selection of mounting kits and concealed anchor devices are available from the manufacturers for different types of installations. Grab bar shall comply with barrier-free accessibility guidelines for structural strength. For typical applications in shower stalls where ADA (American’s With Disabilities Act) requirements must be met.

- **A5145**
  A surface mounted, satin finish stainless steel, double garment hook. Equipped with a concealed mounting bracket that is secured to a concealed wall plate. For general purpose use throughout the facility to hang various items of apparel.

- **A5175**
  A recessed mounted, satin finish stainless steel, soap dish with bar. Soap dish furnished with retaining lip and mounting clamp for installation in stud walls or countertop aprons. For general purpose use in shower stalls or at bathtub locations.

- **A5200**
  A concealed surface mounted, double roll, satin finish stainless steel, toilet tissue dispenser. Unit accommodates two standard-core toilet tissue rolls through 5” in diameter. Spindles are chrome plated plastic with a heavy-duty internal spring and turn freely for non-controlled delivery. For general purpose use in restrooms.

- **A5205**
  A surface mounted, satin finish stainless steel, 1” diameter, towel bar. Support posts and flanges are one piece, chrome-plated, cast heavy brass with satin finish. Towel bar shall not rotate within support posts. Available in 18”, 24” and 30” widths. For general purpose use in shower or bathtub rooms. Pricing based upon a suggested standard width of 18”.

- **CT025**
  A solid, nonporous countertop approximately 36”W x 22”D with a undercounter sink combination. The countertop is an acrylic-based solid surface product with a standard thickness of 1”, and a 4” butt backsplash/curb. Surfaces will be easy to clean and maintain. Also referred to as a work surface or work top with sink. Available in a choice of colors, depths and sink shapes. Used for various applications in patient rooms, restrooms and throughout the facility. Usually a part of a casework interior design program. Unit does not include the drain and faucet.

- **F2000**
  Wastepaper basket, fire resistant, approximately 40 quart capacity. This unit is used to collect and temporarily store small quantities of paper refuse in patient rooms, administrative areas and nursing stations. Size and shape varies depending on the application and manufacturer selected.

- **M8000**
  Shall be a hydraulically height-adjustable shower trolley for patient transfer and shower. It shall be approximately 77” long x 30” wide with minimum height adjustments range between 23 - 33”. It shall have a minimum lift capacity of 330 pounds. Casters shall be a minimum of 4” with wheel locking brakes. Shower Trolley may be configured to work manually or with a battery/electric height adjustment. The unit shall come complete with a wall panel that includes a patient shower and disinfection system, thermostatic mixer and temperature gauge and a stainless steel flush sink.
P3000 Lavatory, Vitreous China, Straight Back 1 CC
Wall mounted, vitreous china lavatory (approximate bowl size 7”x15”x10”) with: straight-front apron, straight or contoured back; faucet holes on 4” centers; gooseneck spout; wrist blade handles; and grid strainer. It shall be suitable for use in clinics, offices, washrooms or patient care areas.

P5040 Shower, Single, Hand-Held 1 CC
A complete, barrier-free, single hand-held, personal shower system. The shower system includes: pressure balanced mixing valve with high temperature limit stop; personal hand shower; shower hose; wall supply; and slide bar. For general purpose use throughout the facility in shower stalls.

P9050 Toilet, Wall Hung, Siphon Jet 1 CC
Siphon jet water closet/toilet. This unit is wall hung with an elongated bowl, top spud flushometer, seat with open front and check hinge, and carrier. Used in restrooms throughout the health care facility.

8 - (SV272) SCI AC Nourishment Room, F&N Svc

</tbody>
</table>
Plumbing connection utility center, sometimes referred to as a 'GUY GRAY BOX'. This recessed utility center provides for hot and cold water connections and a drain connection at sink and other equipment locations. The utility center includes cutoff valves for the water connections, a plug seal for the drain and an outside cover to provide an aesthetic appearance when connections are no longer required. This center may be installed in locations where no plumbing fixtures are included in a design as a future flexibility device, saving many dollars for later facility modifications to incorporate sinks as functions change.

</tbody>
</table>
### Electric Data Record Imprinter

The device accepts embossed plastic patient cards in either the 50 column or the 80 column format and adjusts automatically for card size and form thickness. Device will provide clear readable impressions with a cycle that is less than 1 second in length. Electro-mechanical design provides for a consistent impression that is independent of operator knowledge or technique. Unit may include a date/time stamp as an accessory.

### Multifunctional Printer, Fax, Scanner and Copier (PFC) All-in-One Machine

This device is capable of performing a variety of tasks including printing, scanning, faxing, and copying. It is designed to be versatile and can be used in various office environments.

### Plain Paper Facsimile Unit

This unit is used to transmit printed matter or images over standard telephone lines. The unit operates at a modem speed of 33.6 Kbps and automatically recognizes and communicates with a variety of standard facsimile machines. Commonly referred to as "fax" unit.

### JSN NAME | QTY | ACQ/INS | DESCRIPTION
--- | --- | --- | ---
A1010 Telecommunication Outlet | 2 | VV | Telecommunication outlet location.
A1015 Telephone, Desk, Multiple Line | 1 | VV | Telephone, desk, multiple line.

### Workstation, Straight, Free Standing, 72” W

This JSN will provide a whole work station typical to quickly plan work in areas in clinical or administrative spaces. There will be a price decrease if typical work stations are used with vertical hanging strips instead of panels. THIS TYPICAL INCLUDES:

- 4 Standard Solid Panels
- 2 Panel Connectors, 2-Way Corner
- 1 Panel-to-Panel Connector
- 2 Finished End Hardware
- 1 Cantilevered, Work Surface
- 2 Lockable Flipper Units
- 2 Shelf, Storage/Displays
- 2 Lights
- 1 Tack board
- 1 Tool Rail
- 1 Paper Tray
- 1 Diagonal Tray
- 1 Adjustable Keyboard Tray
- 1 Mobile Pedestal, Box/File

### Chair, Swivel, High Back

Highback contemporary swivel chair, 41” high X 23” wide X 23” deep with five (5) caster swivel base and arms. Chair may be used at desks or in conference rooms. Back and seat are foam padded and upholstered with either woven textile fabric or vinyl.

### Cabinet, Filing, Lateral, Half Height

Half height two (2) or three (3) drawer lateral filing cabinet, 28” high X 42” wide X 18” deep with recessed handles, locking device and drawer label holders. Drawers are adaptable to either letter or legal size materials.

### Wastepaper Basket, Fire Resistant

Wastepaper basket, fire resistant, approximately 40 quart capacity. This unit is used to collect and temporarily store small quantities of paper refuse in patient rooms, administrative areas and nursing stations. Size and shape varies depending on the application and manufacturer selected.

4 - (SS218) SCI AC Clerk Workstation, Stff Sprt

This JSN will provide a whole work station typical to quickly plan work in areas in clinical or administrative spaces. There will be a price decrease if typical work stations are used with vertical hanging strips instead of panels. THIS TYPICAL INCLUDES:
- 4 Standard Solid Panels
- 2 Panel Connectors, 2-Way Corner
- 1 Panel-to-Panel Connector
- 2 Finished End Hardware
- 1 Cantilevered, Work Surface
- 2 Lockable Flipper Units
- 2 Shelf, Storage/Displays
- 2 Lights
- 1 Tack board
- 1 Tool Rail
- 1 Paper Tray
- 1 Adjustable Keyboard Tray
- 1 Mobile Pedestal, Box/File

E0123  Workstation, Straight, Free Standing, 72" W  1  VV

Highback contemporary swivel chair, 41" high X 23" wide X 23" deep with five (5) caster swivel base and arms. Chair may be used at desks or in conference rooms. Back and seat are foam padded and upholstered with either woven textile fabric or vinyl.

F0275  Chair, Swivel, High Back  1  VV

Half height two (2) or three (3) drawer lateral filing cabinet, 28" high X 42" wide X 18" deep with recessed handles, locking device and drawer label holders. Drawers are adaptable to either letter or legal size materials.

F0420  Cabinet, Filing, Lateral, Half Height  1  VV

Wastepaper basket, fire resistant, approximately 40 quart capacity. This unit is used to collect and temporarily store small quantities of paper refuse in patient rooms, administrative areas and nursing stations. Size and shape varies depending on the application and manufacturer selected.

F2000  Basket, Wastepaper, Fire Resistant  1  VV

Desk top microprocessing computer. The unit shall consist of a central processing mini tower, flat panel monitor, keyboard, mouse and speakers. The system shall have the following minimum characteristics: a 2.8 GHz Pentium processor; 512 MB memory; 80GB hard drive; 32/48x CD-ROM/DVD combo; 1.44MB network interface card; video 32 MB NVIDIA; a 18 inch flat panel monitor. The computer is used throughout the facility to input, manipulate and retrieve information.

### Countertop, Solid Surface

A solid, nonporous countertop with a smooth seamless appearance. Easy to clean and maintain and with proper cleaning does not support the growth of mold. An acrylic-based solid surface product. Standard thickness of 1", and a 4" butt backsplash/curb. Also referred to as a work surface or work top. Available in a choice of colors and depths. Used in lab and other hospital areas requiring optimum physical and chemical resisting properties.

### Cart, Computer, Mobile

A mobile computer cart for use throughout the facility. The cart dimensions will be approximately 45" H x 30" W x 22" D with casters. May include drawers and miscellaneous other accessories that will be determined at time of purchase.

This Typical may include:

1. Cart Body, w/Computer Support, Style-A Narrow, w/Raised Edge Top
2. Flip-Up Shelf
3. Sharps Container Holder
4. Wastebasket
5. Chart Holder
6. Drawers, 3"H
7. Drawers, 6"H
8. Accessory Rail, Side
9. Drawer Organizer Bins

### Basket, Wastepaper, Step-On

"Step-on" wastepaper basket with inner liner and foot petal activated flip top.

### Whiteboard, Dry Erase

Whiteboard unit, approximately 36" H x 48" W consisting of a white porcelain enamel writing surface with an attached chalk tray. Magnetic surface available. Image can be easily removed with a standard chalkboard eraser. For use with water color pens. Unit is ready to hang.

### Clock, Battery, 12" Diameter

Clock, 12" diameter. Round surface, easy to read numbers with sweep second hand. Wall mounted unit for use when impractical to install a fully synchronized clock system. Battery operated, (batteries not included).

### Computer, Microprocessing, w/Flat Panel Monitor

Desk top microprocessing computer. The unit shall consist of a central processing mini tower, flat panel monitor, keyboard, mouse and speakers. The system shall have the following minimum characteristics: a 2.8 GHz Pentium processor; 512 MB memory; 80GB hard drive; 32/48x CD-ROM/DVD combo; 1.44MB network interface card; video 32 MB NVIDIA; a 18 inch flat panel monitor. The computer is used throughout the facility to input, manipulate and retrieve information.

### Distribution System, Medication, Automatic

An automated dispensing system that provides controlled dispensing, inventory and security. Size and cost will vary dependent on number of modules selected.

### Eyewash, Eye/Face, Sink Mounted, Hands-free

A sink mounted eyewash station. The unit is designed for emergency eye and face rinsing from soft flow dual spray-heads. The Flow must be activated by the single momentary action and remain on until terminated.

### Refrigerator, U/C or F/S, 5 Cu Ft

Utility refrigerator approximately 35" H x 24" W x 26" D. The unit has a two tray ice cube cooling system. The refrigerator fits standard architectural dimensions for undercounter installation. The unit is perfect for use in nurses' station, wards, and laboratories, pharmacies or wherever space is limited.
THIS TYPICAL INCLUDES:
1 Wall Mounted Rail
1 Locked Storage Container
2 Tray/Shelves
1 Drawer, 3”H
3 Drawers, 6”H
2 Drawers, 9”H
1 Tray/Shelf Divider
Drawer Organizer Bins
Consider the need for an E0921 to transport the locker from place to place.

Stationary, wire, shelving unit. Unit has fully adjustable shelves constructed of stainless steel. For use in general purpose storage areas. Shelving is provided in various sizes and configurations. Price provided is for a unit approximately 74”H x 18”D x 48”W with four shelves.

Page 45 of 403
Insulated food warming cabinet. The cabinet is made of aluminum or stainless steel and is mounted on four heavy duty casters. The interior of the cabinet has slide ledges on both sides spaced at 1-1/2 inch intervals. The unit holds thirty or more 18 inch by 26 inch full size pans or trays. Double door and non-insulated cabinets are available, the second door reduces the tray capacity by one. The cabinet can be equipped with push handles and bumpers (which will change the exterior dimensions). The cabinet is used in commercial and hospital kitchens for food storage prior to serving.

The computer is used throughout the facility to input, manipulate and retrieve information.

High back contemporary swivel chair, 41” high X 23” wide X 23” deep with five (5) caster swivel base and arms. Chair may be used at desks or in conference rooms. Back and seat are foam padded and upholstered with either woven textile fabric or vinyl.

Study carrel with table. Equipped with shelf for one (1) 12” monitor and book shelf, wire access grommets, built-in cable chase for wire management and adjustable floor glides. A convenience outlet is required at point of use to service computer equipment if used. Work surface is 29” high.

Desk top microprocessing computer. The unit shall consist of a central processing mini tower, flat panel monitor, keyboard, mouse and speakers. The system shall have the following minimum characteristics: a 2.8 GHz Pentium processor; 512 MB memory; 80GB hard drive; 32/48x CD-ROM/DVD combo; 1.44MB network interface card; video 32 MB NVIDIA; a 18 inch flat panel monitor. The computer is used throughout the facility to input, manipulate and retrieve information.

Telecommunication outlet location.

Telephone, Desk, Multiple Line

THIS TYPICAL INCLUDES:
1 Tool Rail
2 Paper Tray
1 Diagonal Tray
1 Freestanding Work Surface
1 Mobile Pedestal, Box/File
1 Adjustable Keyboard Tray

A surface mounted, satin finish stainless steel, double garment hook. Equipped with a concealed mounting bracket that is secured to a concealed wall plate. For general purpose use throughout the facility to hang various items of apparel.

Wall mounted television bracket with adjustable arm. Consists of movable arm with minimum 120 degree swivel. Designed for holding wall mounted, flat panel television units in patient rooms.

Wall mounted television bracket backing which provides additional support and strength for the installation of the television bracket. Option available for interior or exterior plate and sized for 12” 16” or 24” stud spacing.

Standing height under counter base cabinet with an adjustable shelf and a full width drawer above a solid right or left-hinged door (appropriate door hinge configuration to be indicated on equipment elevation drawings). Also referred to as a combination cabinet or a drawer and cupboard cabinet. For general purpose use throughout the facility.

Standing height under counter base cabinet with four full width drawers of equal height. Also referred to as a drawer cabinet. For general purpose use throughout the facility.

Standing height under counter base sink cabinet with solid hinged doors. Also referred to as a double-door sink cabinet. For general purpose use throughout the facility where a sink is to be used. Coordinate actual clear cabinet dimension with the actual outside dimension of sink that is specified to ensure that they are compatible.

Wall hung cabinet with two adjustable shelves, solid right or left-hinged door (appropriate door hinge configuration to be indicated on equipment elevation drawings), and sloping top. Also referred to as a solid hinged single door case. For general purpose use throughout the facility.

Single compartment stainless steel sink, drop-in, self-rimming, ledge-type, connected with a drain and provided with a mixing faucet. It shall also be provided with pre-punched fixture holes on 4” center, integral back ledge to accommodate deck-mounted fixtures, brushed/polished interior and top surfaces, and sound deadened. Recommended for use in suspended or U/C/B sink cabinets having a high plastic laminate or Chemsurf laminate countertop/work surface. For general purpose use throughout the facility.

A solid, nonporous countertop with a smooth seamless appearance. Easy to clean and maintain and with proper cleaning does not support the growth of mold. An acrylic-based solid surface product. Standard thickness of 1”, and a 4” butt backsplash/curb. Also referred to as a work surface or work top. Available in a choice of colors and depths. Used in lab and other hospital areas requiring optimum physical and chemical resisting properties.

Dining room chair with glides. Chair has straight legs with cushioned cloth or vinyl seat.

Dining table. Round 42” diameter or square 42” X 42”. Used in dining facilities and can comfortably seat up to four (4) persons.

Metal receptacle for soiled / used towels or waste. Equipped with a removable tapered top with two independently operating self-closing, spring hinged doors. Used in public facilities for the collection and temporary storage of refuse.

A combination whiteboard and bulletin board, half LCS and half cork. Available with either aluminum or wood frame. It can be used in patient rooms or in any appropriate space in the facility.

Seated stepping ergometer for total body, arms and/or legs low impact conditioning. The unit features a closed kinetic chain action which combines reciprocal stepping and arm action. The arm settings and seat are adjustable. A battery operated performance computer allows for adjusting workload level. The unit has a heavy duty steel frame construction with low-density plastic covers.

Computer assisted recumbent bicycle aerobic trainer. The trainer provides aerobic workouts on a computer controlled and monitored recumbent bicycle ergometer. The ergometer has several training routines and intensities which either the exerciser or a therapist can select. The unit display provides a readout of work accomplished as well as graphics to motivate the exerciser. Many models offer optional heart rate monitoring and wheels for easy mobility. Depending on the manufacturer and model, the computer is powered by the exerciser or an external source. The database electrical requirements are for those units requiring electrical power. The trainer is used for cardio-respiratory development in a gym or the exercise area of Physical Therapy.

CFES (computerized functional electrical stimulation) ergometer provides the means for the neurologically impaired individual to stay as healthy as possible using a combination of FES-induced muscle contractions variety of Stimulus Channels: - Maximum stimulus intensity for each channel is independently programmable.

High definition (HDTV) multimedia flat panel LED 40" class display television. The TV will have a 16:9 wide screen aspect ratio, minimum of 1920 x 1080 display resolution, digital tuner, minimum refresh rate of 60Hz, minimum of two HDMI ports and 1 USB port ENERGY STAR certified.

Desk top microprocessing computer. The unit shall consist of a central processing mini tower, flat panel monitor, keyboard, mouse and speakers. The system shall have the following minimum characteristics: a 2.8 GHz Pentium processor; 512 MB memory; 80GB hard drive; 32/48x CD-ROM/DVD combo; 1.44MB network interface card; video 32 MB NVIDIA; a 18 inch flat panel monitor. The computer is used throughout the facility.

High resolution computer printer with a variety of type styles and sheet/envelope feeder trays. Database information reflects network ready, medium duty office style laser printers. Other types of printers (bubble jet, dot matrix, line or plotter) as well as light or heavy use capabilities are available.

Stationary, wire, shelving unit. Unit has fully adjustable shelves constructed of stainless steel. For use in general purpose storage areas. Shelving is provided in various sizes and configurations. Price provided is for a unit approximately 74"H x 18"D x 48"W with four shelves.

Mobile linen hamper with hand or foot operated lid. Made of heavy tubular stainless steel with heavy gauge welded steel platform. Holds 25" hamper bags. Mounted on ball bearing casters. For linen transport in hospitals and clinics.

Mobile, non-powered patient transfer device that can support a minimum of 400 lbs. Device should consist of a patient foot plate, knee pads, support straps, heavy duty locking casters and handle bar for stability.

Refrigeration unit for twelve cold therapy packs. Unit features thermostatic temperature control, automatic defrosting and refrigeration grade insulation. Interior chamber is designed to facilitate periodic cleaning. Smaller capacity models are available.

Moist Heat Therapy Unit, also referred as a Hydrocollator Heating Unit, are used to apply effective heat to hot packs used in moist heat therapy. Unit is supplied ready for immediate use and requires no special plumbing. Unit features: stainless steel insulated wall, thermostatically controlled, casters (mobile units only), and standard size Hot Packs. Other unit sizes and accessories (variety of hot packs, tongs, side table rack, etc.) are available.

Ergometer for measuring upper body exertion during an exercise regimen. The unit consists of a seat and a hand crank mechanism at shoulder height. The unit is used for physical rehabilitation protocols and stress testing. The unit quantifiably measures the effort exerted by the patient.

Convertible exercise staircase. Staircase is sturdily built in two sections permitting a corner type or straight type arrangement. It consists of steps 30-36” wide and a square platform. It includes handrails to accommodate both children and adults. Both steps and platform are covered with non-slip tread.

Heavily constructed ramp and curbs exerciser. Unit includes three wide, deep curbs which are 2”, 4” and 6” high. The ramp section is also deep and wide and rises gradually from 1/2” to 8” high. The end portion of the ramp section is an 8” high platform which the curb sections meet. The curbs and ramps have a sure-grip, long wearing, non-slip surface. The exerciser is used for training in walking techniques as well as balance.

Physical therapy weight cart equipped with weights, two storage shelves, and racks to store dumbbells. Unit is constructed of quality hardwood and mounted on 4 heavy-duty casters. Used for storage of weights.

An interactive touch wall consisting of 64 lights to provide visual stimulus and reaction time, hand-eye-foot coordination and training in velocity and jump power. The unit includes a built-in display allowing an exact evaluation of reaction time. Frame is stainless steel with multicolored touch buttons and a integrated control unit in the frame. Used in physical therapy and fitness training.

Physical therapy parallel bars. Unit can have manual or electrically powered adjustments. Bar height is adjustable from 25” to 40” and the bar width is adjustable from 16” to 25”. Hand rails are chrome plated 1-1/2” steel tubing. Walking aisle is a minimum of 24” wide and finished in natural wood or covered with vinyl matting.

Exercise mat. Mat is filled with 2” resilient antibacterial foam. Handles are provided for hanging or transporting. Used in physical therapy.

Wall mounted hot/cold pack rack. Unit is a stainless steel rack used to store and dry cold packs.

Exercise platform with power height adjustment. The platform rests on one or two pedestal bases which contain the power mechanism for adjusting the table height. The platform top or removable mattress is covered with heavy duty, nylon-reinforced vinyl for durability. The adjustable height feature is designed to accommodate patients who have difficulty sitting or transferring from a wheelchair as well as providing an optimal working height for the physical therapist once the patient is on the table. Larger and smaller units as well as manual crank platform tables are available.
Rehabilitation robotic device for the safe mobilization of neurological and bed-ridden patients even in acute care featuring gradual verticalization with cyclic leg movements and loading for the stabilization of the patient in the upright position. The patient stimulation can be enhanced by synchronized functional electrical

Drinking water fountain. This unit is semi-recessed and wall mounted at handicap level with an air cooled compressor. The unit provides easy access with push-bar/button. The unit provides cool drinking water in hospitals and commercial office buildings to include access by handicapped persons

Wall mounted, slab type, vitreous china, lavatory (approximate bowl size 7”x15”x10”) with: faucet holes on 4” centers; gooseneck spout; wrist blade handles; and grid strainer

Drafting chair approximately 47” high X 20” wide X 20” deep with rotary stool and a 5 (five) star base with casters. Padded seat and back. Foot ring adjusts with chai

Stationary, wire, shelving unit. Unit has fully adjustable shelves constructed of stainless steel. For use in general purpose storage areas. Shelving is provided in various sizes and configurations. Price provided is for a unit approximately 74”H x 18”D x 48”W with four shelves.

A battery powered patient lift with an adjustable U shaped base and a minimum of 600 pound capacity for bariatric use. Unit comes with a battery charger. The unit is mounted on locking ball bearing casters for safety and stability and may require specialized slings. The database height refers to fully extended lifting arms. Designed for patient lifting and movement.

Wall mounted, vitreous china lavatory (approximate bowl size 7”x15”x10”) with: straight-front apron, straight or contoured back; faucet holes on 4” centers; gooseneck spout; wrist blade handles; and grid strainer. It shall be suitable for use in clinics, offices, washrooms or patient care areas.

Mop service sink approximately 10”H x 36”W x 24”D. Also called a mop service basin and a mop receptor. Unit is made of molded stone and is a one piece item. It shall include a service faucet hose, hose bracket and mop hanger. Used in utility rooms for cleaning mops and floor cleaning equipment.

Electrical workbench approximately 34” H x 72” W x 36” D. Characteristics/components include butcher block maple top; with two drawer or door pedestals and an electronic riser wiring kit. This workbench is used in wood and metal workshops. Workbench is a mix and match construction and can be configured to end users needs.

Tool cabinet and chest. Characteristics/components include: a mobile tool cabinet with 5 inch casters; shall have a minimum of 7 tamper-proof drawers; and have an internal drawer locking system that prevents unintentional drawer openings. The mechanics tool chest shall be capable of sitting on top of the mobile tool cabinet. It shall have a minimum of 10 tamper-proof drawers and have an internal drawer locking system that prevents unintentional drawer opening. All drawers shall lock automatically when the lid is closed. Shall have a partitioned top till that holds the lift-out trays equipped with socket dividers.
### Chain hoist
Characteristics/components include minimum 1/2 ton capacity; trolley that can be used with any hook suspended hoist; and a hoist that features a hardened load chain for optimum strength, flexibility and long wear.

</table>

**M4200 Otoscope/Ophthalmoscope, Wall Mounted**

- 1 VV
- Wall mounted otoscope and ophthalmoscope. Includes 6 foot line cord and plug and accepts and includes two handles. Contains head turn-on/turn-off, built-in speculum tray and 8 foot coiled cords. Unit is designed for use in patient exam rooms.

**M4255 Stand, IV, Adjustable**

- 1 VV
- Adjustable IV stand with 4-hook arrangement. Stand has stainless steel construction with heavy weight base. It adjusts from 66 inches to 100 inches and is mounted on conductive rubber, ball bearing, swivel casters. Stand is used for administering intravenous solutions.

**M4266 Pump, Volumetric, Infusion, Multiple Line**

- 1 VV
- Volumetric infusion pump. Pump is self-regulating with automatic sensor and adjustable rate. Equipped with visual and audible alarms and up to 10 hour capacity battery. For the administration of a wide variety of therapeutic agents where precise control is required. Unit provides individual control to IV lines simultaneously.

**M4655 Stretcher, Mobile, CRS, 9 Position**

- 1 VV
- Mobile stretcher. All corrosion resistant stainless steel construction. It consists of a tubular frame with side rails, a 9-position hydraulic base with pneumatic Fowler adjustment, and a 2” pad. Unit is mounted on 8” conductive casters. Designed for patient transport as well as for minor surgical procedures.

**M7470 Light, Surgical, Ceiling, Single, Small**

- 1 CC
- Ceiling mounted surgical light. Consists of a single lamp head up to 24” in diameter depending on the manufacturer. Unit provides heat filtered, color corrected light. Most lights require a minimum ceiling height of 8 feet 2 inches; check manufacturers’ specific recommendations. Light head is in a movable yoke attached to a column hanging from the ceiling. For minor surgery and obstetrical procedures. Physical dimensions refer to the retracted light; one length of the dual swing arm around the center mount for width and depth and the height is the combined lamp head and folded arms height.

**M8810 Stand, Mayo**

- 1 VV
- Adjustable instrument table. Table is corrosion resistant stainless steel construction and is mounted on two casters with two skid rails. It has telescopic upright adjusts from 39 inches to 60 inches with automatic locking device, and removable 13”x19” instrument tray. Designed for use in operating and procedure rooms.

**P3100 Lavatory, Vitreous China, Slab Type**

- 1 CC
- Wall mounted, slab type, vitreous china, lavatory (approximate bowl size 7”x15”x10”) with: faucet holes on 4” centers; gooseneck spout; wrist blade handles; and grid strainer. It shall be suitable for use in clinics, offices, washrooms or patient care area.
This JSN will provide a whole work station typical to quickly plan work in areas in clinical or administrative spaces. There will be a price decrease if typical work stations are used with vertical hanging strips instead of panels. THIS TYPICAL INCLUDES:

- 4 Standard Solid Panels
- 2 Panel Connectors, 2-Way Corner
- 1 Panel-to-Panel Connector
- 2 Finished End Hardware
- 1 Cantilevered, Work Surface
- 2 Lockable Flipper Units
- 2 Shelf, Storage/Displays
- 2 Lights
- 1 Tack board
- 1 Tool Rail
- 1 Paper Tray
- 1 Diagonal Tray
- 1 Adjustable Keyboard Tray
- 1 Mobile Pedestal, Box/File

Highback contemporary swivel chair, 41" high X 23" wide X 23" deep with five (5) caster swivel base and arms. Chair may be used at desks or in conference rooms. Back and seat are foam padded and upholstered with either woven textile fabric or vinyl.

Half height two (2) or three (3) drawer lateral filing cabinet, 28" high X 42" wide X 18" deep with recessed handles, locking device and drawer label holders. Drawers are adaptable to either letter or legal size materials.

Wastepaper basket, fire resistant, approximately 40 quart capacity. This unit is used to collect and temporarily store small quantities of paper refuse in patient rooms, administrative areas and nursing stations. Size and shape varies depending on the application and manufacturer selected.

Desk top microprocessing computer. The unit shall consist of a central processing mini tower, flat panel monitor, keyboard, mouse and speakers. The system shall have the following minimum characteristics: a 2.8 GHz Pentium processor; 512 MB memory; 80GB hard drive; 32/48x CD-ROM/DVD combo; 1.44MB network interface card; video 32 MB NVIDIA; a 18 inch flat panel monitor. The computer is used throughout the facility to input, manipulate and retrieve information.

The unit is designed for the disposal of sharps and complies with OSHA guidelines for the handling of sharps. It shall house a 5 quart container and be capable of being mounted on a wall. It shall have a glove dispenser attached. The unit shall be secured by a locked enclosure.

A surface mounted, satin finish stainless steel, double garment hook. Equipped with a concealed mounting bracket that is secured to a concealed wall plate. For general purpose use throughout the facility to hang various items of apparel.

Surface mounted cubicle track, with curtain. Track constructed of thick extruded aluminum. Equipped with self lubricating carriers, beaded drop chain hooks, and flame resistant curtain. To include removable end caps. Designed to be suspended around patient areas where privacy is needed. Price listed is per foot of the track, curtains to be priced per quote.

Standing height under counter base cabinet with an adjustable shelf and a full width drawer above solid hinged doors. Also referred to as a combination cabinet or a drawer and cupboard cabinet. For general purpose use throughout the facility.

Standing height under counter base sink cabinet. 36” H x 30” W x 22” D with two solid hinged doors. Also referred to as a double-door sink cabinet. For general purpose use throughout the facility where a sink is to be used. Coordinate actual clear cabinet dimension with the actual outside dimension of sink that is specified to ensure that they are compatible.

Wall hung cabinet with two adjustable shelves, framed-glass hinged doors, and sloping top. Also referred to as a framed-glass hinged double door wall case. For general purpose use throughout the facility.

Single compartment stainless steel sink, drop-in, self-rimming, ledge-type, connected with a drain and provided with a mixing faucet. It shall also be provided with punched fixture holes on 4” center, integral back ledge to accommodate deck-mounted fixtures, brushed/polished interior and top surfaces, and sound deadened. Recommended for use in suspended or U/C/B sink cabinets having a high plastic laminate or Chemsurf laminate countertop/work surface. Coordinate actual outside sink dimensions with the actual clear dimension of cabinet specified to ensure that they are compatible. For general purpose use throughout the facility.

High pressure laminate countertop (composition of wood particle core with plastic laminate surface) having a hard smooth surface finish, standard thickness of 1”, and a 4” butt backsplash/curb. Also referred to as a work surface or work top. Available in a wide choice of colors, patterns, and depths. Used in general purpose areas requiring a basic work surface arrangement with limited heat resistance and poor chemical resistance. Pricing based upon a 24” depth.

THIS TYPICAL INCLUDES:
2 Vertical Hanging Strips
1 Lockable Flipper Unit
1 Shelf, Storage/Display
1 Light
1 Cantilevered Work Surface

**THIS TYPICAL INCLUDES:**

1. Cart Body, Style-A Narrow, w/Raised Edge Top
2. Drawers, 3" H
3. Drawers, 6" H
4. Accessory Rail, Side Drawer Organizer Bins
5. Low back contemporary swivel chair, 37" high X 25" wide X 31" deep with a five (5) caster swivel base, arms and foam padded seat and back upholstered with either woven textile fabric or vinyl.
7. Step stool. Used to assist patients getting on and off exam or surgical tables. Fitted with electrically conductive rubber tips.
8. Wastepaper basket, fire resistant, approximately 40 quart capacity. This unit is used to collect and temporarily store small quantities of paper refuse in patient rooms, administrative areas and nursing stations. Size and shape varies depending on the application and manufacturer selected.
9. Clock, 12” diameter. Round surface, easy to read numbers with sweep second hand. Wall mounted unit for use when impractical to install a fully synchronized clock system. Battery operated, (batteries not included).
10. Air flowmeter. Unit has a stainless steel needle valve with clear flowtube for connection to 50 PSI air outlet from central pipeline system. Requires the appropriate adapter for connection to the wall outlet and fitting to connect to tubing. Database prices reflect fittings with an attached DISS power outlet. Other outlet and adapter configurations are available.
11. Oxygen flowmeter. Consists of a clear crystal flowtube calibrated to 3.5 or 8 LPM depending on manufacturer. For oxygen regulation in hospital settings. Database pricing includes DISS fitted and DISS power outlet and wall adapter. Other fitting and adapter configurations are available.
12. Vacuum pressure regulator for connection to central piped vacuum system. Standard display scale is graduated at least from 0 to 200 mm Hg of vacuum. Displays on specialized regulators may cover other vacuum ranges. Regulator type (continuous, intermittent, continuous/intermittent, surgical, pediatric, thoracic, etc.) as required. To be used in delivery, neonatal, pediatrics or any area where suction is required. Database pricing reflects continuous regulators graduated to 200 mm Hg with a full line vacuum selection switch and DISS configured inlets and outlets.
13. Wall or door mounted patient chart holder. Constructed of durable plastic or metal. Used for holding patient records. Size as required.
14. Desk top microprocessing computer. The unit shall consist of a central processing mini tower, flat panel monitor, keyboard, mouse and speakers. The system shall have the following minimum characteristics: a 2.8 GHz Pentium processor; 512 MB memory; 80GB hard drive; 32/48x CD-ROM/DVD combo; 1.44MB network interface card; video 32 MB NVIDIA; a 18 inch flat panel monitor. The computer is used throughout the facility to input, manipulate and retrieve information.

The unit is designed for the disposal of sharps and complies with OSHA guidelines for the handling of sharps. It shall house a 5 quart container and be capable of being mounted on a wall. It shall have a glove dispenser attached. The unit shall be secured by a locked enclosure.

A surface mounted, satin finish stainless steel, double garment hook. Equipped with a concealed mounting bracket that is secured to a concealed wall plate. For general purpose use throughout the facility to hang various items of apparel.

Surface mounted cubicle track, with curtain. Track constructed of thick extruded aluminum. Equipped with self lubricating carriers, beaded drop chain hooks, and flame resistant curtain. To include removable end caps. Designed to be suspended around patient areas where privacy is needed. Price listed is per foot of the track, curtains to be priced per quote.

Standing height under counter base cabinet with an adjustable shelf and a full width drawer above solid hinged doors. Also referred to as a combination cabinet or a drawer and cupboard cabinet. For general purpose use throughout the facility.

Standing height under counter base sink cabinet. 36" H x 30" W x 22" D with two solid hinged doors. Also referred to as a double-door sink cabinet. For general purpose use throughout the facility where a sink is to be used. Coordinate actual clear cabinet dimension with the actual outside dimension of sink that is specified to ensure that they are compatible.

Wall hung cabinet with two adjustable shelves, framed-glass hinged doors, and sloping top. Also referred to as a framed-glass hinged double door wall case. For general purpose use throughout the facility.

Single compartment stainless steel sink, drop-in, self-rimming, ledge-type, connected with a drain and provided with a mixing faucet. It shall also be provided with punched fixture holes on 4” center, integral back ledge to accommodate deck-mounted fixtures, brushed/polished interior and top surfaces, and sound deadened. Recommended for use in suspended or U/C/B sink cabinets having a high plastic laminate or Chemsurf laminate countertop/work surface. Coordinate actual outside sink dimensions with the actual clear dimension of cabinet specified to ensure that they are compatible. For general purpose use throughout the facility.

High pressure laminate countertop (composition of wood particle core with plastic laminate surface) having a hard smooth surface finish, standard thickness of 1", and a 4” butt backsplash/curb. Also referred to as a work surface or work top. Available in a wide choice of colors, patterns, and depths. Used in general purpose areas requiring a basic work surface arrangement with limited heat resistance and poor chemical resistance. Pricing based upon a 24” depth.

THIS TYPICAL INCLUDES:
- 2 Vertical Hanging Strips
- 1 Lockable Flipper Unit
- 1 Shelf, Storage/Display
- 1 Light
- 1 Cantilevered Work Surface

**THIS TYPICAL INCLUDES:**
- 1 Cart Body, Style-A Narrow, w/Raised Edge Top
- 2 Drawers, 3" H
- 4 Drawers, 6" H
- 1 Accessory Rail, Side
- Drawer Organizer Bins

Low back contemporary swivel chair, 37” high X 25” wide X 31” deep with a five (5) caster swivel base, arms and foam padded seat and back upholstered with either woven textile fabric or vinyl.

Step stool. Used to assist patients getting on and off exam or surgical tables. Fitted with electrically conductive rubber tips.

Wastepaper basket, fire resistant, approximately 40 quart capacity. This unit is used to collect and temporarily store small quantities of paper refuse in patient rooms, administrative areas and nursing stations. Size and shape varies depending on the application and manufacturer selected.

Clock, 12” diameter. Round surface, easy to read numbers with sweep second hand. Wall mounted unit for use when impractical to install a fully synchronized clock system. Battery operated, (batteries not included).

Air flowmeter. Unit has a stainless steel needle valve with clear flowtube for connection to 50 PSI air outlet from central pipeline system. Requires the appropriate adapter for connection to the wall outlet and fitting to connect to tubing. Database prices reflect fittings with an attached DISS power outlet. Other outlet and adapter configurations are available.

Oxygen flowmeter. Consists of a clear crystal flowtube calibrated to 3.5 or 8 LPM depending on manufacturer. For oxygen regulation in hospital settings. Database pricing includes DISS fitting and DISS power outlet and wall adapter. Other fitting and adapter configurations are available.

Vacuum pressure regulator for connection to central piped vacuum system. Standard display scale is graduated at least from 0 to 200 mm Hg of vacuum. Displays on specialized regulators may cover other vacuum ranges. Regulator type (continuous, intermittent, continuous/intermittent, surgical, pediatric, thoracic, etc.) as required. To be used in delivery, neonatal, pediatrics or any area where suction is required. Database pricing reflects continuous regulators graduated to 200 mm Hg with a full line vacuum selection switch and DISS configured inlets and outlets.

Wall or door mounted patient chart holder. Constructed of durable plastic or metal. Used for holding patient records. Size as required.

Desk top microprocessing computer. The unit shall consist of a central processing mini tower, flat panel monitor, keyboard, mouse and speakers. The system shall have the following minimum characteristics: a 2.8 GHz Pentium processor; 512 MB memory; 80GB hard drive; 32/48x CD-ROM/DVD combo; 1.44MB network interface card; video 32 MB NVIDIA; a 18 inch flat panel monitor. The computer is used throughout the facility to input, manipulate and retrieve information.
M1825  Printer, Computer  1  VV  High resolution computer printer with a variety of type styles and sheet/envelope feeder trays. Database information reflects network ready, medium duty office style laser printers. Other types of printers (bubble jet, dot matrix, line or plotter) as well as light or heavy use capabilities are available.

M3070  Hamper, Linen, Mobile, w/Lid  1  VV  Mobile linen hamper with hand or foot operated lid. Made of heavy tubular stainless steel with heavy gauge welded steel platform. Holds 25" hamper bags. Mounted on ball bearing casters. For linen transport in hospitals and clinics.

M3072  Frame, Infectious Waste Bag w/Lid  1  VV  Frame for an infectious waste collection bag. Made of heavy tubular stainless steel with heavy gauge welded steel platform. Adjust to hold 18" or 25" trash bags. Mounted on ball bearing casters and includes permanently mounted hinged lid. Provides means of bagging infectious waste at point of waste generation.

M8000  Shower Trolley System, Complete  1  CC  Shall be a hydraulically height-adjustable shower trolley for patient transfer and shower. It shall be approximately 77" long x 30" wide with minimum height adjustments range between 23 - 33". It shall have a minimum lift capacity of 330 pounds. Casters shall be a minimum of 4" with wheel locking brakes. Shower Trolley may be configured to work manually or with a battery/electric height adjustment. The unit shall come complete with a wall panel that includes a patient shower and disinfection system, thermostatic mixer and temperature gauge and a stainless steel flush sink.

M8055  Whirlpool, Leg, Floor Mounted  1  CC  Floor mounted leg whirlpool. The whirlpool consists of a heavy gauge stainless steel leak proof tank, an electric turbine ejector and aerator, a dial inside thermometer, hand grips, a drain valve and a thermostatic water mixing console. The unit is used for leg whirlpool treatments. The database weight figure is for a filled tank.

M8065  Chair, Whirlpool, Adjustable  2  VV  Patient whirlpool treatment chair. Constructed of chrome plated steel with non-slip rubber tipped legs and locking casters. Adjustable height. For use with a leg, arm or combination arm/leg treatment tank.

P2450  Valve, Mixing, Thermostatic  2  CC  Thermostatic mixing valve with washout hose. Used with portable whirlpool equipment. Thermostatic valve is used to maintain temperature between 70 and 110 degree Fahrenheit, with a flow rate of 20 gallons a minute. The washout hose assembly is used to wash out tanks after treatment. Used in physical therapy department to provide comfortable water temperature for patient treatments.

R5135  Freezer, Undercounter, 5 Cubic Feet  1  VV  Under counter freezer. This unit features space-saving thin-wall construction and has the flexibility of being built with existing cabinets, installed under-counter without top or custom-finished to specifications. This unit is a general purpose laboratory freezer.

A5106 Waste Disposal Unit, Sharps w/Glove Dispenser 2 VV

The unit is designed for the disposal of sharps and complies with OSHA guidelines for the handling of sharps. It shall house a 5 quart container and be capable of being mounted on a wall. It shall have a glove dispenser attached. The unit shall be secured by a locked enclosure.

C04F0 Cabinet, U/C/B, 1 Shelf, 2 Half DR, 2 DO, 36x36x22 1 CC

Standing height under counter base cabinet with an adjustable shelf and two half width drawers above solid hinged doors. Also referred to as a combination cabinet or a drawer and cupboard cabinet. For general purpose use throughout the facility.

C05P0 Cabinet, Sink, U/C/B, 2 Door, 36x48x22 1 CC

Standing height under counter base sink cabinet with solid hinged doors. Also referred to as a double-door sink cabinet. For general purpose use throughout the facility where a sink is to be used. Coordinate actual clear cabinet dimension with the actual outside dimension of sink that is specified to ensure that they are compatible.

CS200 Sink, SS, Single Compartment, 12x28x16 ID 1 CC

Single compartment stainless steel sink, drop-in, self-rimming, ledge-type, connected with a drain and provided with a mixing faucet. It shall also be provided with pre-punched fixture holes on 4” center, integral back ledge to accommodate deck-mounted fixtures, brushed/polished interior and top surfaces, and sound deadened. Recommended for use in suspended or U/C/B sink cabinets having a high plastic laminate or Chemsurf laminate countertop/work surface. Coordinate actual outside sink dimensions with the actual clear dimension of cabinet specified to ensure that they are compatible. For general purpose use throughout the facility.

CT050 Countertop, Stainless Steel 1 CC

Stainless steel countertop (composition of heavy-gauge Type No. 304 stainless steel) having a smooth satin finish and integral 4” backsplash/curb. Also referred to as a corrosion-resistant steel work surface or work top. Available in various depths. Used in areas where excellent ease of cleaning, abrasion resistance, bacteria resistance, impact resistance, load capacity and moisture resistance, are of concern. Pricing based upon a 24” depth.

F2020 Can, Trash, 44 Gallon 1 VV

Forty four (44) gallon trash can, 32” high X 24” diameter, with lid. Used to collect and transport refuse from a point of origin to point of disposal (example: from soiled utility or a nursing unit to the trash compactor at housekeeping).

P2000 Eyewash, Wall Mounted, Hands-Free 1 CC

Wall mounted emergency eye wash station. The flow of water from the unit is activated by hand. Upon initiation of water flow the unit will operate hands free to provide streams of water to clear foreign particles or dilute caustic liquids from the eyes in emergency situations. Used in laboratories and areas of the hospital where employees are subject to foreign bodies or liquid material to the eyes.

P2450 Valve, Mixing, Thermostatic 1 CC

Thermostatic mixing valve with washout hose. Used with portable whirlpool equipment. Thermostatic valve is used to maintain temperature between 70 and 110 degree Fahrenheit, with a flow rate of 20 gallons a minute. The washout hose assembly is used to wash out tanks after treatment. Used in physical therapy department to provide comfortable water temperature for patient treatments.

P3100 Lavatory, Vitreous China, Slab Type 1 CC

Wall mounted, slab type, vitreous china, lavatory (approximate bowl size 7”x15”x10”) with: faucet holes on 4” centers; gooseneck spout; wrist blade handles; and grid strainer. It shall be suitable for use in clinics, offices, washrooms or patient care area.

</table>

A solid, nonporous countertop approximately 36"W x 22"D with a undercounter sink combination. The countertop is an acrylic-based solid surface product with a standard thickness of 1", and a 4" butt backsplash/curb. Surfaces will be easy to clean and maintain. Also referred to as a work surface or work top with sink. Available in a choice of colors, depths and sink shapes. Used for various applications in patient rooms, restrooms and throughout the facility. Usually a part of a casework interior design program. Unit does not include the drain and faucet.

Stacking chair, approximately 34" H X 21" W X 24" D. May be stacked up to 20 high depending upon the model selected. These chairs are intended primarily as overflow capacity for conference rooms.

Wastepaper basket, fire resistant, approximately 40 quart capacity. This unit is used to collect and temporarily store small quantities of paper refuse in patient rooms, administrative areas and nursing stations. Size and shape varies depending on the application and manufacturer selected.

Rectangular steel waste receptacle with step-on lid and 24 gallon capacity. The receptacle is used to collect and temporarily store small quantities of paper refuse. Can be used in restrooms, patient areas, laboratories, pharmacies, etc.

Clock, 12" diameter. Round surface, easy to read numbers with sweep second hand. Wall mounted unit for use when impractical to install a fully synchronized clock system. Battery operated, (batteries not included).

Computer assisted recumbent bicycle aerobic trainer. The trainer provides aerobic workouts on a computer controlled and monitored recumbent bicycle ergometer. The ergometer has several training routines and intensities which either the exerciser or a therapist can select. The unit display provides a readout of work accomplished as well as graphics to motivate the exerciser. Many models offer optional heart rate monitoring and wheels for easy mobility. Depending on the manufacturer and model, the computer is powered by the exerciser or an external source. The database electrical requirements are for those units requiring electrical power. The trainer is used for cardio-respiratory development in a gym or the exercise area of Physical Therapy.

High definition (HDTV) multimedia flat panel LED 40" class display television. The TV will have a 16:9 wide screen aspect ratio, minimum of 1920 x 1080 display resolution, digital tuner, minimum refresh rate of 60Hz, minimum of two HDMI ports and 1 USB port ENERGY STAR certified.

</table>
### C05P0 Cabinet, Sink, U/C/B, 2 Door, 36x48x22

- **1** CC

Standing height under counter base sink cabinet with solid hinged doors. Also referred to as a double-door sink cabinet. For general purpose use throughout the facility where a sink is to be used. Coordinate actual clear cabinet dimension with the actual outside dimension of sink that is specified to ensure that they are compatible.

### CS200 Sink, SS, Single Compartment, 12x28x16 ID

- **1** CC

Single compartment stainless steel sink, drop-in, self-rimming, ledge-type, connected with a drain and provided with a mixing faucet. It shall also be provided with pre-punched fixture holes on 4” center, integral back ledge to accommodate deck-mounted fixtures, brushed/polished interior and top surfaces, and sound deadened. Recommended for use in suspended or U/C/B sink cabinets having a high plastic laminate or Chemsurf laminate countertop/work surface. Coordinate actual outside sink dimensions with the actual clear dimension of cabinet specified to ensure that they are compatible.

### CT050 Countertop, Stainless Steel

- **1** CC

Stainless steel countertop (composition of heavy-gauge Type No. 304 stainless steel) having a smooth satin finish and integral 4” backsplash/curb. Also referred to as a corrosion-resistant steel work surface or work top. Available in various depths. Used in areas where excellent ease of cleaning, abrasion resistance, bacteria resistance, impact resistance, load capacity and moisture resistance, are of concern. Pricing based upon a 24” depth.

### F2020 Can, Trash, 44 Gallon

- **1** VV

Forty four (44) gallon trash can, 32” high X 24” diameter, with lid. Used to collect and transport refuse from a point of origin to point of disposal (example: from soiled utility or a nursing unit to the trash compactor at housekeeping).

### P2000 Eyewash, Wall Mounted, Hands-Free

- **1** CC

Wall mounted emergency eye wash station. The flow of water from the unit is activated by hand. Upon initiation of water flow the unit will operate hands free to provide streams of water to clear foreign particles or dilute caustic liquids from the eyes in emergency situations. Used in laboratories and areas of the hospital where employees are subject to foreign bodies or liquid material to the eyes.

### P2450 Valve, Mixing, Thermostatic

- **1** CC

Thermostatic mixing valve with washout hose. Used with portable whirlpool equipment. Thermostatic valve is used to maintain temperature between 70 and 110 degree Fahrenheit, with a flow rate of 20 gallons a minute. The washout hose assembly is used to wash out tanks after treatment. Used in physical therapy department to provide comfortable water temperature for patient treatments.

### P3100 Lavatory, Vitreous China, Slab Type

- **1** CC

Wall mounted, slab type, vitreous china, lavatory (approximate bowl size 7”x15”x10”) with: faucet holes on 4” centers; gooseneck spout; wrist blade handles; and grid strainer. It shall be suitable for use in clinics, offices, washrooms or patient care area.

Computer assisted recumbent bicycle aerobic trainer. The trainer provides aerobic workouts on a computer controlled and monitored recumbent bicycle ergometer. The ergometer has several training routines and intensities which either the exerciser or a therapist can select. The unit display provides a readout of work accomplished as well as graphics to motivate the exerciser. Many models offer optional heart rate monitoring and wheels for easy mobility. Depending on the manufacturer and model, the computer is powered by the exerciser or an external source. The database electrical requirements are for those units requiring electrical power. The trainer is used for cardio-respiratory development in a gym or the exercise area of Physical Therapy.

High definition (HDTV) multimedia flat panel LED 40” class display television. The TV will have a 16:9 wide screen aspect ratio, minimum of 1920 x 1080 display resolution, digital tuner, minimum refresh rate of 60Hz, minimum of two HDMI ports and 1 USB port ENERGY STAR certified.

Stationary, wire, shelving unit. Unit has fully adjustable shelves constructed of stainless steel. For use in general purpose storage areas. Shelving is provided in various sizes and configurations. Price provided is for a unit approximately 74"H x 18”D x 48”W with four shelves.

Mobile linen hamper with hand or foot operated lid. Made of heavy tubular stainless steel with heavy gauge welded steel platform. Holds 25” hamper bags. Mounted on ball bearing casters. For linen transport in hospitals and clinics.

A battery powered patient lift with an adjustable U shaped base and a minimum of 600 pound capacity for bariatric use. Unit comes with a battery charger. The unit is mounted on locking ball bearing casters for safety and stability and may require specialized slings. The database height refers to fully extended lifting arms. Designed for patient lifting and movement.

Refrigeration unit for twelve cold therapy packs. Unit features thermostatic temperature control, automatic defrosting and refrigeration grade insulation. Interior chamber is designed to facilitate periodic cleaning. Smaller capacity models are available.

Moist Heat Therapy Unit, also referred as a Hydrocollator Heating Unit, are used to apply effective heat to hot packs used in moist heat therapy. Unit is supplied ready for immediate use and requires no special plumbing. Unit features: stainless steel insulated wall, thermostatically controlled, casters (mobile units only), and standard size Hot Packs. Other unit sizes and accessories (variety of hot packs, tongs, side table rack, etc.) are available.

Ergometer for measuring upper body exertion during an exercise regimen. The unit consists of a seat and a hand crank mechanism at shoulder height. The unit is used for physical rehabilitation protocols and stress testing. The unit quantifiably measures the effort exerted by the patient.

A solid, nonporous countertop with a smooth seamless appearance. Easy to clean and maintain and with proper cleaning does not support the growth of mold. An acrylic-based solid surface product. Standard thickness of 1", and a 4" butt backsplash/curb. Also referred to as a work surface or work top. Available in a choice of colors and depths. Used in lab and other hospital areas requiring optimum physical and chemical resisting properties.

Step-on" wastepaper basket with inner liner and foot pedal activated flip top.

Space saving front to back automatic coffee maker. This unit includes a heating tank, connection for a cold water supply, decanter service with three burners, funnel and a water flow controller. The unit is used for semi-automatic coffee brewing in cafeterias and commercial institutions. The unit automatically shuts off the water flow when enough has passed through to fill the pot. The unit is normally provided plumbed with a hot water faucet to the side for making other hot drinks (tea, cider, cocoa, etc.). The database height dimension does not include the clearance for coffee decanters warming on the upper burners.

Household dishwasher. The unit features several wash cycles for different types of tableware, electronic or push button controls, a sound insulation package, an integral filter and disposal unit and adjustable racks. This unit is used for light work in a laboratory or patient rehabilitation in daily living area of occupational therapy.

Counter mounted microwave oven for average duty use. The exterior cabinet can be metal or heavy duty impact resistant plastic. The oven delivers instant energy for rapid heating, defrosting or prime cooking. The oven has touch pad controls, digital timer, power level selector and preprogrammed selectors for commonly cooked items. This oven is commonly found in staff lounges.

Gas range with a standard or convection oven. The unit features a stainless steel front and top with painted sides; stainless steel sides are available. The range top can have a variety of configurations. The database specifications and pricing are for a six burner basic range with three burners in front and three burners in the rear. The oven has five matched rack position guides and three racks. The gas connections may be via a front or rear manifold. Different models have specific installation requirements, clearances from combustible materials and installation restrictions. Refer to the manufacturers' technical sheets. The database height dimension does not include the riser for an above range shelf. The database electrical specifications are for automatic pilot lighting. The unit is used in hospital food service operations.

Cabinet lift system motor operated to move a cabinet down to standard-height counter or 34” high, includes safety automatic shutoff, 20” vertical movement and 300 lbs. maximum lifting capacity, requires 110V GFCI power outlet; supporting mechanism should be anchored to wall studs or additional 2” x 4” horizontal blocks between studs, supports standard height wall cabinet, 48” wide max."

Large capacity automatic clothes washer with a heavy duty motor. The unit's control system programs load, cycle time, spin speed, fabric, water level and water temperature. The washer includes a bleach and/or fabric softener dispenser and a filter ring for trapping lint.

Automatic clothes dryer. Electric unit features automatic sensi-dry control with setting for different kinds of fabrics, timed cycle, removable lint filter, drum interior light and enamel finish.
**Garbage disposal.** A two (2) horsepower versatile waste disposal unit suitable for facilities where 500 to 1000 meals are prepared and served daily. Requires eight (8) gallons per minute water flow rate, and outlet flange tapped for a two (2) inch pipe. Unit will have a manual reversing switch and shall comply with MIL SPEC No. MIL-G-15840. Multiple electrical configurations are available.

**Refrigerator/freezer unit.** This type unit includes a food saver system that helps keep food fresher. It also includes roll out wheels and is equipped for an optional automatic icemaker. This unit is of commercial or residential design and use.

**Plumbing connection utility center,** sometimes referred to as a 'GUY GRAY BOX'. This recessed utility center provides for hot and cold water connections and a drain connection at sink and other equipment locations. The utility center includes cutoff valves for the water connections, a plug seal for the drain and an outside cover to provide an aesthetic appearance when connections are no longer required. This center may be installed in locations where no plumbing fixtures are included in a design as a future flexibility device, saving many dollars for later facility modifications to incorporate sinks as functions change.

<td>VV</td>
<td>Space saving front to back automatic coffee maker. This unit includes a heating tank, connection for a cold water supply, decanter service with three burners, funnel and a water flow controller. The unit is used for semi-automatic coffee brewing in cafeterias and commercial institutions. The unit automatically shuts off the water flow when enough has passed through to fill the pot. The unit is normally provided plumbed with a hot water faucet to the side for making other hot drinks (tea, cider, cocoa, etc.). The database height dimension does not include the clearance for coffee decanters warming on the upper burners.</td>
</tr>
</tbody>
</table>
### Household dishwasher. The unit features several wash cycles for different types of tableware, electronic or push button controls, a sound insulation package, an integral filter and disposal unit and adjustable racks. This unit is used for light work in a laboratory or patient rehabilitation in daily living area of occupational therapy.

### Countertop mounted microwave oven for average duty use. The exterior cabinet can be metal or heavy duty impact resistant plastic. The oven delivers instant energy for rapid heating, defrosting or prime cooking. The oven has touch pad controls, digital timer, power level selector and preprogrammed selectors for commonly cooked items. This oven is commonly found in staff lounges.

### Gas range with a standard or convection oven. The unit features a stainless steel front and top with painted sides; stainless steel sides are available. The range top can have a variety of configurations. The database specifications and pricing are for a six burner basic range with three burners in front and three burners in the rear. The oven has five matched rack position guides and three racks. The gas connections may be via a front or rear manifold. Different models have specific installation requirements, clearances from combustible materials and installation restrictions. Refer to the manufacturers’ technical sheets. The database height dimension does not include the riser for an above range shelf. The database electrical specifications are for automatic pilot lighting. The unit is used in hospital food service operations.

### Garbage disposal. A two (2) horsepower versatile waste disposal unit suitable for facilities where 500 to 1000 meals are prepared and served daily. Requires eight (8) gallons per minute water flow rate, and outlet flange tapped for a two (2) inch pipe. Unit will have a manual reversing switch and shall comply with MIL SPEC No. MIL-G-15840. Multiple electrical configurations are available.

### Refrigerator/freezer unit. This type unit includes a food saver system that helps keep food fresher. It also includes roll out wheels and is equipped for an optional automatic icemaker. This unit is of commercial or residential design and use.

### Telecommunication outlet location.

### An overhead ceiling mounted rail system specifically designed for patient lifting and movement within a patient room. The system will consist of recessed or ceiling mounted primary and secondary rails, lift motor with carriage, patient harness or seat, and a hand controller or control box with charger (other charging options may be available). System will facilitate lifting and movement of patient to and from bed, to stretcher, chair, bathroom or other requirements. Lifting capacity is 600 pounds. Custom design of track layout by manufacturer is essential to meet individual facility requirements.

### This JSN is to be used for determining and defining location of decorative artwork.

### Wardrobe cabinet with a fixed shelf, clothing rod, and a solid or louvered right or left-hinged door (appropriate door hinge configuration to be indicated on the equipment elevation drawings), an optional locking door is available. Also referred to as a wardrobe case, unit or storage unit. Used for storage of clothing and personal items.

</table>
A 1-1/4” diameter, satin finish stainless steel, peened gripping surface, 2 wall toilet stall/room, grab bar with concealed mounting flanges. Snap over flanges are provided to conceal mounting screws. A selection of mounting kits and concealed anchor devices are available from the manufacturers for different types of installations. Grab bar shall comply with barrier-free accessibility guidelines for structural strength. For typical water closet applications in toilet stalls and rooms where ABA (Architectural Barriers Act) requirements must be met.

A surface mounted, satin finish stainless steel, double garment hook. Equipped with a concealed mounting bracket that is secured to a concealed wall plate. For general purpose use throughout the facility to hang various items of apparel.

A recessed mounted, satin finish stainless steel, soap dish with bar. Soap dish furnished with retaining lip and mounting clamp for installation in stud walls or countertop aprons. For general purpose use in shower stalls or at bathtub locations.

A concealed surface mounted, double roll, satin finish stainless steel, toilet tissue dispenser. Unit accommodates two standard-core toilet tissue rolls through 5” in diameter. Spindles are chrome plated plastic with a heavy-duty internal spring and turn freely for non-controlled delivery. For general purpose use in restrooms.

A solid, nonporous countertop approximately 36”W x 22”D with an undercounter sink combination. The countertop is an acrylic-based solid surface product with a standard thickness of 1”, and a 4” butt backsplash/curb. Surfaces will be easy to clean and maintain. Also referred to as a work surface or work top with sink. Available in a choice of colors, depths and sink shapes. Used for various applications in patient rooms, restrooms and throughout the facility. Usually a part of a casework interior design program. Unit does not include the drain and faucet.

A complete, barrier-free, single hand-held, personal shower system. The shower system includes: pressure balanced mixing valve with high temperature limit stop; personal hand shower; shower hose; wall supply; and slide bar. For general purpose use throughout the facility in shower stalls.

Stationary, wire, shelving unit. Unit has fully adjustable shelves constructed of stainless steel. For use in general purpose storage areas. Shelving is provided in various sizes and configurations. Price provided is for a unit approximately 74”H x 18”D x 48”W with four shelves.

</table>

- **Table, Adjustable Height**: 36W x 24 D adjustable height electric pedestal table with C-foot configuration and integral wire management trough or tray. Height range varies by manufacturer, and model, approximately 22 to 48 inches. Steel tube construction with powder coat finish, and 1 inch thick top with high pressure laminate or wood veneer surface. System includes integral electrical components (including control box, cable trough, power cord for table; U.L. listed pop-up power strip with minimum of two simplex receptacles, data and/or USB ports as needed per facility preference.

- **Basket, Wastepaper, Step-On**: Step-on wastepaper basket with inner liner and foot pedal activated flip top.

- **Whiteboard, Dry Erase**: Whiteboard unit, approximately 36” H x 48” W consisting of a white porcelain enamel writing surface with an attached chalk tray. Magnetic surface available. Image can be easily removed with a standard chalkboard eraser. For use with water color pens. Unit is ready to hang.

- **Clock, Battery, 12” Diameter**: Clock, 12” diameter. Round surface, easy to read numbers with sweep second hand. Wall mounted unit for use when impractical to install a fully synchronized clock system. Battery operated, (batteries not included).

- **Television, Color, Bedside**: Bedside color television. The small size allows the set to be mounted on a "gravity-free" support arm which permits the patient to position the TV for comfortable viewing. The television includes an earphone jack and an AM/FM radio. Database pricing includes television, support arm, support arm wall mount, remote power supply and remote power supply wall mount. Power supply electrical requirement is approximately 1 amp at 120 V per television.

- **Television, HDTV, Large Screen, 60”**: A high definition (HDTV) multimedia, slim design, 60”W to 65”W color television. The TV will have a 16.9 wide screen aspect ratio with full HD 1080p resolution and HDMI connections. TV may be LED, Plasma or LCD. TV will include a stand.

- **Flowmeter, Air, Connect w/50 PSI Supply**: Air flowmeter. Unit has a stainless steel needle valve with clear flowtube for connection to 50 PSI air outlet from central pipeline system. Requires the appropriate adapter for connection to the wall outlet and fitting to connect to tubing. Database prices reflect fittings with an attached DISS power outlet. Other outlet and adapter configurations are available.

- **Flowmeter, Oxygen, Low Flow**: Oxygen flowmeter. Consists of a clear crystal flowtube calibrated to 3.5 or 8 LPM depending on manufacturer. For oxygen regulation in hospital settings. Database pricing includes DISS fitting and DISS power outlet and wall adapter. Other fitting and adapter configurations are available.

- **Regulator, Vacuum**: Vacuum pressure regulator for connection to central piped vacuum system. Standard display scale is graduated at least from 0 to 200mm Hg of vacuum. Displays on specialized regulators may cover other vacuum ranges. Regulator type (continuous, intermittent, continuous/intermittent, surgical, pediatric, thoracic, etc.) as required. To be used in delivery, neonatal, pediatrics or any area wheresuction is required. Database pricing reflects continuous regulators graduated to 200 mm Hg with a full line vacuum selection switch and DISS configured inlets and outlets.

- **Hamper, Linen, Mobile, w/Lid**: Mobile linen hamper with hand or foot operated lid. Made of heavy tubular stainless steel with heavy gauge welded steel platform. Holds 25” hamper bags. Mounted on ball bearing casters. For linen transport in hospitals and clinics.

- **Container, Biohazard Waste, Step-on, Fire Safe**: A biohazard waste container with a step-on lid. The container will have a capacity of approximately 12 gallons and be made of a fire safe material.

A high quality 1/4" polished float glass mirror 36X18, framed in a one-piece, bright polished, stainless steel channel frame with 90° mitered corners. All edges of the mirror are protected by absorbing filler strips. Mirror has a galvanized steel back with integral horizontal hanging brackets and wall hanger for concealed mounting. For mounting above single wall mounted lavatories located in toilet areas, Doctors examination offices, etc. May also be used above double lavatories, either wall or countertop mounted, found in restroom areas.

An overhead rail system specifically designed for patient lifting and movement for a single bed patient room including the bathroom. The system will consist of recessed or ceiling mounted primary and secondary rails, lift motor with rolling carriage, patient harness or seat, and a hand controller or control box with charger. System will facilitate lifting and movement of patient to and from bed to gurney, chair, bath, commode, or other requirement. Minimum lift capability is 550 pounds. Custom design of track layout by manufacturer is essential to meet individual facility requirements.

Shower bench; built-in. Eighteen (18) gauge stainless steel frame with anchors built-in into the wall. Size and shape as required.

Disposable soap dispenser. One-handed dispensing operation. Designed to accommodate disposable soap cartridge and valve.

A touch free wall-mounted hand sanitizer dispenser. For use throughout a healthcare facility. Unit does not include the sanitizing liquid. Units are battery operated.

A surface mounted, sensor activated, automatic, roll paper towel dispenser. The unit dispenses a paper towel automatically only when hands are in position below the dispenser for maximum sanitation and hygiene. May include adjustable settings for sheet length, time delay, and sensor range. Unit is battery operated or with optional AC power adapter.

A surface mounted, satin finish stainless steel, sanitary napkin disposal. Dispenser features a flip-up cover, secured to the container by a heavy duty stainless steel piano-hinge. Dispenser may be secured to wall or toilet partition. For general purpose use in female toilet stalls or rooms and uni-sex toilet rooms.

The unit is designed for the disposal of sharps and complies with OSHA guidelines for the handling of sharps. It shall house a 5 quart container and be capable of being mounted on a wall. It shall have a glove dispenser attached. The unit shall be secured by a locked enclosure.

A 1-1/4" diameter, satin finish stainless steel, peened gripping surface, 2 wall toilet stall/ room, grab bar with concealed mounting flanges. Snap over flanges are provided to conceal mounting screws. A selection of mounting kits and concealed anchor devices are available from the manufacturers for different types of installations. Grab bar shall comply with barrier-free accessibility guidelines for structural strength. For typical water closet applications in toilet stalls and rooms where ADA (American's With Disabilities Act) requirements must be met.

A 1-1/4” diameter, satin finish stainless steel, peened gripping surface, 2 wall shower, grab bar with concealed mounting flanges. Snap over flanges are provided to conceal mounting screws. A selection of mounting kits and concealed anchor devices are available from the manufacturers for different types of installations. Grab bar shall comply with barrier-free accessibility guidelines for structural strength. For typical applications in shower stalls where ADA (American's With Disabilities Act) requirements must be met.

A surface mounted, satin finish stainless steel, double garment hook. Equipped with a concealed mounting bracket that is secured to a concealed wall plate. For general purpose use throughout the facility to hang various items of apparel.

A recessed mounted, 1” outside diameter, satin finish stainless steel, shower curtain rod with white vinyl shower curtain (72” H) and SS shower curtain hooks. Rod and curtain available in various widths. For general purpose use at shower stall or bathtub locations. Pricing based upon standard shower stall dimensions of 36” x 36” and a standard curtain height of 72”.

A concealed surface mounted, double roll, satin finish stainless steel, toilet tissue dispenser. Unit accommodates two standard-core toilet tissue rolls through 5” in diameter. Spindles are chrome plated plastic with a heavy-duty internal spring and turn freely for non-controlled delivery. For general purpose use in restrooms.

A surface mounted, satin finish stainless steel, 1” diameter, towel bar. Support posts and flanges are one piece, chrome-plated, cast heavy brass with satin finish. Towel bar shall not rotate within support posts. Available in 18”, 24” and 30” widths. For general purpose use in shower or bathtub rooms. Pricing based upon a suggested standard width of 18”.

A solid, nonporous countertop approximately 36”W x 22”D with a undercounter sink combination. The countertop is an acrylic-based solid surface product with a standard thickness of 1”, and a 4” butt backsplash/curb. Surfaces will be easy to clean and maintain. Also referred to as a work surface or work top with sink. Available in a choice of colors, depths and sink shapes. Used for various applications in patient rooms, restrooms and throughout the facility. Usually a part of a casework interior design program. Unit does not include the drain and faucet.

Commode Chair to be used in Urodynamic testing. Aluminum frame with plastic seat and funnel attached. Chair to be used in Urodynamic testing. Free-standing adjustable height approximately 27” to 31”. Aluminum frame with arm rests, plastic seat and funnel.

Shall be a hydraulically height-adjustable shower trolley for patient transfer and shower. It shall be approximately 77” long x 30” wide with minimum height adjustments range between 23 - 33”. It shall have a minimum lift capacity of 330 pounds. Casters shall be a minimum of 4” with wheel locking brakes. Shower Trolley may be configured to work manually or with a battery/electric height adjustment. The unit shall come complete with a wall panel that includes a patient shower and disinfection system, thermostatic mixer and temperature gauge and a stainless steel flush sink.
P3000  Lavatory, Vitreous China, Straight Back  1  CC  Wall mounted, vitreous china lavatory (approximate bowl size 7"x15"x10") with: straight-front apron, straight or contoured back; faucet holes on 4" centers; gooseneck spout; wrist blade handles; and grid strainer. It shall be suitable for use in clinics, offices, washrooms or patient care areas.

P5040  Shower, Single, Hand-Held  1  CC  A complete, barrier-free, single hand-held, personal shower system. The shower system includes: pressure balanced mixing valve with high temperature limit stop; personal hand shower; shower hose; wall supply; and slide bar. For general purpose use throughout the facility in shower stalls.

P9050  Toilet, Wall Hung, Siphon Jet  1  CC  Siphon jet water closet/toilet. This unit is wall hung with an elongated bowl, top spud flushometer, seat with open front and check hinge, and carrier. Used in restrooms throughout the health care facility.

Surface mounted cubicle track, with curtain. Track constructed of thick extruded aluminum. Equipped with self lubricating carriers, beaded drop chain hooks, and flame resistant curtain. To include removable end caps. Designed to be suspended around patient areas where privacy is needed. Price listed is per foot of the track, curtains to be priced per quote.

Wall mounted sink support cabinet for drop-in sink with vertical fascia and angled ABA profile, also referred to as ABA sink cabinet. Removable front panel to permit access to plumbing. Medium density M-3 particle board core construction faced with high pressure vertical grade decorative plastic laminate on exposed surfaces and melamine on semi-exposed and concealed surfaces; plastic laminate edge banding. Includes all attaching hardware including support rail.

A solid, nonporous countertop approximately 36”W x 22”D with an undercounter sink combination. The countertop is an acrylic-based solid surface product with a standard thickness of 1”, and a 4” butt backsplash/curb. Surfaces will be easy to clean and maintain. Also referred to as a work surface or work top with sink. Available in a choice of colors, depths and sink shapes. Used for various applications in patient rooms, restrooms and throughout the facility. Usually a part of a casework interior design program. Unit does not include the drain and faucet.

Bedside cabinet for storage of both the patient's personal items and small patient support items. Approximately 31” high X 21” wide X 19” deep with one (1) drawer and one (1) closed storage closet. Drawer is removable so interior can be sanitized. May come in a 3 drawer version.

36W x 24 D adjustable height electric pedestal table with C-foot configuration and integral wire management trough or tray. Height range varies by manufacturer, and model, approximately 22 to 48 inches. Steel tube construction with powder coat finish, and 1 inch thick top with high pressure laminate or wood veneer surface. System includes integral electrical components (including control box, cable trough, power cord for table; U.L. listed pop-up power strip with minimum of two simplex receptacles, data and/or USB ports as needed per facility preference.

Occasional lamp table (end table) approximately 20” high X 27” wide X 27” deep with choice of finishes (wood, oak veneer, or high pressure laminate).

Step-on wastepaper basket with inner liner and foot pedal activated flip top.

Table lamp, 27-34” high X 6” wide X 6” deep with linen shade. Convenience outlet required at point of use.

Whiteboard unit, approximately 36” H x 48” W consisting of a white porcelain enamel writing surface with an attached chalk tray. Magnetic surface available. Image can be easily removed with a standard chalkboard eraser. For use with water color pens. Unit is ready to hang.

Clock, 12” diameter. Round surface, easy to read numbers with sweep second hand. Wall mounted unit for use when impractical to install a fully synchronized clock system. Battery operated, (batteries not included).

Bedside color television. The small size allows the set to be mounted on a "gravity-free" support arm which permits the patient to position the TV for comfortable viewing. The television includes an earphone jack and an AM/FM radio. Database pricing includes television, support arm, support arm wall mount, remote power supply and remote power supply wall mount. Power supply electrical requirement is approximately 1 amp at 120 V per television.

A high definition (HDTV) multimedia, slim design, 60"W to 65"W color television. The TV will have a 16:9 wide screen aspect ratio with full HD 1080p resolution and HDMI connections. TV may be LED, Plasma or LCD. TV will include a stand.

Air flowmeter. Unit has a stainless steel needle valve with clear flowtube for connection to 50 PSI air outlet from central pipeline system. Requires the appropriate adapter for connection to the wall outlet and fitting to connect to tubing. Database prices reflect fittings with an attached DISS power outlet. Other outlet and adapter configurations are available.

Oxygen flowmeter. Consists of a clear crystal flowtube calibrated to 3.5 or 8 LPM depending on manufacturer. For oxygen regulation in hospital settings. Database pricing includes DISS fitting and DISS power outlet and wall adapter. Other fitting and adapter configurations are available.

Vacuum pressure regulator for connection to central piped vacuum system. Standard display scale is graduated at least from 0 to 200mm Hg of vacuum. Displays on specialized regulators may cover other vacuum ranges. Regulator type (continuous, intermittent, continuous/intermittent, surgical, pediatric, thoracic, etc.) as required. To be used in delivery, neonatal, pediatrics or any area where suction is required. Database pricing reflects continuous regulators graduated to 200 mm Hg with a full line vacuum selection switch and DISS configured inlets and outlets.

Mobile linen hamper with hand or foot operated lid. Made of heavy tubular stainless steel with heavy gauge welded steel platform. Holds 25" hamper bags. Mounted on ball bearing casters. For linen transport in hospitals and clinics.

A biohazard waste container with a step-on lid. The container will have a capacity of approximately 12 gallons and be made of a fire safe material.

Aneroid sphygmomanometer. Unit is wall mounted and has large graphic dial display for easy reading from all angles. It has a 90 degree (angle) swivel and 10 degree (angle) forward tilt to reduce glare. Unit accuracy is within 1% of reading. Sturdy impact-resistant construction.

Electronic sphygmomanometer. LCD displays non-invasive blood pressure, pulse rate and temperature. Used in hospitals and clinics. Includes an optional mobile stand.
The infusion syringe pump ensures highly accurate volume delivery and consistent flow for small volumes (<50 ml) of pharmacologic agents or thick feeding solutions. It shall be small, lightweight construction, making it transportable. Shall have menu-driven programming capable of flow rates (e.g. 0.1 or 1.0 mL/hr) that are intended for long-term bedside use and/or critical care patient transport, plunger positioning sensor, LCD display for easy viewing, volume limit programming to serve as a convenient cue of volume or dose delivery completion and multiple delivery modes for all applications requiring precisely controlled infusion rates. The infusion pump shall have automatic syringe size sensing which will give the flexibility to accept a wide range of syringe sizes (up to 60 mL) from different manufacturers. Shall be battery powered/AC adapter.

Adjustable IV stand with 4-hook arrangement. Stand has stainless steel construction with heavy weight base. It adjusts from 66 inches to 100 inches and is mounted on conductive rubber, ball bearing, swivel casters. Stand is used for administering intravenous solutions.

Volumetric infusion pump. Pump is self-regulating with automatic sensor and adjustable rate. Equipped with visual and audible alarms and up to 10 hour capacity battery. For the administration of a wide variety of therapeutic agents where precise control is required. Unit provides individual control to IV lines simultaneously.

Electric patient bed for special care areas. Unit features a control panel for the patients operation, IV rod locations and a full range of positions. Includes safety sides, thermal overload protection in the motors, provisions for chest x-rays and fluoroscopy. Bed deck is x-ray translucent.

Overbed table. Adjustable height table constructed of heavy gauge steel. Mounted on 2” diameter twin swivel casters with bumper caps. Table top is constructed with a high pressure plastic laminated surface that resists chipping, scratching, and staining. It includes a vanity tray and a mirror. Table is designed for use over bed, wheelchair or large chair.

A high quality 1/4” polished float glass mirror 36X18, framed in a one-piece, bright polished, stainless steel channel frame with 90° mitered corners. All edges of the mirror are protected by absorbing filler strips. Mirror has a galvanized steel back with integral horizontal hanging brackets and wall hanger for concealed mounting. For mounting above single wall mounted lavatories located in toilet areas, Doctors examination offices, etc. May also be used above double lavatories, either wall or countertop mounted, found in restroom areas.

An overhead rail system specifically designed for patient lifting and movement for a single bed patient room including the bathroom. The system will consist of recessed or ceiling mounted primary and secondary rails, lift motor with rolling carriage, patient harness or seat, and a hand controller or control box with charger. System will facilitate lifting and movement of patient to and from bed to gurney, chair, bath, commode, or other requirement. Minimum lift capability is 550 pounds. Custom design of track layout by manufacturer is essential to meet individual facility requirements.

</table>
A surface mounted, satin finish stainless steel, 1” diameter, towel bar. Support posts and flanges are one piece, chrome-plated, cast heavy brass with satin finish. Towel bar shall not rotate within support posts. Available in 18”, 24” and 30” widths. For general purpose use in shower or bathtub rooms. Pricing based upon a suggested standard width of 18”.

A solid, nonporous countertop approximately 36”W x 22”D with an undercounter sink combination. The countertop is an acrylic-based solid surface product with a standard thickness of 1”, and a 4” butt backsplash/curb. Surfaces will be easy to clean and maintain. Also referred to as a work surface or work top with sink. Available in a choice of colors, depths and sink shapes. Used for various applications in patient rooms, restrooms and throughout the facility. Usually a part of a casework interior design program. Unit does not include the drain and faucet.

Wastepaper basket, fire resistant, approximately 40 quart capacity. This unit is used to collect and temporarily store small quantities of paper refuse in patient rooms, administrative areas and nursing stations. Size and shape varies depending on the application and manufacturer selected.

Shall be a hydraulically height-adjustable shower trolley for patient transfer and shower. It shall be approximately 77” long x 30” wide with minimum height adjustments range between 23 - 33”. It shall have a minimum lift capacity of 330 pounds. Casters shall be a minimum of 4” with wheel locking brakes. Shower Trolley may be configured to work manually or with a battery/electric height adjustment. The unit shall come complete with a wall panel that includes a patient shower and disinfection system, thermostatic mixer and temperature gauge and a stainless steel flush sink.

Wall mounted, vitreous china lavatory (approximate bowl size 7”x15”x10”) with: straight-front apron, straight or contoured back; faucet holes on 4” centers; gooseneck spout; wrist blade handles; and grid strainer. It shall be suitable for use in clinics, offices, washrooms or patient care areas.

A complete, barrier-free, single hand-held, personal shower system. The shower system includes: pressure balanced mixing valve with high temperature limit stop; personal hand shower; shower hose; wall supply; and slide bar. For general purpose use throughout the facility in shower stalls.

Siphon jet water closet/toilet. This unit is wall hung with an elongated bowl, top spud flushometer, seat with open front and check hinge, and carrier. Used in restrooms throughout the health care facility.

### CT020 Countertop, Solid Surface
- **Description:** A solid, nonporous countertop with a smooth seamless appearance. Easy to clean and maintain and with proper cleaning does not support the growth of mold. An acrylic-based solid surface product. Standard thickness of 1”, and a 4” butt backsplash/curb. Also referred to as a work surface or work top. Available in a choice of colors and depths. Used in lab and other hospital areas requiring optimum physical and chemical resisting properties.

### F0225 Chair, Dining Room
- **Description:** Dining room chair with glides. Chair has straight legs with cushioned cloth or vinyl seat.

### F0796 Table, Dining, Residential
- **Description:** Dining table for use in a residential setting. Tabletop could be of solid wood or wood veneers. Legs may be wood or metal with glides. Table allows 6-8 people to sit comfortably. Center leaf is optional.

### F2015 Basket, Wastepaper, Metal/Plastic, 2 Swinging Doors
- **Description:** Metal receptacle for soiled / used towels or waste. Equipped with a removable tapered top with two independently operating self-closing, spring hinged doors. Used in public facilities for the collection and temporary storage of refuse.

### M0515 Television, HD, 40” Class
- **Description:** High definition (HDTV) multimedia flat panel LED 40” class display television. The TV will have a 16:9 wide screen aspect ratio, minimum of 1920 x 1080 display resolution, digital tuner, minimum refresh rate of 60Hz, minimum of two HDMI ports and 1 USB port ENERGY STAR certified.

</table>
A5212 Bracket, Television, Wall-Mounted, Tilt/Angle 1 VV A wall mounted, tilt/angled TV bracket for 37” to 80” TVs. Mount will be a universal and VESA compliant unit with a load capacity of up to 130 lbs.

A5220 Bracket, Television, Wall Backing 1 CC Wall mounted television bracket backing which provides additional support and strength for the installation of the television bracket. Option available for interior or exterior plate and sized for 12” 16” or 24” stud spacing.

A6046 Artwork, Decorative, With Frame 1 VV This JSN is to be used for determining and defining location of decorative artwork

F0255 Chair, Easy 1 VV Easy chair approximately 35” high X 28” wide X 32” deep with arms and floor glides. Arms, back and seat are foam padded and upholstered in woven textile fabric or vinyl.

F0280 Chair, Swivel, Low Back 1 VV Low back contemporary swivel chair, 37” high X 25” wide X 31” deep with a five (5) caster swivel base, arms and foam padded seat and back upholstered with either woven textile fabric or vinyl.

F0370 Sofa, Sleeper, Upholstered 1 VV A sleeper sofa with a highly durable, stain resistant and long lasting fabric upholstery. The sleeper sofa will be designed to limit its footprint when in the sleep configuration to approximately that in the sofa configuration. The unit is used in hospital patient rooms and hospital staff lounges. Unit will also include drawer storage for linens.

F0710 Table, Computer, With Print Shelf 1 VV Computer work table, approximately 31” high X 40” wide X 24” deep with retractable shelf(s) for keyboard and/or extra work space, adjustable shelves for printer and printer paper, and (optional) dual wheel casters (two locking).

F0740 Table, Occasional, Lamp 1 VV Occasional lamp table (end table) approximately 20” high X 27” wide X 27” deep with choice of finishes (wood, oak veneer, or high pressure laminate).

F2000 Basket, Wastepaper, Fire Resistant 1 VV Wastepaper basket, fire resistant, approximately 40 quart capacity. This unit is used to collect and temporarily store small quantities of paper refuse in patient rooms, administrative areas and nursing stations. Size and shape varies depending on the application and manufacturer selected.

F2420 Lamp, Table, With Shade 1 VV Table lamp, 27-34” high X 6” wide X 6” deep with linen shade. Convenience outlet required at point of use.

F2435 Lamp, Desk, Fluorescent 1 VV Fluorescent desk lamp, approximately 13”H X 9”W X 6” D with a 14” wide X 2” deep shade and two (2) 15 Watt fluorescent tubes. Size and lamp shape may vary. Used for general reading luminosity. Convenience outlet required at point of use.

F3200 Clock, Battery, 12” Diameter 1 VV Clock, 12” diameter. Round surface, easy to read numbers with sweep second hand. Wall mounted unit for use when impractical to install a fully synchronized clock system. Battery operated, (batteries not included).

M0506 Television, Flat Screen 1 VV Flat screen television with approximately 32” to 40” diagonal screen size. The TV will have built-in speakers, NTSC tuner, a 16:9 wide screen aspect ratio, a minimum of 1280 x 768 resolution and a remote control.

M1801 Computer, Microprocessing, w/Flat Panel Monitor 1 VV Desk top microprocessing computer. The unit shall consist of a central processing mini tower, flat panel monitor, keyboard, mouse and speakers. The system shall have the following minimum characteristics: a 2.8 GHz Pentium processor; 512 MB memory; 80GB hard drive; 32/48x CD-ROM/DVD combo; 1.44MB network interface card; video 32 MB NVIDIA; a 18 inch flat panel monitor. The computer is used throughout the facility to input, manipulate and retrieve information.

Page 142 of 403
THIS TYPICAL INCLUDES:
1 Wall Mounted Rail
1 Locked Storage Container
2 Tray/Shelves
1 Drawer, 3”H
3 Drawers, 6”H
2 Drawers, 9”H
1 Tray/Shelf Divider
Drawer Organizer Bins

Consider the need for an E0921 to transport the locker from place to place.

Medical/Surgical Supply locker, Wall Mounted, approximately 23”W x 20”D. THIS TYPICAL INCLUDES:
1 Wall Mounted Rail
1 Locked Storage Container
4 Tray/Shelves
5 Drawers, 3”H
2 Drawers, 6”H
2 Tray/Shelf Dividers
Drawer Organizer Bins

Consider the need for an E0921 to transport the locker from place to place.

Wastepaper basket, fire resistant, approximately 40 quart capacity. This unit is used to collect and temporarily store small quantities of paper refuse in patient rooms, administrative areas and nursing stations. Size and shape varies depending on the application and manufacturer selected.

Telephone, wall mounted, 1 line.

Disposable soap dispenser. One-handed dispensing operation. Designed to accommodate disposable soap cartridge and valve.

A touch free wall-mounted hand sanitizer dispenser. For use throughout a healthcare facility. Unit does not include the sanitizing liquid. Units are battery operated.

A surface mounted, satin finish stainless steel, single-fold, paper towel dispenser. Dispenser features: tumbler lock; front hinged at bottom; and refill indicator slot. Minimum capacity 400 single-fold paper towels. For general purpose use throughout the facility.

The unit is designed for the disposal of sharps and complies with OSHA guidelines for the handling of sharps. It shall house a 5 quart container and be capable of being mounted on a wall. It shall have a glove dispenser attached. The unit shall be secured by a locked enclosure.

Standing height under counter base cabinet with an adjustable shelf and two half width drawers above solid hinged doors. Also referred to as a combination cabinet or a drawer and cupboard cabinet. For general purpose use throughout the facility.

<tr>
<td>M4645</td>
<td>Patient Transfer Device</td>
<td>1</td>
<td>VV</td>
<td>A patient transfer board designed to make lateral patient transfers safer for staff and be more comfortable for the patients. The board uses a smooth, low friction and static free surface to eliminate the need for metal rollers. The board has a soft foam core that makes them lightweight for ease of use and storage. The long board device also enables the transfer of a patient in the seated or Fowler position. The boards come in three sizes with the long board being foldable. The dimensions and price are for the long wide board.</td>
</tr>
</tbody>
</table>
### Stretcher, Mobile, Trauma

A trauma stretcher designed for use in both emergency and trauma situations. The stretcher allows for easy patient access and their easy transfer. It will have a patient load capacity of at least 700 pounds. It will have superior stability, mobility and braking capabilities. It will have a strong I-beam type construction. The height will be adjustable with manual backrest. Stainless or painted steel top and chassis. Features 8” conductive casters, with lock and brake, folding, tuck-away side-rails and IV poles and a flame retardant antibacterial mattress.

### Wheelchair, Patient Transport, Folding

Folding patient transport wheelchair. Constructed of chrome plated steel with detachable armrest and footrests. Unit has heavy duty front casters with sealed radial high-precision ball bearing assembly. Unit is used for patient transport.

### Wheelchair, Patient, Bariatric, Transport, Folding

Folding bariatric patient transport wheelchair with a capacity of at least 500 lbs. Constructed with a heavy duty steel frame and double cross brace, with detachable armrest and swing away footrests. Unit has heavy duty front casters and rear wheels with precision wheel bearings in front and rear assembly. Unit is used for patient movement.

</tbody>
</table>
### CT020 Countertop, Solid Surface
- **QTY:** 7
- **ACQ/INS:** CC
- **DESCRIPTION:** A solid, nonporous countertop with a smooth seamless appearance. Easy to clean and maintain and with proper cleaning does not support the growth of mold. An acrylic-based solid surface product. Standard thickness of 1”, and a 4” butt backsplash/curb. Also referred to as a work surface or work top. Available in a choice of colors and depths. Used in lab and other hospital areas requiring optimum physical and chemical resisting properties.

### F0225 Chair, Dining Room
- **QTY:** 4
- **ACQ/INS:** VV
- **DESCRIPTION:** Dining room chair with glides. Chair has straight legs with cushioned cloth or vinyl seat.

### F0795 Table, Dining
- **QTY:** 1
- **ACQ/INS:** VV
- **DESCRIPTION:** Metal receptacle for soiled / used towels or waste. Equipped with a removable tapered top with two independently operating self-closing, spring hinged doors. Used in public facilities for the collection and temporary storage of refuse.

### F2015 Basket, Wastepaper, Metal/Plastic, 2 Swinging Doors
- **QTY:** 1
- **ACQ/INS:** VV
- **DESCRIPTION:** A combination whiteboard and bulletin board, half LCS and half cork. Available with either aluminum or wood frame. It can be used in patient rooms or in any appropriate space in the facility.

### F3065 Whiteboard/Bulletin Board, Combination
- **QTY:** 1
- **ACQ/INS:** VV
- **DESCRIPTION:** Clock, 12” diameter. Round surface, easy to read numbers with sweep second hand. Wall mounted unit for use when impractical to install a fully synchronized clock system. Battery operated, (batteries not included).

### F3200 Clock, Battery, 12” Diameter
- **QTY:** 1
- **ACQ/INS:** VV
- **DESCRIPTION:** Space saving front to back automatic coffee maker. This unit includes a heating tank, connection for a cold water supply, decanter service with three burners, funnel and a water flow controller. The unit is used for semi-automatic coffee brewing in cafeterias and commercial institutions. The unit automatically shuts off the water flow when enough has passed through to fill the pot. The unit is normally provided plumbed with a hot water faucet to the side for making other hot drinks (tea, cider, cocoa, etc.). The database height dimension does not include the clearance for coffee decanters warming on the upper burners.

### K1552 Brewer, Coffee, Auto, Elect, 3 Burner, Front/Back
- **QTY:** 1
- **ACQ/INS:** VV
- **DESCRIPTION:** Counter mounted microwave oven for average duty use. The exterior cabinet can be metal or heavy duty impact resistant plastic. The oven delivers instant energy for rapid heating, defrosting or prime cooking. The oven has touch pad controls, digital timer, power level selector and preprogrammed selectors for commonly cooked items. This oven is commonly found in staff lounges.

### K4665 Oven, Microwave, Consumer
- **QTY:** 1
- **ACQ/INS:** VV
- **DESCRIPTION:** High definition (HDTV) multimedia flat panel LED 40” class display television. The TV will have a 16:9 wide screen aspect ratio, minimum of 1920 x 1080 display resolution, digital tuner, minimum refresh rate of 60Hz, minimum of two HDMI ports and 1 USB port ENERGY STAR certified.

### M0515 Television, HD, 40” Class
- **QTY:** 1
- **ACQ/INS:** VV
- **DESCRIPTION:** Refrigerator/freezer unit. This type unit includes a food saver system that helps keep food fresher. It also includes roll out wheels and is equipped for an optional automatic icemaker. This unit is of commercial or residential design and use.

Standing height under counter base cabinet with an adjustable shelf and a full width drawer above a solid right or left-hinged door (appropriate door hinge configuration to be indicated on equipment elevation drawings). Also referred to as a combination cabinet or a drawer and cupboard cabinet. For general purpose use throughout the facility.

Standing height under counter base cabinet with four full width drawers of equal height. Also referred to as a drawer cabinet. For general purpose use throughout the facility.

Standing height under counter base sink cabinet with solid hinged doors. Also referred to as a double-door sink cabinet. For general purpose use throughout the facility where a sink is to be used. Coordinate actual clear cabinet dimension with the actual outside dimension of sink that is specified to ensure that they are compatible.

Wall hung cabinet with two adjustable shelves, solid right or left-hinged door (appropriate door hinge configuration to be indicated on equipment elevation drawings), and sloping top. Also referred to as a solid hinged single door case. For general purpose use throughout the facility.

Single compartment stainless steel sink, drop-in, self-rimming, ledge-type, connected with a drain and provided with a mixing faucet. It shall also be provided with pre-punched fixture holes on 4” center, integral back ledge to accommodate deck-mounted fixtures, brushed/polished interior and top surfaces, and sound deadened. Recommended for use in suspended or U/C/B sink cabinets having a high plastic laminate or Chemsurf laminate countertop/work surface. For general purpose use throughout the facility.

A solid, nonporous countertop with a smooth seamless appearance. Easy to clean and maintain and with proper cleaning does not support the growth of mold. An acrylic-based solid surface product. Standard thickness of 1”, and a 4” butt backsplash/curb. Also referred to as a work surface or work top. Available in a choice of colors and depths. Used in lab and other hospital areas requiring optimum physical and chemical resisting properties.

A combination whiteboard and bulletin board, half LCS and half cork. Available with either aluminum or wood frame. It can be used in patient rooms or in any appropriate space in the facility.

Clock, 12” diameter. Round surface, easy to read numbers with sweep second hand. Wall mounted unit for use when impractical to install a fully synchronized clock system. Battery operated, (batteries not included).

Space saving front to back automatic coffee maker. This unit includes a heating tank, connection for a cold water supply, decanter service with three burners, funnel and a water flow controller. The unit is used for semi-automatic coffee brewing in cafeterias and commercial institutions. The unit automatically shuts off the water flow when enough has passed through to fill the pot. The unit is normally provided plumbed with a hot water faucet to the side for making other hot drinks (tea, cider, cocoa, etc.). The database height dimension does not include the clearance for coffee decanters warming on the upper burners.
### Oven, Microwave, Consumer
1 VV

Counter mounted microwave oven for average duty use. The exterior cabinet can be metal or heavy duty impact resistant plastic. The oven delivers instant energy for rapid heating, defrosting or prime cooking. The oven has touch pad controls, digital timer, power level selector and preprogrammed selectors for commonly cooked items. This oven is commonly found in staff lounges.

### Television, HD, 40” Class
1 VV

High definition (HDTV) multimedia flat panel LED 40” class display television. The TV will have a 16:9 wide screen aspect ratio, minimum of 1920 x 1080 display resolution, digital tuner, minimum refresh rate of 60Hz, minimum of two HDMI ports and 1 USB port ENERGY STAR certified.

### Refrigerator/Freezer, 20 Cubic Feet
1 VV

Refrigerator/freezer unit. This type unit includes a food saver system that helps keep food fresher. It also includes roll out wheels and is equipped for an optional automatic icemaker. This unit is of commercial or residential design and use.

</table>

Wall mounted diaper changing table for use in public restrooms. Unit is a fold down system that folds upward when not in use for minimal intrusion into the room. Changing surface is contoured and has safety belt to insure that an infant will not fall from the table. Table is designed to hold no less than 250 pounds static weight. Closed dimensions are approximately 21" H x 36" W x 5" D. Open dimensions vary according to style. One system’s open dimensions are 15” high, 32” wide and 19” deep.

Disposable soap dispenser. One-handed dispensing operation. Designed to accommodate disposable soap cartridge and valve.

A surface mounted, sensor activated, automatic, roll paper towel dispenser. The unit dispenses a paper towel automatically only when hands are in position below the dispenser for maximum sanitation and hygiene. May include adjustable settings for sheet length, time delay, and sensor range. Unit is battery operated or with optional AC power adapter.

A 1-1/4" diameter, satin finish stainless steel, peened gripping surface, 2 wall toilet stall/room, grab bar with concealed mounting flanges. Snap over flanges are provided to conceal mounting screws. A selection of mounting kits and concealed anchor devices are available from the manufacturers for different types of installations. Grab bar shall comply with barrier-free accessibility guidelines for structural strength. For typical water closet applications in toilet stalls and rooms where ADA (American's With Disabilities Act) requirements must be met.

A 1-1/4" diameter, satin finish stainless steel, double garment hook. Equipped with a concealed mounting bracket that is secured to a concealed wall plate. For general purpose use throughout the facility to hang various items of apparel.

A concealed surface mounted, double roll, satin finish stainless steel, toilet tissue dispenser. Unit accommodates two standard-core toilet tissue rolls through 5” in diameter. Spindles are chrome plated plastic with a heavy-duty internal spring and turn freely for non-controlled delivery. For general purpose use in restrooms.

A solid, nonporous countertop approximately 36"W x 22"D with an undercounter sink combination. The countertop is an acrylic-based solid surface product with a standard thickness of 1”, and a 4” butt backsplash/curb. Surfaces will be easy to clean and maintain. Also referred to as a work surface or work top with sink. Available in a choice of colors, depths and sink shapes. Used for various applications in patient rooms, restrooms and throughout the facility. Usually a part of a casework interior design program. Unit does not include the drain and faucet.

Metal receptacle for soiled / used towels or waste. Equipped with a removable tapered top with two

Siphon jet water closet/ toilet. This unit is wall hung with an elongated bowl, top spud flushometer, seat with open front and check hinge, and carrier. Used in restrooms throughout the health care facility.

A solid, nonporous countertop with a smooth seamless appearance. Easy to clean and maintain and with proper cleaning does not support the growth of mold. An acrylic-based solid surface product. Standard thickness of 1", and a 4" butt backsplash/curb. Also referred to as a work surface or work top. Available in a choice of colors and depths. Used in lab and other hospital areas requiring optimum physical and chemical resisting properties.

A solid, nonporous countertop approximately 36" W x 22" D with a undercounter sink combination. The countertop is an acrylic-based solid surface product with a standard thickness of 1", and a 4" butt backsplash/curb. Surfaces will be easy to clean and maintain. Also referred to as a work surface or work top with sink. Available in a choice of colors, depths and sink shapes. Used for various applications in patient rooms, restrooms and throughout the facility. Usually a part of a casework interior design program. Unit does not include the drain and faucet.

A mobile computer cart for use throughout the facility. The cart dimensions will be approximately 45° H x 30° W x 22" D with casters. May include drawers and miscellaneous other accessories that will be determined at time of purchase. This Typical may include:

- 1 Cart Body, w/Computer Support, Style-A Narrow, w/Raised Edge Top
- 1 Flip-Up Shelf
- 1 Sharps Container Holder
- 1 Wastebasket
- 1 Chart Holder
- 2 Drawers, 3" H
- 2 Drawers, 6" H
- Accessory Rail, Side Drawer Organizer Bins

THIS TYPICAL INCLUDES:
- 1 Cart Body, Style-A Narrow, w/Raised Edge Top
- 2 Drawers, 3" H
- 4 Drawers, 6" H
- Accessory Rail, Side Drawer Organizer Bins

Upholstered side chair, 32" high X 21" wide X 23" deep with arms, padded seats and padded backs. Seat height is a minimum of 17". Available with or without sled base.

Individual work table with tilt top. 11/8" all laminate top, Teemoldings edge bumper strip, height-adjustable legs with selfindexing, powder-coated steel base with chrome telescoping uprights to resist scratching, top tilts 0° - 50°, 35"L x 29"W x 23" - 34"H

Wastepaper basket, fire resistant, approximately 40 quart capacity. This unit is used to collect and temporarily store small quantities of paper refuse in patient rooms, administrative areas and nursing stations. Size and shape varies depending on the application and manufacturer selected.

Rectangular steel waste receptacle with step-on lid and 24 gallon capacity. The receptacle is used to collect and temporarily store small quantities of paper refuse. Can be used in restrooms, patient areas, laboratories, pharmacies, etc.

Clock, 12" diameter. Round surface, easy to read numbers with sweep second hand. Wall mounted unit for use when impractical to install a fully synchronized clock system. Battery operated, (batteries not included).

Seated stepping ergometer for total body, arms and/or legs low impact conditioning. The unit features a closed kinetic chain action which combines reciprocal stepping and arm action. The arm settings and seat are adjustable. A battery operated performance computer allows for adjusting workload level. The unit has a heavy duty steel frame construction with low-density plastic covers.

CFES (computerized functional electrical stimulation) ergometer provides the means for the neurologically impaired individual to stay as healthy as possible using a combination of FES-induced muscle contractions variety of Stimulus Channels: - Maximum stimulus intensity for each channel is independently programmable.

High definition (HDTV) multimedia flat panel LED 40” class display television. The TV will have a 16:9 wide screen aspect ratio, minimum of 1920 x 1080 display resolution, digital tuner, minimum refresh rate of 60Hz, minimum of two HDMI ports and 1 USB port ENERGY STAR certified.

Desk top microprocessing computer. The unit shall consist of a central processing mini tower, flat panel monitor, keyboard, mouse and speakers. The system shall have the following minimum characteristics: a 2.8 GHz Pentium processor; 512 MB memory; 80GB hard drive; 32/48x CD-ROM/DVD combo; 1.44MB network interface card; video 32 MB NVIDIA; a 18 inch flat panel monitor. The computer is used throughout the facility to input, manipulate and retrieve information.

High resolution computer printer with a variety of type styles and sheet/envelope feeder trays. Database information reflects network ready, medium duty office style laser printers. Other types of printers (bubble jet, dot matrix, line or plotter) as well as light or heavy use capabilities are available.

Stationary, wire, shelving unit. Unit has fully adjustable shelves constructed of stainless steel. For use in general purpose storage areas. Shelving is provided in various sizes and configurations. Price provided is for a unit approximately 74”H x 18”D x 48”W with four shelves.

Mobile linen hamper with hand or foot operated lid. Made of heavy tubular stainless steel with heavy gauge welded steel platform. Holds 25” hamper bags. Mounted on ball bearing casters. For linen transport in hospitals and clinics.

Mobile, non-powered patient transfer device that can support a minimum of 400 lbs. Device should consist of a patient foot plate, knee pads, support straps, heavy duty locking casters and handle bar for stability.

Refrigeration unit for twelve cold therapy packs. Unit features thermostatic temperature control, automatic defrosting and refrigeration grade insulation. Interior chamber is designed to facilitate periodic cleaning. Smaller capacity models are available.

Moist Heat Therapy Unit, also referred as a Hydrocollator Heating Unit, are used to apply effective heat to hot packs used in moist heat therapy. Unit is supplied ready for immediate use and requires no special plumbing. Unit features: stainless steel insulated wall, thermostatically controlled, casters (mobile units only), and standard size Hot Packs. Other unit sizes and accessories (variety of hot packs, tongs, side table rack, etc.) are available.

Ergometer for measuring upper body exertion during an exercise regimen. The unit consists of a seat and a hand crank mechanism at shoulder height. The unit is used for physical rehabilitation protocols and stress testing. The unit quantifiably measures the effort exerted by the patient.

Exercise mat. Mat is filled with 2” resilient antibacterial foam. Handles are provided for holding or transporting. Used in physical therapy.
Exercise platform with power height adjustment. The platform rests on one or two pedestal bases which contain the power mechanism for adjusting the table height. The platform top or removable mattress is covered with heavy duty, nylon-reinforced vinyl for durability. The adjustable height feature is designed to accommodate patients who have difficulty sitting or transferring from a wheelchair as well as providing an optimal working height for the physical therapist once the patient is on the table. Larger and smaller units as well as manual crank platform tables are available.

Drinking water fountain. This unit is semi-recessed and wall mounted at handicap level with an air cooled compressor. The unit provides easy access with push-bar/button. The unit provides cool drinking water in hospitals and commercial office buildings to include access by handicapped persons.

Wall mounted, slab type, vitreous china, lavatory (approximate bowl size 7”x15”x10”) with: faucet holes on 4” centers; gooseneck spout; wrist blade handles; and grid strainer. It shall be suitable for use in clinics, offices, washrooms or patient care area.

| E1500| Rail, MOD, W/MNTD, HX144XD                 | 1   | VV      | Wall mounted rail used for hanging (mounting) lockers, shelves and drawers on a wall. |
| F2000| Basket, Wastepaper, Fire Resistant         | 1   | VV      | Wastepaper basket, fire resistant, approximately 40 quart capacity. This unit is used to collect and temporarily store small quantities of paper refuse in patient rooms, administrative areas and nursing stations. Size and shape varies depending on the application and manufacturer selected. |
| P8710| Utility Center, Plumbing Connection        | 1   | CC      | Plumbing connection utility center, sometimes referred to as a 'GUY GRAY BOX'. This recessed utility center provides for hot and cold water connections and a drain connection at sink and other equipment locations. The utility center includes cutoff valves for the water connections, a plug seal for the drain and an outside cover to provide an aesthetic appearance when connections are no longer required. This center may be installed in locations where no plumbing fixtures are included in a design as a future flexibility device, saving many dollars for later facility modifications to incorporate sinks as functions change. |

- **Basket, Wastepaper, Fire Resistant (F2000)**: Wastepaper basket, fire resistant, approximately 40 quart capacity. This unit is used to collect and temporarily store small quantities of paper refuse in patient rooms, administrative areas and nursing stations. Size and shape varies depending on the application and manufacturer selected.
- **Waste Receptacle, 24 GAL (F2017)**: Rectangular steel waste receptacle with step-on lid and 24 gallon capacity. The receptacle is used to collect and temporarily store small quantities of paper refuse. Can be used in restrooms, patient areas, laboratories, pharmacies, etc.
- **Clock, Battery, 12" Diameter (F3200)**: Clock, 12" diameter. Round surface, easy to read numbers with sweep second hand. Wall mounted unit for use when impractical to install a fully synchronized clock system. Battery operated, (batteries not included).
- **Ergometer, Recumbent Bicycle, Computer Assisted (G1043)**: Computer assisted recumbent bicycle aerobic trainer. The trainer provides aerobic workouts on a computer controlled and monitored recumbent bicycle ergometer. The ergometer has several training routines and intensities which either the exerciser or a therapist can select. The unit display provides a readout of work accomplished as well as graphics to motivate the exerciser. Many models offer optional heart rate monitoring and wheels for easy mobility. Depending on the manufacturer and model, the computer is powered by the exerciser or an external source. The database electrical requirements are for those units requiring electrical power. The trainer is used for cardio-respiratory development in a gym or the exercise area of Physical Therapy.
- **Television, HD, 40" Class (M0515)**: High definition (HDTV) multimedia flat panel LED 40" class display television. The TV will have a 16:9 wide screen aspect ratio, minimum of 1920 x 1080 display resolution, digital tuner, minimum refresh rate of 60Hz, minimum of two HDMI ports and 1 USB port ENERGY STAR certified.
- **Printer, Computer (M1825)**: High resolution computer printer with a variety of type styles and sheet/envelope feeder trays. Database information reflects network ready, medium duty office style laser printers. Other types of printers (bubble jet, dot matrix, line or plotter) as well as light or heavy use capabilities are available.
- **Shelving, Storage, Wire, CRS, w/Adjustable Shelves (M2055)**: Stationary, wire shelving unit. Unit has fully adjustable shelves constructed of stainless steel. For use in general purpose storage areas. Shelving is provided in various sizes and configurations. Price provided is for a unit approximately 74"H x 18"D x 48"W with four shelves.
- **Hamper, Linen, Mobile, w/Lid (M3070)**: Mobile linen hamper with hand or foot operated lid. Made of heavy tubular stainless steel with heavy gauge welded steel platform. Holds 25" hamper bags. Mounted on ball bearing casters. For linen transport in hospitals and clinics.
- **Lift, Patient, Electric, 600 Lb Cap, Bariatric (M8085)**: A battery powered patient lift with an adjustable U shaped base and a minimum of 600 pound capacity for bariatric use. Unit comes with a battery charger. The unit is mounted on locking ball bearing casters for safety and stability and may require specialized slings. The database height refers to fully extended lifting arms. Designed for patient lifting and movement.
- **Ergometer, Upper Body (M8133)**: Ergometer for measuring upper body exertion during an exercise regimen. The unit consists of a seat and a hand crank mechanism at shoulder height. The unit is used for physical rehabilitation protocols and stress testing. The unit quantifiably measures the effort exerted by the patient.
M8210 Cart, Weight, Physical Therapy, w/Weights

1 VV

Physical therapy weight cart equipped with weights, two storage shelves, and racks to store dumbbells. Unit is constructed of quality hardwood and mounted on 4 heavy-duty casters. Used for storage of weights.

M8240 Parallel Bars, Physical Therapy

1 VV

Physical therapy parallel bars. Unit can have manual or electrically powered adjustments. Bar height is adjustable from 25” to 40” and the bar width is adjustable from 16” to 25”. Hand rails are chrome plated 1-1/2” steel tubing. Walking aisle is a minimum of 24” wide and finished in natural wood or covered with vinyl matting. Database information reflects 10’ or 12’ bar length electrically powered units.

M8270 Rack, Pack, Hot/Cold, Wall Mounted

1 VV

Wall mounted hot/cold pack rack. Unit is a stainless steel rack used to store and dry cold packs.

M8275 Pulley, Triplex

1 VC

Triplex pulley for physical therapy use. Unit consists of two handles at chest level, two handles at the floor, and two handles suspended from the ceiling. Unit features 20 to 27 pounds of adjustable weights.

P3100 Lavatory, Vitreous China, Slab Type

2 CC

Wall mounted, slab type, vitreous china, lavatory (approximate bowl size 7”x15”x10”) with: faucet holes on 4” centers; gooseneck spout; wrist blade handles; and grid strainer. It shall be suitable for use in clinics, offices, washrooms or patient care area.

R4650 Ice Maker, Flaked, With Dispenser

1 CC

Ice maker dispenser approximately 71” H x 19”D x 24”W. This unit provides flaked ice and cooled water automatically. The unit has a daily capacity up to 650 pounds and a 100 pound capacity stainless steel storage compartment with water station. Unit may be free-standing or counter-mounted, automatic load ice dispenser for food service and healthcare use. The unit is used in healthcare institutions and various commercial food service operations for dispensing ice.

A surface mounted, sensor activated, automatic, roll paper towel dispenser. The unit dispenses a paper towel automatically only when hands are place in position below the dispenser for maximum sanitation and hygiene. May include adjustable settings for sheet length, time delay, and sensor range. Unit is battery operated or with optional AC power adapter.

The unit is designed for the disposal of sharps and complies with OSHA guidelines for the handling of sharps. It shall house a 5 quart container and be capable of being mounted on a wall. It shall have a glove dispenser attached. The unit shall be secured by a locked enclosure.

Standing height under counter base cabinet with an adjustable shelf and two half width drawers above solid hinged doors. Also referred to as a combination cabinet or a drawer and cupboard cabinet. For general purpose use throughout the facility.

Stainless steel countertop (composition of heavy-gauge Type No. 304 stainless steel) having a smooth satin finish and integral 4" backsplash/curb. Also referred to as a corrosion-resistant steel work surface or work top. Available in various depths. Used in areas where excellent ease of cleaning, abrasion resistance, bacteria resistance, impact resistance, load capacity and moisture resistance, are of concern. Pricing based upon a 24" depth.

Wastepaper basket, fire resistant, approximately 40 quart capacity. This unit is used to collect and temporarily store small quantities of paper refuse in patient rooms, administrative areas and nursing stations. Size and shape varies depending on the application and manufacturer selected.

Wall mounted emergency eye wash station. The flow of water from the unit is activated by hand. Upon initiation of water flow the unit will operate hands free to provide streams of water to clear foreign particles or dilute caustic liquids from the eyes in emergency situations. Used in laboratories and areas of the hospital where employees are subject to foreign bodies or liquid material to the eyes.

Emergency tempering valve thermostatically mixes hot and cold water to provide a safe fluid supply for a single emergency eye/face wash with a flow rate of 10 gpm (38.8L)

Wall mounted, slab type, vitreous china, lavatory (approximate bowl size 7”x15”x10”) with: faucet holes on 4” centers; gooseneck spout; wrist blade handles; and grid strainer. It shall be suitable for use in clinics, offices, washrooms or patient care area.

Stationary, wire, shelving unit. Unit has fully adjustable shelves constructed of stainless steel. For use in general purpose storage areas. Shelving is provided in various sizes and configurations. Price provided is for a unit approximately 74”H x 18”D x 48”W with four shelves.

Computer assisted recumbent bicycle aerobic trainer. The trainer provides aerobic workouts on a computer controlled and monitored recumbent bicycle ergometer. The ergometer has several training routines and intensities which either the exerciser or a therapist can select. The unit display provides a readout of work accomplished as well as graphics to motivate the exerciser. Many models offer optional heart rate monitoring and wheels for easy mobility. Depending on the manufacturer and model, the computer is powered by the exerciser or an external source. The database electrical requirements are for those units requiring electrical power. The trainer is used for cardio-respiratory development in a gym or the exercise area of Physical Therapy.

High definition (HDTV) multimedia flat panel LED 40" class display television. The TV will have a 16:9 wide screen aspect ratio, minimum of 1920 x 1080 display resolution, digital tuner, minimum refresh rate of 60Hz, minimum of two HDMI ports and 1 USB port ENERGY STAR certified.

Desk top microprocessing computer. The unit shall consist of a central processing mini tower, flat panel monitor, keyboard, mouse and speakers. The system shall have the following minimum characteristics: a 2.8 GHz Pentium processor; 512 MB memory; 80GB hard drive; 32/48x CD-ROM/DVD combo; 1.44MB network interface card; video 32 MB NVIDIA; a 18 inch flat panel monitor. The computer is used throughout the facility to input, manipulate and retrieve information.

High resolution computer printer with a variety of type styles and sheet/envelope feeder trays. Database information reflects network ready, medium duty office style laser printers. Other types of printers (bubble jet, dot matrix, line or plotter) as well as light or heavy use capabilities are available.

Stationary, wire, shelving unit. Unit has fully adjustable shelves constructed of stainless steel. For use in general purpose storage areas. Shelving is provided in various sizes and configurations. Price provided is for a unit approximately 74"H x 18"D x 48"W with four shelves.

Mobile linen hamper with hand or foot operated lid. Made of heavy tubular stainless steel with heavy gauge welded steel platform. Holds 25" hamper bags. Mounted on ball bearing casters. For linen transport in hospitals and clinics.

A battery powered patient lift with an adjustable U shaped base and a minimum of 600 pound capacity for bariatric use. Unit comes with a battery charger. The unit is mounted on locking ball bearing casters for safety and stability and may require specialized slings. The database height refers to fully extended lifting arms. Designed for patient lifting and movement.

Refrigeration unit for twelve cold therapy packs. Unit features thermostatic temperature control, automatic defrosting and refrigeration grade insulation. Interior chamber is designed to facilitate periodic cleaning. Smaller capacity models are available.

Moist Heat Therapy Unit, also referred as a Hydrocollator Heating Unit, are used to apply effective heat to hot packs used in moist heat therapy. Unit is supplied ready for immediate use and requires no special plumbing. Unit features: stainless steel insulated wall, thermostatically controlled, casters (mobile units only), and standard size Hot Packs. Other unit sizes and accessories (variety of hot packs, tongs, side table rack, etc.) are available.

Counter mounted microwave oven for average duty use. The exterior cabinet can be metal or heavy duty impact resistant plastic. The oven delivers instant energy for rapid heating, defrosting or prime cooking. The oven has touch pad controls, digital timer, power level selector and preprogrammed selectors for commonly cooked items. This oven is commonly found in staff lounges.

Gas range with a standard or convection oven. The unit features a stainless steel front and top with painted sides; stainless steel sides are available. The range top can have a variety of configurations. The database specifications and pricing are for a six burner basic range with three burners in front and three burners in the rear. The oven has five matched rack position guides and three racks. The gas connections may be via a front or rear manifold. Different models have specific installation requirements, clearances from combustible materials and installation restrictions. Refer to the manufacturers' technical sheets. The database height dimension does not include the riser for an above range shelf. The database electrical specifications are for automatic pilot lighting. The unit is used in hospital food service operations.

Cabinet lift system motor operated to move a cabinet down to standard-height counter or 34” high, includes safety automatic shutoff, 20” vertical movement and 300 lbs. maximum lifting capacity, requires 110V GFCI power outlet; supporting mechanism should be anchored to wall studs or additional 2” x 4” horizontal blocks between studs, supports standard height wall cabinet, 48” wide max.

Large capacity automatic clothes washer with a heavy duty motor. The unit's control system programs load, cycle time, spin speed, fabric, water level and water temperature. The washer includes a bleach and/or fabric softener dispenser and a filter ring for trapping lint.

Automatic clothes dryer. Electric unit features automatic sensi-dry control with setting for different kinds of fabrics, timed cycle, removable lint filter, drum interior light and enamel finish.

Garbage disposal. A two (2) horsepower versatile waste disposal unit suitable for facilities where 500 to 1000 meals are prepared and served daily. Requires eight (8) gallons per minute water flow rate, and outlet flange tapped for a two (2) inch pipe. Unit will have a manual reversing switch and shall comply with MIL SPEC No. MIL-G-15840. Multiple electrical configurations are available

Refrigerator/freezer unit. This type unit includes a food saver system that helps keep food fresher. It also includes roll out wheels and is equipped for an optional automatic icemaker. This unit is of commercial or residential design and use.

Plumbing connection utility center, sometimes referred to as a 'GUY GRAY BOX'. This recessed utility center provides for hot and cold water connections and a drain connection at sink and other equipment locations. The utility center includes cutoff valves for the water connections, a plug seal for the drain and an outside cover to provide an aesthetic appearance when connections are no longer required. This center may be installed in locations where no plumbing fixtures are included in a design as a future flexibility device, saving many dollars for later facility modifications to incorporate sinks as functions change.

A solid, nonporous countertop approximately 36”W x 22”D with a undercounter sink combination. The countertop is an acrylic-based solid surface product with a standard thickness of 1”, and a 4” butt backsplash/curb. Surfaces will be easy to clean and maintain. Also referred to as a work surface or work top with sink. Available in a choice of colors, depths and sink shapes. Used for various applications in patient rooms, restrooms and throughout the facility. Usually a part of a casework interior design program. Unit does not include the drain and faucet.

Mobile linen hamper with hand or foot operated lid. Made of heavy tubular stainless steel with heavy gauge welded steel platform. Holds 25” hamper bags. Mounted on ball bearing casters. For linen transport in hospitals and clinics.

A complete, barrier-free, single hand-held, personal shower system. The shower system includes: pressure balanced mixing valve with high temperature limit stop; personal hand shower; shower hose; wall supply; and slide bar. For general purpose use throughout the facility in shower stalls.

Siphon jet water closet/ toilet. This unit is wall hung with an elongated bowl, top spud flushometer, seat with open front and check hinge, and carrier. Used in restrooms throughout the health care facility.

</tr>
</tbody>
</table>
M4255  Stand, IV, Adjustable  1  VV  Adjustable IV stand with 4-hook arrangement. Stand has stainless steel construction with heavy weight base. It adjusts from 66 inches to 100 inches and is mounted on conductive rubber, ball bearing, swivel casters. Stand is used for administering intravenous solutions.

M4266  Pump, Volumetric, Infusion, Multiple Line  1  VV  Volumetric infusion pump. Pump is self-regulating with automatic sensor and adjustable rate. Equipped with visual and audible alarms and up to 10 hour capacity battery. For the administration of a wide variety of therapeutic agents where precise control is required. Unit provides individual control to IV lines simultaneously.

M4655  Stretcher, Mobile, CRS, 9 Position  1  VV  Mobile stretcher. All corrosion resistant stainless steel construction. It consists of a tubular frame with side rails, a 9-position hydraulic base with pneumatic fowler adjustment, and a 2” pad. Unit is mounted on 8” conductive casters. Designed for patient transport as well as for minor surgical procedures.

M7470  Light, Surgical, Ceiling, Single, Small  1  CC  Ceiling mounted surgical light. Consists of a single lamp head up to 24” in diameter depending on the manufacturer. Unit provides heat filtered, color corrected light. Most lights require a minimum ceiling height of 8 feet 2 inches; check manufacturers’ specific recommendations. Light head is in a movable yoke attached to a column hanging from the ceiling. For minor surgery and obstetrical procedures. Physical dimensions refer to the retracted light; one length of the dual swing arm around the center mount for width and depth and the height is the combined lamp head and folded arms height.

M8810  Stand, Mayo  1  VV  Adjustable instrument table. Table is corrosion resistant stainless steel construction and is mounted on two casters with two skid rails. It has telescopic upright adjusts from 39 inches to 60 inches with automatic locking device, and removable 13”x19” instrument tray. Designed for use in operating and procedure rooms.

P3100  Lavatory, Vitreous China, Slab Type  1  CC  Wall mounted, slab type, vitreous china, lavatory (approximate bowl size 7”x15”x10”) with: faucet holes on 4” centers; gooseneck spout; wrist blade handles; and grid strainer. It shall be suitable for use in clinics, offices, washrooms or patient care area.

</tr>
</tbody>
</table>
A 1-1/4" diameter, satin finish stainless steel, peened gripping surface, 2 wall toilet stall/room grab bar mounted with concealed mounting flanges. Snap over flanges are provided to conceal mounting screws. A selection of mounting kits and concealed anchor devices are available from the manufacturers for different types of installations. The grab bar shall comply with barrier-free accessibility guidelines for structural strength. For typical water closet applications in toilet stalls and rooms where ADA (American's With Disabilities Act) requirements must be met.

A concealed surface mounted, double roll, satin finish stainless steel, toilet tissue dispenser. Unit accommodates two standard-core toilet tissue rolls through 5" in diameter. Spindles are chrome plated plastic with a heavy-duty internal spring and turn freely for non-controlled delivery. For general purpose use in restrooms.

Wall mounted, vitreous china lavatory (approximate bowl size 7"x15"x10") with: straight-front apron, straight or contoured back; faucet holes on 4" centers; gooseneck spout; wrist blade handles; and grid strainer. It shall be suitable for use in clinics, offices, washrooms or patient care areas.

Horizontal equipment mounting rail with lock mounting devices capable of; supporting up to 75 pounds each, being repositioned, and mounting and dismounting of equipment without the use of tools (special tools may be required to unlock adapter that was previously locked to the rail). The rail must be capable of supporting medical equipment and accessories normally found in exam or patient rooms. The rail system must be capable of mounting and dismounting equipment without leaving or creating new holes in the finished surface of the wall. The rail system utilizes a series of mounting plates and adapters specific to the device being mounted to the rail. The plate and adapter rail mounting kit must be specified to match the equipment being mounted to the equipment rail.

Disposable soap dispenser. One-handed dispensing operation. Designed to accommodate disposable soap cartridge and valve.

A touch free wall-mounted hand sanitizer dispenser. For use throughout a healthcare facility. Unit does not include the sanitizing liquid. Units are battery operated.

A surface mounted, satin finish stainless steel, single-fold, paper towel dispenser. Dispenser features: tumbler lock; front hinged at bottom; and refill indicator slot. Minimum capacity 400 single-fold paper towels. For general purpose use throughout the facility.

The unit is designed for the disposal of sharps and complies with OSHA guidelines for the handling of sharps. It shall house a 5 quart container and be capable of being mounted on a wall. It shall have a glove dispenser attached. The unit shall be secured by a locked enclosure.

A surface mounted, satin finish stainless steel, double garment hook. Equipped with a concealed mounting bracket that is secured to a concealed wall plate. For general purpose use throughout the facility to hang various items of apparel.

A surface mounted cubicle track, with curtain. Track constructed of thick extruded aluminum. Equipped with self lubricating carriers, beaded drop chain hooks, and flame resistant curtain. To include removable end caps. Designed to be suspended around patient areas where privacy is needed. Price listed is per foot of the track, curtains to be priced per quote.

This JSN is to be used for determining and defining location of decorative artwork.

Apron rail. Also referred to as an apron front, apron panel, or knee space rail. Used to close in front knee space area and/or provide work surface support between two base cabinets or a base cabinet and wall. Apron rails should be ordered in pairs to provide both front and rear work surface support.

Standing height under counter base cabinet with an adjustable shelf and two half width drawers above solid hinged doors. Also referred to as a combination cabinet or a drawer and cupboard cabinet. For general purpose use throughout the facility.

Wall hung cabinet with two adjustable shelves, framed-glass hinged doors, and sloping top. Also referred to as a framed-glass hinged double door wall case. For general purpose use throughout the facility.

Single compartment stainless steel sink, drop-in, self-rimming, ledge-type, connected with a drain and provided with a mixing faucet. It shall also be provided with pre-punched fixture holes on 4” center, integral back ledge to accommodate deck-mounted fixtures, brushed/polished interior and top surfaces, and sound deadened. Recommended for use in suspended or U/C/B sink cabinets having a high plastic laminate or Chemsurf laminate countertop/work surface. Coordinate actual outside sink dimensions with the actual clear dimension of cabinet specified to ensure that they are compatible. For general purpose use throughout the facility.

A solid, nonporous countertop with a smooth seamless appearance. Easy to clean and maintain and with proper cleaning does not support the growth of mold. An acrylic-based solid surface product. Standard thickness of 1”, and a 4” butt backsplash/curb. Also referred to as a work surface or work top. Available in a choice of colors and depths. Used in lab and other hospital areas requiring optimum physical and chemical resisting properties.

**A5109**  
**Grab Bar, 1-1/4" Dia., SS, 2 Wall, W/C Accessible**  
1 CC  
A 1-1/4" diameter, satin finish stainless steel, peened gripping surface, 2 wall toilet stall/room, grab bar with concealed mounting flanges. Snap over flanges are provided to conceal mounting screws. A selection of mounting kits and concealed anchor devices are available from the manufacturers for different types of installations. Grab bar shall comply with barrier-free accessibility guidelines for structural strength. For typical water closet applications in toilet stalls and rooms where ADA (American's With Disabilities Act) requirements must be met.

**A5145**  
**Hook, Garment, Double, SS, Surface Mounted**  
1 CC  
A surface mounted, satin finish stainless steel, double garment hook. Equipped with a concealed mounting bracket that is secured to a concealed wall plate. For general purpose use throughout the facility to hang various items of apparel.

**A5200**  
**Dispenser, Toilet Tissue, SS, 2-Roll, Surface Mntd**  
1 CC  
A concealed surface mounted, double roll, satin finish stainless steel, toilet tissue dispenser. Unit accommodates two standard-core toilet tissue rolls through 5" in diameter. Spindles are chrome plated plastic with a heavy-duty internal spring and turn freely for non-controlled delivery. For general purpose use in restrooms.

**F2010**  
**Basket, Wastepaper, Step-On**  
1 VV  
"Step-on" wastepaper basket with inner liner and foot petal activated flip top.

**P3000**  
**Lavatory, Vitreous China, Straight Back**  
1 CC  
Wall mounted, vitreous china lavatory (approximate bowl size 7"x15"x10") with: straight-front apron, straight or contoured back; faucet holes on 4" centers; gooseneck spout; wrist blade handles; and grid strainer. It shall be suitable for use in clinics, offices, washrooms or patient care areas.

**P9050**  
**Toilet, Wall Hung, Siphon Jet**  
1 CC  
Siphon jet water closet/toilet. This unit is wall hung with an elongated bowl, top spud flushometer, seat with open front and check hinge, and carrier. Used in restrooms throughout the health care facility.

4. Accessory Rail, Side Drawer Organizer Bins
5. Upholstered side chair, 32” high X 21” wide X 23” deep with arms, padded seats and padded backs. Seat height is a minimum of 17”. Available with or without sled base.
7. "Step-on" wastepaper basket with inner liner and foot petal activated flip top.
8. Forty four (44) gallon trash can, 32” high X 24” diameter, with lid. Used to collect and transport refuse from a point of origin to point of disposal (example: from soiled utility or a nursing unit to the trash compactor at housekeeping).
9. Air flowmeter. Unit has a stainless steel needle valve with clear flowtube for connection to 50 PSI air outlet from central pipeline system. Requires the appropriate adapter for connection to the wall outlet and fitting to connect to tubing. Database prices reflect fittings with an attached DISS power outlet. Other outlet and adapter configurations are available.
10. Oxygen flowmeter. Consists of a clear crystal flowtube calibrated to 3.5 or 8 LPM depending on manufacturer. For oxygen regulation in hospital settings. Database pricing includes DISS fitting and DISS power outlet and wall adapter. Other fitting and adapter configurations are available.
11. Vacuum pressure regulator for connection to central piped vacuum system. Standard display scale is graduated at least from 0 to 200 mm Hg of vacuum. Displays on specialized regulators may cover other vacuum ranges. Regulator type (continuous, intermittent, continuous/intermittent, surgical, pediatric, thoracic, etc.) as required. To be used in delivery, neonatal, pediatrics or any area where suction is required. Database pricing reflects continuous regulators graduated to 200 mm Hg with a full line vacuum selection switch and DISS configured inlets and outlets.
12. Desk top microprocessing computer. The unit shall consist of a central processing mini tower, flat panel monitor, keyboard, mouse and speakers. The system shall have the following minimum characteristics: a 2.8 GHz Pentium processor; 512 MB memory; 80GB hard drive; 32/48x CD-ROM/DVD combo; 1.44MB network interface card; video 32 MB NVIDIA; a 18 inch flat panel monitor. The computer is used throughout the facility to input, manipulate and retrieve information.
14. Frame for an infectious waste collection bag. Made of heavy tubular stainless steel with heavy gauge welded steel platform. Adjust to hold 18” or 25” trash bags. Mounted on ball bearing casters and includes permanently mounted hinged lid. Provides means of bagging infectious waste at point of waste generation.
15. Wall mounted otoscope and ophthalmoscope. Includes 6 foot line cord and plug and accepts and...
M4255 Stand, IV, Adjustable 3 VV Adjustable IV stand with 4-hook arrangement. Stand has stainless steel construction with heavy weight base. It adjusts from 66 inches to 100 inches and is mounted on conductive rubber, ball bearing, swivel casters. Stand is used for administering intravenous solutions.

M4266 Pump, Volumetric, Infusion, Multiple Line 3 VV Volumetric infusion pump. Pump is self-regulating with automatic sensor and adjustable rate. Equipped with visual and audible alarms and up to 10 hour capacity battery. For the administration of a wide variety of therapeutic agents where precise control is required. Unit provides individual control to IV lines simultaneously.

M4275 Pump, Continuous, Analgesia (PCA) 3 VV Continuous analgesia pump. Also known as a PCA or patient controlled analgesia pump. The unit provides a controlled, continuous or as required (PRN) dose of analgesia medications for postoperative patients. The patient can control administration of the prescribed drug up to a preset rate. The unit can be mounted to an IV pole and/or be small enough to be carried in a pouch. Use of this device speeds patient ambulation and reduces the length of hospital stays. Depending on the manufacturer, electrical requirements refer to either the unit itself or the battery recharging unit.

M4665 Stretcher, Recovery, Surgical 3 VV Recovery/surgical stretcher. Strong I-beam construction type unit. The height is adjustable with manual backrest and crank operated knee catch. Stainless or painted steel top and chassis. Features 8” or 10” conductive casters, with lock and brake, folding, tuck-away chrome side-rails and IV stand and a flame retardant antibacterial mattress. Designed for operating room transport or recovery applications.

M7040 Table, Overbed 3 VV Overbed table. Adjustable height table constructed of heavy gauge steel. Mounted on 2” diameter twin swivel casters with bumper caps. Table top is constructed with a high pressure plastic laminated surface that resists chipping, scratching, and staining. It includes a vanity tray and a mirror. Table is designed for use over bed, wheelchair or large chair.

M7405 Light, Exam, Ceiling Mounted 3 CC Ceiling exam light. Consists of a lightheaded reflector supported by a ceiling mounted radial arm assembly that provides a wide range of positioning capabilities. Halogen bulbs and an intensity control provide cool, color corrected light. The minimum ceiling height in most cases is 8'-0"; refer to each manufacturer's specific installation requirements. Physical dimensions refer to the retracted light; one length of the dual swing arm around the center mount in width and depth and the combined height of the lamp head and folded arms. Unit may also have a center mount detachable and sterilizable control handle. For use in minor procedure or examination room applications.

M7845 Monitor, Physiological, Bedside, 4 Channel 3 VV 4 channel bedside physiological monitor. The unit consist of a four-channel non-fade monochrome display monitor, an alarm system and printer-recording capabilities. The monitor has color coded controls and automatic calibration. The unit displays up to four waveforms simultaneously. The parameters to be monitored are user selectable. The monitor may be connected to a central monitoring station. The unit monitors patients in most acute care areas, step-down units, procedure rooms and emergency rooms.

M8810 Stand, Mayo 3 VV Adjustable instrument table. Table is corrosion resistant stainless steel construction and is mounted on two casters with two skid rails. It has telescopic upright adjusts from 39 inches to 60 inches with automatic locking device, and removable 13”x19” instrument tray. Designed for use in operating and procedure rooms.

A touch free wall-mounted hand sanitizer dispenser. For use throughout a healthcare facility. Unit does not include the sanitizing liquid. Units are battery operated.

A surface mounted, sensor activated, automatic, roll paper towel dispenser. The unit dispenses a paper towel automatically only when hands are placed in position below the dispenser for maximum sanitation and hygiene. May include adjustable settings for sheet length, time delay, and sensor range. Unit is battery operated or with optional AC power adapter.

Examination glove dispenser box for wall mounting. Fabricated of either cold rolled steel with a white baked enamel finish, plastic or acrylic. Provided with wall bracket to facilitate mounting and demounting.

A container for collecting and transporting syringes and other sharps for decontamination and disposal. Available in 2 gallon and 8 gallon with locking rotor. Complies with OSHA regulations for handling sharps.

Standing height under counter base sink cabinet with solid hinged doors. Also referred to as a double-door sink cabinet. For general purpose use throughout the facility where a sink is to be used. Coordinate actual clear cabinet dimension with the actual outside dimension of sink that is specified to ensure that they are compatible.

Single compartment stainless steel sink, drop-in, self-rimming, ledge-type, connected with a drain and provided with a mixing faucet. It shall also be provided with pre-punched fixture holes on 4” center, integral back ledge to accommodate deck-mounted fixtures, brushed/polished interior and top surfaces, and sound deadened. Recommended for use in suspended or U/C/B sink cabinets having a high plastic laminate or Chemsurf laminate countertop/work surface. For general purpose use throughout the facility.

A solid, nonporous countertop with a smooth seamless appearance. Easy to clean and maintain and with proper cleaning does not support the growth of mold. An acrylic-based solid surface product. Standard thickness of 1”, and a 4” butt backsplash/curb. Also referred to as a work surface or work top. Available in a choice of colors and depths. Used in lab and other hospital areas requiring optimum physical and chemical resisting properties.

Whiteboard unit, approximately 36” H x 48” W consisting of a white porcelain enamel writing surface with an attached chalk tray. Magnetic surface available. Image can be easily removed with a standard chalkboard eraser. For use with water color pens. Unit is ready to hang.

Clock, 12” diameter. Round surface, easy to read numbers with sweep second hand. Wall mounted unit for use when impractical to install a fully synchronized clock system. Battery operated, (batteries not included).

Desk top microprocessing computer. The unit shall consist of a central processing mini tower, flat panel monitor, keyboard, mouse and speakers. The system shall have the following minimum characteristics: a 2.8 GHz Pentium processor; 512 MB memory; 80GB hard drive; 32/48x CD-ROM/DVD combo; 1.44MB network interface card; video 32 MB NVIDIA; a 18 inch flat panel monitor. The computer is used throughout the facility to input, manipulate and retrieve information. Size and cost will vary dependent on number of modules selected.
Utility refrigerator approximately 35” H x 24” W x 26” D. The unit has a two tray cube cooling system. The refrigerator fits standard architectural dimensions for undercounter installation. The unit is perfect for use in nurses’ station, wards, and laboratories, pharmacies or wherever space is limited.

**C04F0**  Cabinet, U/C/B, 1 Shelf, 2 Half DR, 2 DO, 36x36x22  
1  CC  
Standing height under counter base cabinet with an adjustable shelf and two half width drawers above solid hinged doors. Also referred to as a combination cabinet or a drawer and cupboard cabinet. For general purpose use throughout the facility.

**CT050**  Countertop, Stainless Steel  
1  CC  
Stainless steel countertop (composition of heavy-gauge Type No. 304 stainless steel) having a smooth satin finish and integral 4” backsplash/curb. Also referred to as a corrosion-resistant steel work surface or work top. Available in various depths. Used in areas where excellent ease of cleaning, abrasion resistance, bacteria resistance, impact resistance, load capacity and moisture resistance, are of concern. Pricing based upon a 24” depth.

**F2000**  Basket, Wastepaper, Fire Resistant  
1  VV  
Wastepaper basket, fire resistant, approximately 40 quart capacity. This unit is used to collect and temporarily store small quantities of paper refuse in patient rooms, administrative areas and nursing stations. Size and shape varies depending on the application and manufacturer selected.

**P2000**  Eyewash, Wall Mounted, Hands-Free  
1  CC  
Wall mounted emergency eye wash station. The flow of water from the unit is activated by hand. Upon initiation of water flow the unit will operate hands free to provide streams of water to clear foreign particles or dilute caustic liquids from the eyes in emergency situations. Used in laboratories and areas of the hospital where employees are subject to foreign bodies or liquid material to the eyes.

**P2451**  Valve, Mixing, Thermostatic, Eyewash  
1  CC  
Emergency tempering valve thermostatically mixes hot and cold water to provide a safe fluid supply for a single emergency eye/face wash with a flow rate of 10 gpm (38.8L)

**P3100**  Lavatory, Vitreous China, Slab Type  
1  CC  
Wall mounted, slab type, vitreous china, lavatory (approximate bowl size 7”x15”x10”) with: faucet holes on 4” centers; gooseneck spout; wrist blade handles; and grid strainer. It shall be suitable for use in clinics, offices, washrooms or patient care area.

Highback contemporary swivel chair, 41" high X 23" wide X 23" deep with five (5) caster swivel base and arms. Chair may be used at desks or in conference rooms. Back and seat are foam padded and upholstered with either woven textile fabric or vinyl.

Half height two (2) or three (3) drawer lateral filing cabinet, 28" high X 42" wide X 18" deep with recessed handles, locking device and drawer label holders. Drawers are adaptable to either letter or legal size materials.

Wastepaper basket, fire resistant, approximately 40 quart capacity. This unit is used to collect and temporarily store small quantities of paper refuse in patient rooms, administrative areas and nursing stations. Size and shape varies depending on the application and manufacturer selected.

Desk top microprocessing computer. The unit shall consist of a central processing mini tower, flat panel monitor, keyboard, mouse and speakers. The system shall have the following minimum characteristics: a 2.8 GHz Pentium processor; 512 MB memory; 80GB hard drive; 32/48x CD-ROM/DVD combo; 1.44MB network interface card; video 32 MB NVIDIA; a 18 inch flat panel monitor. The computer is used throughout the facility to input, manipulate and retrieve information.

A tabletop telephone conferencing system typically found in a conference room. Features and accessories include 12-key telephone keypad, multiple conferencing navigation keys, console microphones, dynamic noise reduction, LCD display, caller ID and console loudspeaker.

A wall mounted, tilt/angled TV bracket for 37” to 80” TVs. Mount will be a universal and VESA compliant unit with a load capacity of up to 130 lbs.
Wall mounted television bracket backing which provides additional support and strength for the installation of the television bracket. Option available for interior or exterior plate and sized for 12” 16” or 24” stud spacing.

Conference chair designed to complement the executive furniture package selected. Foam rubber cushioned seats and backs covered with either woven fabric or vinyl. Base with 5 (five) swivel casters.

Medium sized computer table, approximately 35” high x 48” wide x 30” deep with enough surface for a CPU, monitor, keyboard and (optional) printer.

Wastepaper basket, fire resistant, approximately 40 quart capacity. This unit is used to collect and temporarily store small quantities of paper refuse in patient rooms, administrative areas and nursing stations. Size and shape varies depending on the application and manufacturer selected.

Clock, 12” diameter. Round surface, easy to read numbers with sweep second hand. Wall mounted unit for use when impractical to install a fully synchronized clock system. Battery operated, (batteries not included).

Shall be a video conferencing unit consisting of a camera, microphone, video/audio compression components, a component cart and a 32 inch monitor. It shall provide live audio-visual conferencing capabilities to dispersed geographic sites.

A high definition (HDTV) multimedia, slim design, 60”W to 65”W color television. The TV will have a 16:9 wide screen aspect ratio with full HD 1080p resolution and HDMI connections. TV may be LED, Plasma or LCD. TV will include a stand.

Telecommunication outlet location.

Storage cabinet, 78” high X 48” wide X 24” deep with two (2) doors and five (5) adjustable shelves.

Work table approximately 32” high X 72” wide X 30” deep with two drawers and a hard wood top.

Wastepaper basket, fire resistant, approximately 40 quart capacity. This unit is used to collect and temporarily store small quantities of paper refuse in patient rooms, administrative areas and nursing stations. Size and shape varies depending on the application and manufacturer selected.

Shredder shall be able to process a minimum of 25 sheets of paper per pass at a minimum rate of 20 feet per minute. The unit shall have a 16 inch throat to accept paper. Paper shall be shredded into 1/4 inch strips.

Floor standing copier. Unit features automatic paper size selection, automatic document feeder and sorter. The system also has zoom capabilities and automatic two-sided copying. For use where medium volume reproduction is required in the range of 30 to 40 copies per minute.
Color laser printer designed for high volume use and network capable. The printer shall be capable of printing a minimum of 25 pages per minute (ppm) of black print and 20 ppm color print. Resolution shall be no less than 600 X 600 dpi. It shall be capable of printing on multiple media types (plain, inkjet, photo paper and transparencies) and be capable of accepting media sizes of 3 X 5 to 8.5 X 14 inches. The printer is used in multi-user network offices.

Surface mounted cubicle track, with curtain. Track constructed of thick extruded aluminum. Equipped with self lubricating carriers, beaded drop chain hooks, and flame resistant curtain. To include removable end caps. Designed to be suspended around patient areas where privacy is needed. Price listed is per foot of the track, curtains to be priced per quote.

Standing height under counter base cabinet with an adjustable shelf and a full width drawer above solid hinged doors. Also referred to as a combination cabinet or a drawer and cupboard cabinet. For general purpose use throughout the facility.

Standing height under counter base sink cabinet with solid hinged doors. Also referred to as a double-door sink cabinet. For general purpose use throughout the facility where a sink is to be used. Coordinate actual clear cabinet dimension with the actual outside dimension of sink.

Wall hung cabinet with two adjustable shelves, framed-glass hinged doors, and sloping top. Also referred to as a framed-glass hinged double door wall case. For general purpose use throughout the facility.

A solid, nonporous countertop with a smooth seamless appearance. Easy to clean and maintain and with proper cleaning does not support the growth of mold. An acrylic-based solid surface product. Standard thickness of 1", and a 4" butt backsplash/curb. Also referred to as a work surface or work top. Available in a choice of colors and depths. Used in lab and other hospital areas requiring optimum physical and chemical resisting properties.

A solid, nonporous countertop approximately 36"W x 22"D with a undercounter sink combination. The countertop is an acrylic-based solid surface product with a standard thickness of 1", and a 4" butt backsplash/curb. Surfaces will be easy to clean and maintain. Also referred to as a work surface or work top with sink. Available in a choice of colors, depths and sink shapes. Used for various applications in patient rooms, restrooms and throughout the facility. Usually a part of a casework interior design program. Unit does not include the drain and faucet.

A mobile computer cart for use throughout the facility. The cart dimensions will be approximately 45" H x 30" W x 22" D with casters. May include drawers and miscellaneous other accessories that will be determined at time of purchase. This Typical may include:
- 1 Cart Body, w/Computer Support, Style-A Narrow, w/Raised Edge Top 1 Flip-Up Shelf
- 1 Sharps Container Holder 1 Wastebasket 1 Chart Holder 2 Drawers, 3"H 2 Drawers, 6"H 3 Accessory Rail, Side Drawer Organizer Bins

THIS TYPICAL INCLUDES: 1 Cart Body, Style-A Narrow, w/Raised Edge Top 2 Drawers, 3" H 4 Drawers, 6" H 1 Accessory Rail, Side Drawer Organizer Bins

Upholstered side chair, 32” high X 21” wide X 23” deep with arms, padded seats and padded backs. Seat height is a minimum of 17”. Available with or without sled base

Self adjusting stool. Consists of a foam padded upholstered seat with attached foot rest for added comfort. Mounted on swivel casters. Designed for doctor's use during examinations

Individual work table with tilt top. 11/8” all laminate top, Teemoldings edge bumper strip, height-adjustable legs with selfindexing, powder-coated steel base with chrome telescoping uprights to resist scratching, top tilts 0° - 50°, 35"L x 29"W x 23”- 34"H

### P3000  Lavatory, Vitreous China, Straight Back

1  | CC  
---|---
Wall mounted, vitreous china lavatory (approximate bowl size 7”x15”x10”) with: straight-front apron, straight or contoured back; faucet holes on 4” centers; gooseneck spout; wrist blade handles; and grid strainer. It shall be suitable for use in clinics, offices, washrooms or patient care areas.

### P4700  Sink, Mop, Molded Stone

1  | CC  
---|---
Mop service sink approximately 10”H x 36”W x 24”D. Also called a mop service basin and a mop receptor. Unit is made of molded stone and is a one piece item. It shall include a service faucet hose, hose bracket and mop hanger. Used in utility rooms for cleaning mops and floor cleaning equipment.

### T0801  Workbench, Electric, Pedestal Base

1  | VV  
---|---
Electrical workbench approximately 34” H x 72” W x 36” D. Characteristics/components include butcher block maple top; with two drawer or door pedestals and an electronic riser wiring kit. This workbench is used in wood and metal workshops. Workbench is a mix and match construction and can be configured to end users needs.

### T1000  Cabinet, Tool, Mobile, With Mechanics Tool Chest

1  | VV  
---|---
Tool cabinet and chest. Characteristics/components include: a mobile tool cabinet with 5 inch casters; shall have a minimum of 7 tamper-proof drawers; and have an internal drawer locking system that prevents unintentional drawer openings. The mechanics tool chest shall be capable of sitting on top of the mobile tool cabinet. It shall have a minimum of 10 tamper-proof drawers and have an internal drawer locking system that prevents unintentional drawer opening. All drawers shall lock automatically when the lid is closed. Shall have a partitioned top till that holds the lift-out trays equipped with socket dividers.

### T4000  Hoist, Chain, 1/2 Ton Capacity, 7 Foot Li

1  | VV  
---|---
Chain hoist. Characteristics/components include minimum 1/2 ton capacity; trolley that can be used with any hook suspended hoist; and a hoist that features a hardened load chain for optimum strength, flexibility and long wear.

</table>

An overhead rail system specifically designed for patient lifting and movement for a single bed patient room. The system will consist of recessed or ceiling mounted primary and secondary rails, lift motor with rolling carriage, patient harness or seat, and a hand controller or control box with charger. System will facilitate lifting and movement of patient to and from bed to gurney, chair or other requirement. Minimum lift capability is 550 pounds. Custom design of track layout by manufacturer is essential to meet individual facility requirements.

Disposible soap dispenser. One-handed dispensing operation. Designed to accommodate disposable soap cartridge and valve.

A touch free wall-mounted hand sanitizer dispenser. For use throughout a healthcare facility. Unit does not include the sanitizing liquid. Units are battery operated.

Standing height under counter base cabinet with an adjustable shelf and a full width drawer above solid hinged doors. Also referred to as a combination cabinet or a drawer and cupboard cabinet. For general purpose use throughout the facility.

Standing height under counter base sink cabinet with solid hinged doors. Also referred to as a double-door sink cabinet. For general purpose use throughout the facility where a sink is to be used. Coordinate actual clear cabinet dimension with the actual outside dimension of sink that is specified to ensure that they are compatible.

Wall hung cabinet with two adjustable shelves, framed-glass hinged doors, and sloping top. Also referred to as a framed-glass hinged double door wall case. For general purpose use throughout the facility.

A solid, nonporous countertop with a smooth seamless appearance. Easy to clean and maintain and with proper cleaning does not support the growth of mold. An acrylic-based solid surface product. Standard thickness of 1", and a 4" butt backsplash/curb. Also referred to as a work surface or work top. Available in a choice of colors and depths. Used in lab and other hospital areas requiring optimum physical and chemical resisting properties.

A solid, nonporous countertop approximately 36"W x 22"D with a undercounter sink combination. The countertop is an acrylic-based solid surface product with a standard thickness of 1", and a 4" butt backsplash/curb. Surfaces will be easy to clean and maintain. Also referred to as a work surface or work top with sink. Available in a choice of colors, depths and sink shapes. Used for various applications in patient rooms, restrooms and throughout the facility. Usually a part of a casework interior design program. Unit does not include the drain and faucet.

Computer assisted recumbent bicycle aerobic trainer. The trainer provides aerobic workouts on a computer controlled and monitored recumbent bicycle ergometer. The ergometer has several training routines and intensities which either the exerciser or a therapist can select. The unit display provides a readout of work accomplished as well as graphics to motivate the exerciser. Many models offer optional heart rate monitoring and wheels for easy mobility. Depending on the manufacturer and model, the computer is powered by the exerciser or an external source. The database electrical requirements are for those units requiring electrical power. The trainer is used for cardio-respiratory development in a gym or the exercise area of Physical Therapy.

### Television, HD, 40" Class

High definition (HDTV) multimedia flat panel LED 40” class display television. The TV will have a 16:9 wide screen aspect ratio, minimum of 1920 x 1080 display resolution, digital tuner, minimum refresh rate of 60Hz, minimum of two HDMI ports and 1 USB port ENERGY STAR certified

### Computer, Microprocessing, w/Flat Panel Monitor

Desk top microprocessing computer. The unit shall consist of a central processing mini tower, flat panel monitor, keyboard, mouse and speakers. The system shall have the following minimum characteristics: a 2.8 GHz Pentium processor; 512 MB memory; 80GB hard drive; 32/48x CD-ROM/DVD combo; 1.44MB network interface card; video 32 MB NVIDIA; a 18 inch flat panel monitor. The computer is used throughout the facility to input, manipulate and retrieve information.

### Printer, Computer

High resolution computer printer with a variety of type styles and sheet/envelope feeder trays. Database information reflects network ready, medium duty office style laser printers. Other types of printers (bubble jet, dot matrix, line or plotter) as well as light or heavy use capabilities are available.

### Shelving, Storage, Wire, CRS, w/Adjustable Shelves

Stationary, wire, shelving unit. Unit has fully adjustable shelves constructed of stainless steel. For use in general purpose storage areas. Shelving is provided in various sizes and configurations. Price provided is for a unit approximately 74”H x 18”D x 48”W with four shelves.

### Hamper, Linen, Mobile, w/Lid

Mobile linen hamper with hand or foot operated lid. Made of heavy tubular stainless steel with heavy gauge welded steel platform. Holds 25” hamper bags. Mounted on ball bearing casters. For linen transport in hospitals and clinics.

### Lift, Patient, Electric, 600 Lb Cap, Bariatric

A battery powered patient lift with an adjustable U shaped base and a minimum of 600 pound capacity for bariatric use. Unit comes with a battery charger. The unit is mounted on locking ball bearing casters for safety and stability and may require specialized slings. The database height refers to fully extended lifting arms. Designed for patient lifting and movement.

### Conditioner, Cold Treatment Pack

Refrigeration unit for twelve cold therapy packs. Unit features thermostatic temperature control, automatic defrosting and refrigeration grade insulation. Interior chamber is designed to facilitate periodic cleaning. Smaller capacity models are available.

### Therapy Unit, Hydroculator

Moist Heat Therapy Unit, also referred as a Hydrocollator Heating Unit, are used to apply effective heat to hot packs used in moist heat therapy. Unit is supplied ready for immediate use and requires no special plumbing. Unit features: stainless steel insulated wall, thermostatically controlled, casters (mobile units only), and standard size Hot Packs. Other unit sizes and accessories (variety of hot packs, tongs, side table rack, etc.) are available.

</tbody>
</table>
A5106  Waste Disposal Unit, Sharps w/Glove Dispenser  2  VV  The unit is designed for the disposal of sharps and complies with OSHA guidelines for the handling of sharps. It shall house a 5 quart container and be capable of being mounted on a wall. It shall have a glove dispenser attached. The unit shall be secured by a locked enclosure.

C04F0  Cabinet, U/C/B, 1 Shelf, 2 Half DR, 2 DO, 36x36x22  1  CC  Standing height under counter base cabinet with an adjustable shelf and two half width drawers above solid hinged doors. Also referred to as a combination cabinet or a drawer and cupboard cabinet. For general purpose use throughout the facility.

C05P0  Cabinet, Sink, U/C/B, 2 Door, 36x48x22  1  CC  Standing height under counter base sink cabinet with solid hinged doors. Also referred to as a double-door sink cabinet. For general purpose use throughout the facility where a sink is to be used. Coordinate actual clear cabinet dimension with the actual outside dimension of sink that is specified to ensure that they are compatible.

CS200  Sink, SS, Single Compartment, 12x28x16 ID  1  CC  Single compartment stainless steel sink, drop-in, self-rimming, ledge-type, connected with a drain and provided with a mixing faucet. It shall also be provided with pre-punched fixture holes on 4” center, integral back ledge to accommodate deck-mounted fixtures, brushed/polished interior and top surfaces, and sound deadened. Recommended for use in suspended or U/C/B sink cabinets having a high plastic laminate or Chemsurf laminate countertop/work surface. Coordinate actual outside sink dimensions with the actual clear dimension of cabinet specified to ensure that they are compatible. For general purpose use throughout the facility.

CT050  Countertop, Stainless Steel  1  CC  Forty four (44) gallon trash can, 32” high X 24” diameter, with lid. Used to collect and transport refuse from a point of origin to point of disposal (example: from soiled utility or a nursing unit to the trash compactor at housekeeping).

F2020  Can, Trash, 44 Gallon  1  VV  Wall mounted emergency eye wash station. The flow of water from the unit is activated by hand. Upon initiation of water flow the unit will operate hands free to provide streams of water to clear foreign particles or dilute caustic liquids from the eyes in emergency situations. Used in laboratories and areas of the hospital where employees are subject to foreign bodies or liquid material to the eyes.

P2000  Eyewash, Wall Mounted, Hands-Free  1  CC  Thermostatic mixing valve with washout hose. Used with portable whirlpool equipment. Thermostatic valve is used to maintain temperature between 70 and 110 degree Fahrenheit, with a flow rate of 20 gallons a minute. The washout hose assembly is used to wash out tanks after treatment. Used in physical therapy department to provide comfortable water temperature for patient treatments.

P2450  Valve, Mixing, Therostatic  1  CC  Wall mounted, slab type, vitreous china, lavatory (approximate bowl size 7”x15”x10”) with: faucet holes on 4” centers; gooseneck spout; wrist blade handles; and grid strainer. It shall be suitable for use in clinics, offices, washrooms or patient care area.

Used in lab and other hospital areas requiring optimum physical and chemical resisting properties.

### F0295 Chair, Stacking

1  
VV

Stacking chair, approximately 34” H X 21” W X 24” D. May be stacked up to 20 high depending upon the model selected. These chairs are intended primarily as overflow capacity for conference rooms.

### F2017 Waste Receptacle, 24 GAL

1  
VV

Rectangular steel waste receptacle with step-on lid and 24 gallon capacity. The receptacle is used to collect and temporarily store small quantities of paper refuse. Can be used in restrooms, patient areas, laboratories, pharmacies, etc.

### M2300 Washer, Clothes, Automatic

2  
VV

Large capacity automatic clothes washer with a heavy duty motor. The unit’s control system programs load, cycle time, spin speed, fabric, water level and water temperature. The washer includes a bleach and/or fabric softener dispenser and a filter ring for trapping lint.

### M2400 Dryer, Clothes, Automatic, Electric, Household

2  
VV

Automatic clothes dryer. Electric unit features automatic sensi-dry control with setting for different kinds of fabrics, timed cycle, removable lint filter, drum interior light and enamel finish.

### P1965 Eyewash, Eye/Face, Sink Mounted, Hands-free

1  
CC

Emergency tempering valve thermostatically mixes hot and cold water to provide a safe fluid supply for a single emergency eye/face wash with a flow rate of 10 gpm (38.8L)

### P2451 Valve, Mixing, Thermostatic, Eyewash

1  
CC

Emergency tempering valve thermostatically mixes hot and cold water to provide a safe fluid supply for a single emergency eye/face wash with a flow rate of 10 gpm (38.8L)

### A1200 Lift System, Overhead

1  
VC

An overhead ceiling mounted rail system specifically designed for patient lifting and movement within a patient room. The system will consist of recessed or ceiling mounted primary and secondary rails, lift motor with carriage, patient harness or seat, and a hand controller or control box with charger (other charging options may be available). System will facilitate lifting and movement of patient to and from bed, to stretcher, chair, bathroom or other requirements. Lifting capacity is 600 pounds. Custom design of track layout by manufacturer is essential to meet individual facility requirements.

### A6046 Artwork, Decorative, With Frame

1  
VV

This JSN is to be used for determining and defining location of decorative artwork

### C0025 Cabinet, Wardrobe, 1Door, 84x24x22

1  
CC

Wardrobe cabinet with a fixed shelf, clothing rod, and a solid or louvered right or left-hinged door (appropriate door hinge configuration to be indicated on the equipment elevation drawings), an optional locking door is available. Also referred to as a wardrobe case, unit or storage unit. Used for storage of clothing and personal items.

### F0315 Chair, Sleeper

1  
VV

Sleeper chair, 39” high X 36” wide X 74” deep (as a bed). Chair designed to convert (either fold-out or reclining) into a temporary bed used by either hospital staff or a patient's immediate family.

### F0355 Footstool, Straight

1  
VV

Step stool. Used to assist patients getting on and off exam or surgical tables. fitted with electrically conductive rubber tips.

</tbody>
</table>
A surface mounted, sensor activated, automatic, roll paper towel dispenser. The unit dispenses a paper towel automatically only when hands are placed in position below the dispenser for maximum sanitation and hygiene. May include adjustable settings for sheet length, time delay, and sensor range. Unit is battery operated or with optional AC power adapter.

A surface mounted, satin finish stainless steel, sanitary napkin disposal. Disposal features a flip-up cover, secured to the container by a heavy duty stainless steel piano-hinge. Disposal may be secured to wall or toilet partition. For general purpose use in female toilet stalls or rooms and uni-sex toilet rooms.

A 1-1/4” diameter, satin finish stainless steel, peened gripping surface, 2 wall toilet stall/room, grab bar with concealed mounting flanges. Snap over flanges are provided to conceal mounting screws. A selection of mounting kits and concealed anchor devices are available from the manufacturers for different types of installations. Grab bar shall comply with barrier-free accessibility guidelines for structural strength. For typical water closet applications in toilet stalls and rooms where ADA (American's With Disabilities Act) requirements must be met.

A concealed surface mounted, double roll, satin finish stainless steel, toilet tissue dispenser. Unit accommodates two standard-core toilet tissue rolls through 5” in diameter. Spindles are chrome plated plastic with a heavy-duty internal spring and turn freely for non-controlled delivery. For general purpose use in restrooms.

A solid, nonporous countertop approximately 36”W x 22”D with an undercounter sink combination. The countertop is an acrylic-based solid surface product with a standard thickness of 1”, and a 4” butt backsplash/curb. Surfaces will be easy to clean and maintain. Also referred to as a work surface or work top with sink. Available in a choice of colors, depths and sink shapes. Used for various applications in patient rooms, restrooms and throughout the facility. Usually a part of a casework interior design program. Unit does not include the drain and faucet.

A siphon jet water closet/toilet. This unit is wall hung with an elongated bowl, top spud flushometer, seat with open front and check hinge, and carrier. Used in restrooms throughout the health care facility.

- Examination glove dispenser box for wall mounting. Fabricated of either cold rolled steel with a white baked enamel finish, plastic or acrylic. Provided with wall bracket to facilitate mounting and demounting.
- A container for collecting and transporting syringes and other sharps for decontamination and disposal. Available in 2 gallon and 8 gallon with locking rotor. Complies with OSHA regulations for handling sharps.
- A surface mounted, satin finish stainless steel, double garment hook. Equipped with a concealed mounting bracket that is secured to a concealed wall plate. For general purpose use throughout the facility to hang various items of apparel.
- Surface mounted cubicle track, with curtain. Track constructed of thick extruded aluminum. Equipped with self lubricating carriers, beaded drop chain hooks, and flame resistant curtain. To include removable end caps. Designed to be suspended around patient areas where privacy is needed. Price listed is per foot of the track, curtains to be priced per quote.
- Standing height under counter base sink cabinet with a solid right or left-hinged door (appropriate door configuration to be indicated on equipment elevation drawings). Also referred to as a single-door sink cabinet. For general purpose use throughout the facility where a sink is to be used. Coordinate actual clear cabinet dimension with the actual outside dimension of sink that is specified to ensure that they are compatible.
- Wall hung cabinet with two adjustable shelves, solid hinged doors, and sloping top. Also referred to as a solid hinged double door wall case. For general purpose use throughout the facility.
- Single compartment stainless steel sink, drop-in, self-rimming, ledge-type, connected with a drain and provided with a mixing faucet. It shall also be provided with pre-punched fixture holes on 4” center, integral back ledge to accommodate deck-mounted fixtures, brushed/polished interior and top surfaces, and sound deadened. Recommended for use in suspended or U/C/B sink cabinets having a high plastic laminate or Chemsurf laminate countertop/work surface. For general purpose use throughout the facility.
- A solid, nonporous countertop with a smooth seamless appearance. Easy to clean and maintain and with proper cleaning does not support the growth of mold. An acrylic-based solid surface product. Standard thickness of 1”, and a 4” butt backsplash/curb. Also referred to as a work surface or work top. Available in a choice of colors and depths. Used in lab and other hospital areas requiring optimum physical and chemical resisting properties.
- THIS TYPICAL INCLUDES:
  1 Cart Body, Style-A Narrow, w/Raised Edge Top
  2 Drawers, 3” H
  4 Drawers, 6” H
  1 Accessory Rail, Side Drawer Organizer Bins
- Upholstered side chair, 32” high X 21” wide X 23” deep with arms, padded seats and padded backs. Seat height is a minimum of 17”. Available with or without sled base.
- Self adjusting stool. Consists of a foam padded upholstered seat with attached foot rest for added comfort. Mounted on swivel casters. Designed for doctor’s use during examinations.

Wastepaper basket, fire resistant, approximately 40 quart capacity. This unit is used to collect and temporarily store small quantities of paper refuse in patient rooms, administrative areas and nursing stations. Size and shape varies depending on the application and manufacturer selected.

Bulletin board approximately 36”W x 24”H. Wood framed 1/2” cork posting panel with moisture proof backing. Units are factory assembled and have keyhole hangers for easy installation.

Clock, 12” diameter. Round surface, easy to read numbers with sweep second hand. Wall mounted unit for use when impractical to install a fully synchronized clock system. Battery operated, (batteries not included).

Flat screen television with approximately 32” to 40’ diagonal screen size. The TV will have built-in speakers, NTSC tuner, a 16:9 wide screen aspect ratio, a minimum of 1280 x 768 resolution and a remote control.

Mobile telemedicine station configured with one or two monitors, camera, speakers, microphone and computer. Items are mounted on a five caster cart.

Desk top microprocessing computer. The unit shall consist of a central processing mini tower, flat panel monitor, keyboard, mouse and speakers. The system shall have the following minimum characteristics: a 2.8 GHz Pentium processor; 512 MB memory; 80GB hard drive; 32/48x CD-ROM/DVD combo; 1.44MB network interface card; video 32 MB NVIDIA; a 18 inch flat panel monitor. The computer is used throughout the facility to input, manipulate and retrieve information.

A wall mounted computer workstation with height adjustable monitor and keyboard arms. Keyboard and monitor can be stored within 8” to 10” of wall. Fingertip adjustability for keyboard and monitor enable frequent position changes. Unit contains an integrated cable management system to hide wires. A separate wall-mounted CPU holder is included.

Aneroid sphygmomanometer. Unit is wall mounted and has large graphic dial display for easy reading from all angles. It has a 90 degree (angle) swivel and 10 degree (angle) forward tilt to reduce glare. Unit accuracy is within 1% of reading. Sturdy impact-resistant construction.

Wall mounted otoscope and ophthalmoscope. Includes 6 foot line cord and plug and accepts and includes two handles. Contains head turn-on/turn-off, built-in speculum tray and 8 foot coiled cords. Unit is designed for use in patient exam rooms.

The exam light shall be a mobile floor unit. The light will be a halogen bulb or LED that can produce a continuous and homogeneous spot of light adjustable from 5 to 9 inches in diameter from a set distance. The light intensity shall be a minimum of 750 foot-candles at a distance of 16 inches and have a color temperature of 3,200 degrees Kelvin. The unit will consist of an arm or sleeve of approximately 45 inches in length to allow for easy arm rotation and arm movement up and down. The unit shall be mounted on a caster base for easy movement.,

Table, examination/treatment with cabinet. Cabinet type exam table with three section upholstered top adjustable to a full chair position. Concealed heel stirrups, dual outlets, drawers, and storage space with optional armboard. Unit is designed for general use in examination/treatment rooms.

M1840  Printer/Copier/Fax Combination  1  VV  Multifunctional printer, fax, scanner and copier (PFC) all-in-one machine

M7260  Counter/Dispenser, Pill/Tablet  1  VV  Automated pill, capsule and tablet counter. The unit consists of an array of holding cells each of which dispenses a set number of pills into a prescription bottle. The counter has a control unit to start and stop pill flow. Each cell has a straight line pill flow pattern, a photoelectric counter which signals the controller, a count range from 1 to 10,000 and can dispense products at a rate up to 600 tablets per minute. A built-in sensor indicates dust build up or misalignment of the photoelectric counter. Each cell has easily removable bins and mechanisms for cleaning and refilling. Each cell features an LED display and there are varying sizes of cells for handling more frequently issued or physically larger drugs. Many different, including custom, array of sizes and configurations are possible and the final design depends on the facility layout and pharmacy practice preferences. Individual cells can also be equipped with coded locks. The entire array can be interfaced with a pharmacy computer system. These units are commonly leased rather than sold because of maintenance requirements.

P3100  Lavatory, Vitreous China, Slab Type  1  CC  Wall mounted, slab type, vitreous china, lavatory (approximate bowl size 7”x15”x10”) with: faucet holes on 4” centers; gooseneck spout; wrist blade handles; and grid strainer. It shall be suitable for use in clinics, offices, washrooms or patient care area.

R6060  Refrigerator, Biological, SS, 2 Door, 40 Cu Ft  2  VV  Biological refrigerator. This unit shall have a minimum volume of 40 cubic feet, double doors, stainless steel cooler storage with stainless steel drawers, three adjustable shelves and one stationary stainless steel shelf. This refrigerator is used in research laboratories and hospital pharmacies for storage and dispensing of drugs.

</table>
Professional medical grade DVD video recorder/player. Approximately 5" high X 10" wide X 14" deep. Meets NTSC and PAL standards and employs MPEG2 video compression. Capable of high speed picture search, direct recording into available disc space and recording and playback on various DVD formats. Audio uses Dolby digital format. Convenience outlet required at point of use.

A high definition (HDTV) multimedia, slim design, 60"W to 65"W color television. The TV will have a 16.9 wide screen aspect ratio with full HD 1080p resolution and HDMI connections. TV may be LED, Plasma or LCD. TV will include a stand.

High resolution computer printer with a variety of type styles and sheet/envelope feeder trays. Database information reflects network ready, medium duty office style laser printers. Other types of printers (bubble jet, dot matrix, line or plotter) as well as light or heavy use capabilities are available.

Stationary, wire, shelving unit. Unit has fully adjustable shelves constructed of stainless steel. For use in general purpose storage areas. Shelving is provided in various sizes and configurations. Price provided is for a unit approximately 74"H x 18"D x 48"W with four shelves.

Volleyball net including stanchions and guy wires for use in a gym. Poles require floor plates for installation. Dimensions refer to items consolidated and packed in a storage bag.

Gym mat hooks. Metal hook and bracket mounted on a hardwood base. Two hangers hold four 2" thick mats

Drinking water fountain. This unit is semi-recessed and wall mounted at handicap level with an air cooled compressor. The unit provides easy access with push-bar/button. The unit provides cool drinking water in hospitals and commercial office buildings to include access by handicapped persons.

Stationary, wire, shelving unit. Unit has fully adjustable shelves constructed of stainless steel. For use in general purpose storage areas. Shelving is provided in various sizes and configurations. Price provided is for a unit approximately 74"H x 18"D x 48"W with four shelves.

### Countertop, Solid Surface (CT020)

A solid, nonporous countertop with a smooth seamless appearance. Easy to clean and maintain and with proper cleaning does not support the growth of mold. An acrylic-based solid surface product. Standard thickness of 1", and a 4" butt backsplash/curb. Also referred to as a work surface or worktop. Available in a choice of colors and depths. Used in lab and other hospital areas requiring optimum physical and chemical resisting properties.

### Washer, Cart, Automatic, Electric And Steam (K9600)

Automatic cart washer. This unit is a CRS, roll-through unit with wash, rinse and dry cycles to accommodate pastry cabinet utility carts and non-electric, non-motorized food carriers. The washer will be a compartment type and have a reciprocating spray pressure washer system constructed of stainless steel. With the spray head suspended on rollers from a stationary back in the washer, this unit is designed specifically for processing clustered racks and carts.

### Shelving, Storage, Wire, CRS, w/Adjustable Shelves (M2055)

Stationary, wire, shelving unit. Unit has fully adjustable shelves constructed of stainless steel. For use in general purpose storage areas. Shelving is provided in various sizes and configurations. Price provided is for a unit approximately 74"H x 18"D x 48"W with four shelves.

### Eyewash, Eye/Face, Sink Mounted, Hands-free (P1965)

A sink mounted eyewash station. The unit is designed for emergency eye and face rinsing from soft flow dual spray-heads. The flow must be activated by the single momentary action and remain on until terminated.

### Valve, Mixing, Thermostatic, Eyewash (P2451)

Emergency tempering valve thermostatically mixes hot and cold water to provide a safe fluid supply for a single emergency eye/face wash with a flow rate of 10 gpm (38.8L)

### F2000 Basket, Wastepaper, Fire Resistant
- **QTY:** 1
- **DESCRIPTION:** Wastepaper basket, fire resistant, approximately 40 quart capacity. This unit is used to collect and temporarily store small quantities of paper refuse in patient rooms, administrative areas and nursing stations. Size and shape varies depending on the application and manufacturer selected.

### F3200 Clock, Battery, 12” Diameter
- **QTY:** 1
- **DESCRIPTION:** Clock, 12” diameter. Round surface, easy to read numbers with sweep second hand. Wall mounted unit for use when impractical to install a fully synchronized clock system. Battery operated, (batteries not included).

### M1801 Computer, Microprocessing, w/Flat Panel Monitor
- **QTY:** 1
- **DESCRIPTION:** Desk top microprocessing computer. The unit shall consist of a central processing mini tower, flat panel monitor, keyboard, mouse and speakers. The system shall have the following minimum characteristics: a 2.8 GHz Pentium processor; 512 MB memory; 80GB hard drive; 32/48x CD-ROM/DVD combo; 1.44MB network interface card; video 32 MB NVIDIA; a 18 inch flat panel monitor. The computer is used throughout the facility to input, manipulate and retrieve information.

Highback contemporary swivel chair, 41” high X 23” wide X 23” deep with five (5) caster swivel base and arms. Chair may be used at desks or in conference rooms. Back and seat are foam padded and upholstered with either woven textile fabric or vinyl.

Half height two (2) or three (3) drawer lateral filing cabinet, 28” high X 42” wide X 18” deep with recessed handles, locking device and drawer label holders. Drawers are adaptable to either letter or legal size materials.

Wastepaper basket, fire resistant, approximately 40 quart capacity. This unit is used to collect and temporarily store small quantities of paper refuse in patient rooms, administrative areas and nursing stations. Size and shape varies depending on the application and manufacturer selected.

Desk top microprocessing computer. The unit shall consist of a central processing mini tower, flat panel monitor, keyboard, mouse and speakers. The system shall have the following minimum characteristics: a 2.8 GHz Pentium processor; 512 MB memory; 80GB hard drive; 32/48x CD-ROM/DVD combo; 1.44MB network interface card; video 32 MB NVIDIA; a 18 inch flat panel monitor. The computer is used throughout the facility to input, manipulate and retrieve information.

A surface mounted, satin finish stainless steel, double garment hook. Equipped with a concealed mounting bracket that is secured to a concealed wall plate. For general purpose use throughout the facility to hang various items of apparel.
This section will provide a whole work station typical to quickly plan work areas in clinical or administrative spaces. There will be a price decrease if typical work stations are used with vertical hanging strips instead of panels. THIS TYPICAL INCLUDES:

- 4 standard solid panels;
- 2 panel connectors, 2-way corner;
- 1 panel-to-panel connector;
- 2 finished end hardware;
- 1 cantilevered work surface;
- 1 peninsula work surface;
- 2 lockable flipper units;
- 2 shelf, storage/display;
- 2 lights;
- 1 tack board, 48”W;
- 1 tool rail, 30”W;
- 1 paper tray;
- 1 diagonal tray;
- 1 adjustable keyboard tray;
- 1 mobile pedestal, box/file.

<tbody>
<tr>
<td>A1020</td>
<td>Telephone, Conferencing System</td>
<td>1</td>
<td>VV</td>
<td>A tabletop telephone conferencing system typically found in a conference room. Features and accessories include 12-key telephone keypad, multiple conferencing navigation keys, console microphones, dynamic noise reduction, LCD display, caller ID and console loudspeaker.</td>
</tr>
<tr>
<td>A5212</td>
<td>Bracket, Television, Wall-Mounted, Tilt/Angle</td>
<td>1</td>
<td>VV</td>
<td>A wall mounted, tilt/angled TV bracket for 37” to 80” TVs. Mount will be a universal and VESA compliant unit with a load capacity of up to 130 lbs.</td>
</tr>
</tbody>
</table>
### Wall mounted television bracket backing which provides additional support and strength for the installation of the television bracket. Option available for interior or exterior plate and sized for 12” 16” or 24” stud spacing.

### Conference chair designed to complement the executive furniture package selected. Foam rubber cushioned seats and backs covered with either woven fabric or vinyl. Base with 5 (five) swivel casters.

### Medium sized computer table, approximately 35” high x 48” wide x 30” deep with enough surface for a CPU, monitor, keyboard and (optional) printer.

### Folding table intended for a variety of uses. Designed with a flip top that allows tables to store nested to minimize needed storage space. Available in multiple laminate finish colors/patterns, bases, surface shapes (description and pricing based on a rectangle shape) and edge finish. Available with leveling glides or casters (2 locking, 2 non-locking).

### Wastepaper basket, fire resistant, approximately 40 quart capacity. This unit is used to collect and temporarily store small quantities of paper refuse in patient rooms, administrative areas and nursing stations. Size and shape varies depending on the application and manufacturer selected.

### Desk top microprocessing computer. The unit shall consist of a central processing mini tower, flat panel monitor, keyboard, mouse and speakers. The system shall have the following minimum characteristics: a 2.8 GHz Pentium processor; 512 MB memory; 80GB hard drive; 32/48x CD-ROM/DVD combo; 1.44MB network interface card; video 32 MB NVIDIA; a 18 inch flat panel monitor. The computer is used throughout the facility to input, manipulate and retrieve information.
Floor standing copier. Unit features automatic paper size selection, automatic document feeder and sorter. The system also has zoom capabilities and automatic two-sided copying. For use where medium volume reproduction is required in the range of 30 to 40 copies per minute.

Color laser printer designed for high volume use and network capable. The printer shall be capable of printing a minimum of 25 pages per minute (ppm) of black print and 20 ppm color print. Resolution shall be no less than 600 X 600 dpi. It shall be capable of printing on multiple media types (plain, inkjet, photo paper and transparencies) and be capable of accepting media sizes of 3 X 5 to 8.5 X 14 inches. The printer is used in multi-user network offices.

</table>

- **CB020**: Wall hung cabinet with two adjustable shelves, solid right or left-hinged door (appropriate door hinge configuration to be indicated on equipment elevation drawings), and sloping top. Also referred to as a solid hinged single door case. For general purpose use throughout the facility.

- **CS010**: Single compartment stainless steel sink, drop-in, self-rimming, ledge-type, connected with a drain and provided with a mixing faucet. It shall also be provided with pre-punched fixture holes on 4” center, integral back ledge to accommodate deck-mounted fixtures, brushed/polished interior and top surfaces, and sound deadened. Recommended for use in suspended or U/C/B sink cabinets having a high plastic laminate or Chemsurf laminate countertop/work surface. For general purpose use throughout the facility.

- **CT020**: A solid, nonporous countertop with a smooth seamless appearance. Easy to clean and maintain and with proper cleaning does not support the growth of mold. An acrylic-based solid surface product. Standard thickness of 1”, and a 4” butt backsplash/curb. Also referred to as a work surface or work top. Available in a choice of colors and depths. Used in lab and other hospital areas requiring optimum physical and chemical resisting properties.

- **F0225**: Dining room chair with glides. Chair has straight legs with cushioned cloth or vinyl seat.

- **F0795**: Dining table. Round 42” diameter or square 42” X 42”. Used in dining facilities and can comfortably seat up to four (4) persons.

- **F2015**: Metal receptacle for soiled / used towels or waste. Equipped with a removable tapered top with two independently operating self-closing, spring hinged doors. Used in public facilities for the collection and temporary storage of refuse.

- **F3065**: A combination whiteboard and bulletin board, half LCS and half cork. Available with either aluminum or wood frame. It can be used in patient rooms or in any appropriate space in the facility.

- **F3200**: Clock, 12” diameter. Round surface, easy to read numbers with sweep second hand. Wall mounted unit for use when impractical to install a fully synchronized clock system. Battery operated, (batteries not included).

- **K1552**: Counter mounted microwave oven for average duty use. The exterior cabinet can be metal or heavy duty impact resistant plastic. The oven delivers instant energy for rapid heating, defrosting or prime cooking. The oven has touch pad controls, digital timer, power level selector and preprogrammed selectors for commonly cooked items. This oven is commonly found in staff lounges.

- **K4665**: High definition (HDTV) multimedia flat panel LED 40” class display television. The TV will have a 16:9 wide screen aspect ratio, minimum of 1920 x 1080 display resolution, digital tuner, minimum refresh rate of 60Hz, minimum of two HDMI ports and 1 USB port ENERGY STAR certified.
| R7250 | Refrigerator/Freezer, 20 Cubic Feet | 1 | VV | Refrigerator/freezer unit. This type unit includes a food saver system that helps keep food fresher. It also includes roll out wheels and is equipped for an optional automatic icemaker. This unit is of commercial or residential design and use. |

This JSN will provide a whole work station typical to quickly plan work in areas in clinical or administrative spaces. There will be a price decrease if typical work stations are used with vertical hanging strips instead of panels. THIS TYPICAL INCLUDES:
4 Standard Solid Panels
2 Panel Connectors, 2-Way Corner
1 Panel-to-Panel Connector
2 Finished End Hardware
1 Cantilevered, Work Surface
2 Lockable Flipper Units
2 Shelf, Storage/Displays
2 Lights
1 Tack board
1 Tool Rail
1 Paper Tray
1 Diagonal Tray
1 Adjustable Keyboard Tray
1 Mobile Pedestal, Box/File

Highback contemporary swivel chair, 41” high X 23” wide X 23” deep with five (5) caster swivel base and arms. Chair may be used at desks or in conference rooms. Back and seat are foam padded and upholstered with either woven textile fabric or vinyl.

Half height two (2) or three (3) drawer lateral filing cabinet, 28” high X 42” wide X 18” deep with recessed handles, locking device and drawer label holders. Drawers are adaptable to either letter or legal size materials.

Wastepaper basket, fire resistant, approximately 40 quart capacity. This unit is used to collect and temporarily store small quantities of paper refuse in patient rooms, administrative areas and nursing stations. Size and shape varies depending on the application and manufacturer selected.

Desk top microprocessing computer. The unit shall consist of a central processing mini tower, flat panel monitor, keyboard, mouse and speakers. The system shall have the following minimum characteristics: a 2.8 GHz Pentium processor; 512 MB memory; 80GB hard drive; 32/48x CD-ROM/DVD combo; 1.44MB network interface card; video 32 MB NVIDIA; a 18 inch flat panel monitor. The computer is used throughout the facility to input, manipulate and retrieve information.

A high quality 1/4” polished float glass mirror, approximately 36” H X 18” W framed in a one-piece, bright polished, stainless steel channel frame with 90° mitered corners and an integral stainless steel stain finish, shelf. All edges of the mirror are protected by absorbing filler strips. Mirror has a galvanized steel back with integral horizontal hanging brackets and wall hanger for concealed mounting. For mounting above single wall mounted lavatories located in restroom areas, Doctor examination areas, offices, etc. May also be used above double lavatories, either wall or countertop mounted.

</tbody>
</table>
**CT020 Countertop, Solid Surface**  
1 CC  
A solid, nonporous countertop with a smooth seamless appearance. Easy to clean and maintain and with proper cleaning does not support the growth of mold. An acrylic-based solid surface product. Standard thickness of 1", and a 4" butt backsplash/curb. Also referred to as a work surface or work top. Available in a choice of colors and depths. Used in lab and other hospital areas requiring optimum physical and chemical resisting properties.

**F0295 Chair, Stacking**  
1 VV  
Stacking chair, approximately 34" H X 21" W X 24" D. May be stacked up to 20 high depending upon the model selected. These chairs are intended primarily as overflow capacity for conference rooms.

**F2017 Waste Receptacle, 24 GAL**  
1 VV  
Rectangular steel waste receptacle with step-on lid and 24 gallon capacity. The receptacle is used to collect and temporarily store small quantities of paper refuse. Can be used in restrooms, patient areas, laboratories, pharmacies, etc.

**M2300 Washer, Clothes, Automatic**  
2 VV  
Large capacity automatic clothes washer with a heavy duty motor. The unit's control system programs load, cycle time, spin speed, fabric, water level and water temperature. The washer includes a bleach and/or fabric softener dispenser and a filter ring for trapping lint.

**M2400 Dryer, Clothes, Automatic, Electric, Household**  
2 VV  
Automatic clothes dryer. Electric unit features automatic sensi-dry control with setting for different kinds of fabrics, timed cycle, removable lint filter, drum interior light and enamel finish.

**P1965 Eyewash, Eye/Face, Sink Mounted, Hands-free**  
1 CC  
Emergency tempering valve thermostatically mixes hot and cold water to provide a safe fluid supply for a single emergency eye/face wash with a flow rate of 10 gpm (38.8L).

**P2451 Valve, Mixing, Thermostatic, Eyewash**  
1 CC  
Emergency tempering valve thermostatically mixes hot and cold water to provide a safe fluid supply for a single emergency eye/face wash with a flow rate of 10 gpm (38.8L).

**P8710 Utility Center, Plumbing Connection**  
2 CC  
Plumbing connection utility center, sometimes referred to as a 'GUY GRAY BOX'. This recessed utility center provides for hot and cold water connections and a drain connection at sink and other equipment locations. The utility center includes cutoff valves for the water connections, a plug seal for the drain and an outside cover to provide an aesthetic appearance when connections are no longer required. This center may be installed in locations where no plumbing fixtures are included in a design as a future flexibility device, saving many dollars for later facility modifications to incorporate sinks as functions change.

</tr>
</tbody>
</table>
Wall mounted emergency eye wash station. The flow of water from the unit is activated by hand. Upon initiation of water flow the unit will operate hands free to provide streams of water to clear foreign particles or dilute caustic liquids from the eyes in emergency situations. Used in laboratories and areas of the hospital where employees are subject to foreign bodies or liquid material to the eyes.

Thermostatic mixing valve with washout hose. Used with portable whirlpool equipment. Thermostatic valve is used to maintain temperature between 70 and 110 degree Fahrenheit, with a flow rate of 20 gallons a minute. The washout hose assembly is used to wash out tanks after treatment. Used in physical therapy department to provide comfortable water temperature for patient treatments.

Wall mounted, slab type, vitreous china, lavatory (approximate bowl size 7"x15"x10") with: faucet holes on 4" centers; gooseneck spout; wrist blade handles; and grid strainer. It shall be suitable for use in clinics, offices, washrooms or patient care area.

1-2 bed, general, prefabricated headwall. Unit consists of a patient service module for general care, single or double bed type. It contains lighting, medical gases, electrical outlets, nurse call and bed bumper. Specify number and type of medical gas and electrical outlets. Size of module will vary by type and configuration of outlets.

Disposable soap dispenser. One-handed dispensing operation. Designed to accommodate disposable soap cartridge and valve.

A surface mounted, satin finish stainless steel, single-fold, paper towel dispenser. Dispenser features: tumbler lock; front hinged at bottom; and refill indicator slot. Minimum capacity 400 single-fold paper towels. For general purpose use throughout the facility.

The unit is designed for the disposal of sharps and complies with OSHA guidelines for the handling of sharps. It shall house a 5 quart container and be capable of being mounted on a wall. It shall have a glove dispenser attached. The unit shall be secured by a locked enclosure.

Surface mounted cubicle track, with curtain. Track constructed of thick extruded aluminum. Equipped with self lubricating carriers, beaded drop chain hooks, and flame resistant curtain. To include removable end caps. Designed to be suspended around patient areas where privacy is needed. Price listed is per foot of the track, curtains to be priced per quote.

This JSN is to be used for determining and defining the location of drapes. Fabric to be flame retardant, variable colors and patterns with backing. Price based on a pair of drapes for a window approximately 36” W X 60” H.

Drafting chair approximately 47” high X 20” wide X 20” deep with rotary stool and a 5 (five) star base with casters. Padded seat and back. Foot ring adjusts with chair.

High back patient chair, approximately 45” H X 24” W X 30” D with padded and upholstered back and seat. Straight legs have floor glides. Upholstery material is vinyl.

Sleeper chair, 39” high X 36” wide X 74” deep (as a bed). Chair designed to convert (either fold-out or reclining) into a temporary bed used by either hospital staff or a patient's immediate family.

Step stool. Used to assist patients getting on and off exam or surgical tables. Fitted with electrically conductive rubber tips.

Bedside cabinet for storage of both the patient's personal items and small patient support items. Approximately 31” high X 21” wide X 19” deep with one (1) drawer and one (1) closed storage closet. Drawer is removable so interior can be sanitized. May come in a 3 drawer version.

A combination wardrobe that combines the storage of clothing along with a television cabinet. Item is intended for use in patient bedrooms particularly the LDR and LDRP.

Wastepaper basket, fire resistant, approximately 40 quart capacity. This unit is used to collect and temporarily store small quantities of paper refuse in patient rooms, administrative areas and nursing stations. Size and shape varies depending on the application and manufacturer selected.

Whiteboard unit, approximately 36” H x 48” W consisting of a white porcelain enamel writing surface with an attached chalk tray. Magnetic surface available. Image can be easily removed with a standard chalkboard eraser. For use with water color pens. Unit is ready to hang.

<td>Frame, Infectious Waste Bag w/Lid</td>
<td>1</td>
<td>Frame for an infectious waste collection bag. Made of heavy tubular stainless steel with heavy gauge welded steel platform. Adjust to hold 18” or 25” trash bags. Mounted on ball bearing casters and includes permanently mounted hinged lid. Provides means of bagging infectious waste at point of waste generation.</td>
</tr>
<tr>
<td>M4255</td>
<td>Stand, IV, Adjustable</td>
<td>2</td>
<td>Adjustable IV stand with 4-hook arrangement. Stand has stainless steel construction with heavy weight base. It adjusts from 66 inches to 100 inches and is mounted on conductive rubber, ball bearing, swivel casters. Stand is used for administering intravenous solutions.</td>
</tr>
</tbody>
</table>
M4266  Pump, Volumetric, Infusion, Multiple Line  2  VV  Volumetric infusion pump. Pump is self-regulating with automatic sensor and adjustable rate. Equipped with visual and audible alarms and up to 10 hour capacity battery. For the administration of a wide variety of therapeutic agents where precise control is required. Unit provides individual control to IV lines simultaneously.

M7010  Bed, Patient, Electric  2  VV  Electric patient bed. Includes safety side rails, IV rod insertion slots and patient control panel for a full range of positions. Four wheel locking brakes. Overall bed height adjustable between 16.5 and 31 inches.

M7025  Mattress, Bed, Hospital  2  VV  Hospital bed mattress. These mattresses are usually filled with multi-layered foam, wire coil innersprings, or a combination of both. Mattresses are made of a fire retardant material (to meet California standard) and are enclosed in waterproof anti-microbial covers. For hospital use.

M7040  Table, Overbed  2  VV  Overbed table. Adjustable height table constructed of heavy gauge steel. Mounted on 2” diameter twin swivel casters with bumper caps. Table top is constructed with a high pressure plastic laminated surface that resists chipping, scratching, and staining. It includes a vanity tray and a mirror. Table is designed for use over bed, wheelchair or large chair.

P3070  Lavatory, Vitreous China, Under or Counter Top Mtd  1  CC  An undercounter or countertop mounted vitreous china lavatory (approximate bowl size 6”x17”x14”) with gooseneck spout, wrist blade handles, and grid drain. Counter top mounted lavatory to be self rimming with mounting kit provided. Undercounter lavatory to have unglazed rim with a mounting kit also provided. For general purpose use in vanity tops in public, patient and staff toilet rooms.

<td>CC</td>
<td>A concealed surface mounted, double roll, satin finish stainless steel, toilet tissue dispenser. Unit accommodates two standard-core toilet tissue rolls through 5” in diameter. Spindles are chrome plated plastic with a heavy-duty internal spring and turn freely for non-controlled delivery. For general purpose use in restrooms.</td>
</tr>
</tbody>
</table>
CT025 Countertop, Solid Surface with Sink Combination 1 CC

A solid, nonporous countertop approximately 36”W x 22”D with a undercounter sink combination. The countertop is an acrylic-based solid surface product with a standard thickness of 1”, and a 4” butt backsplash/curb. Surfaces will be easy to clean and maintain. Also referred to as a work surface or work top with sink. Available in a choice of colors, depths and sink shapes. Used for various applications in patient rooms, restrooms and throughout the facility. Usually a part of a casework interior design program. Unit does not include the drain and faucet.

F2015 Basket, Wastepaper, Metal/Plastic, 2 Swinging Doors 1 VV

Metal receptacle for soiled / used towels or waste. Equipped with a removable tapered top with two independently operating self-closing, spring hinged doors. Used in public facilities for the collection and temporary storage of refuse.

P9050 Toilet, Wall Hung, Siphon Jet 1 CC

Siphon jet water closet/ toilet. This unit is wall hung with an elongated bowl, top spud flushometer, seat with open front and check hinge, and carrier. Used in restrooms throughout the health care facility.

Page 362 of 403
This section will provide a whole work station typical to quickly plan work areas in clinical or administrative spaces. There will be a price decrease if typical work stations are used with vertical hanging strips instead of panels. **THIS TYPICAL INCLUDES:**

- 4 standard solid panels;
- 2 panel connectors, 2-way corner;
- 1 panel-to-panel connector;
- 2 finished end hardware;
- 1 cantilevered work surface;
- 1 peninsula work surface;
- 2 lockable flipper units;
- 2 shelf, storage/display;
- 2 lights;
- 1 tack board, 48”W;
- 1 tool rail, 30”W;
- 1 paper tray;
- 1 diagonal tray;
- 1 adjustable keyboard tray;
- 1 mobile pedestal, box/file.

### Waste Disposal Unit, Sharps

**A5108**  
**Waste Disposal Unit, Sharps**  
**1**  
**VV**  
A container for collecting and transporting syringes and other sharps for decontamination and disposal. Available in 2 gallon and 8 gallon with locking rotor. Complies with OSHA regulations for handling sharps.
A solid, nonporous countertop with a smooth seamless appearance. Easy to clean and maintain and with proper cleaning does not support the growth of mold. An acrylic-based solid surface product. Standard thickness of 1", and a 4" butt backsplash/curb. Also referred to as a work surface or work top. Available in a choice of colors and depths. Used in lab and other hospital areas requiring optimum physical and chemical resisting properties.
